WARNING: This report is not for the faint of Heart. Very nasty stuff follows that WILL impact your consciousness in a negative manner (at least at first). And may affect your health. BE WARNED NOW!

So make a decision now to NOT read this material any further if you have any health or consciousness problems that may weaken your bodily systems.

NO BULL HERE! VERY SERIOUS WARNING!~

DO NOT READ FURTHER IF WEAK IN HEART OR MIND!

Stop now and make your decision. Refunds are available on request.

Disclaimer of Methods

The predictions herein are produced using our radical linguistics method that has been in development and production since 1997. The data sets employed are a result of the data gathering begun in October of 2008.

Conventions employed in this interpretation.

Within this document, words or phrases that are enclosed within square brackets [example] are extracted from the data presented in its more raw form. Words, not delineated in other ways, and that surround such bracketed words or phrases are used to place the marked word/phrase in context. This is to say that there is a deliberate attempt to present the information in as coherent an essay format as is possible, given the complexity of the subject matter, and the process involved.

Disclaimer of the Extremes

The process employed to produce the ALTA reports seeks out emotional associations with words in common use on the internet. As a result of the nature of emotions, it is easier to find and identify such words that are associated with extremes of emotions. Thus there is an in-built artifact of our production that will always tend toward the most extreme ends of the emotional range. Further, it is easier to identify words associated with negative emotions than with positive emotional states, therefore, again, there is an in-built artifact within our processing which tends to focus on the more extremely negative range of words.

Disclaimer of status of knowing

This document presents forecasts of trends and predictions based on radical linguistics that are derived from a process of invention. This invention process is on-going, and self-transforming. This invention process is inherently flawed at so many levels that it discussion of the discrete problems is beyond the scope of this presentation. The reader is cautioned against the in-built process in humans to 'believe' the written word. The information presented herein is at best a very poor process of mapping the collective consensus reality and some small amount of the changes that it manifests. To restate this premise: it is our understanding here, that each viewing of the future, changes the future. Usually these changes manifest in unanticipated ways. Likely this is due to universe favoring 'surprise' as a method of keeping consciousness awake and slightly jittery.

To repeat this in other words:

Do not assume we know what we are doing in the presentation of this material.

Always discount the information presented as it has an in-built error toward the most extreme connotations available in language and trend interpretation. In yet more words, the information presented uses words that presume the worst-case for future manifestation of the collective consensus.

ALTA Disclaimer

The text of the last of our subscriber 'runs' is included in this presentation. The following disclaimer applies to all the text of this document, with special emphasis applied to the text of the ALTA reports.

Note that this report is offered for entertainment only. Any resemblance between the events portrayed in this report and any developing reality is purely coincidental and in no matter represents foreknowledge on the part of the authors of this report.

Note that the results presented herein are derived from humans expressing themselves on the internet. As such, emotional values and the words used to express these emotions are being sampled and interpreted here, not the future. Any resemblance between this report and future developments is entire in the mind of the perceiver and does not exist in reality. The Authors cannot be held liable for accuracy, or lack thereof, in this report. Authors cannot be held liable for human interpretation of this report nor any action any human takes as a result of this report. Any human foolish enough to alter their behavior based on this entertainment only analysis demonstrate themselves incapable of rational appreciation of reality, and the Authors are explicitly held harmless and blameless for any and all such mental aberrations on the part of the reader.

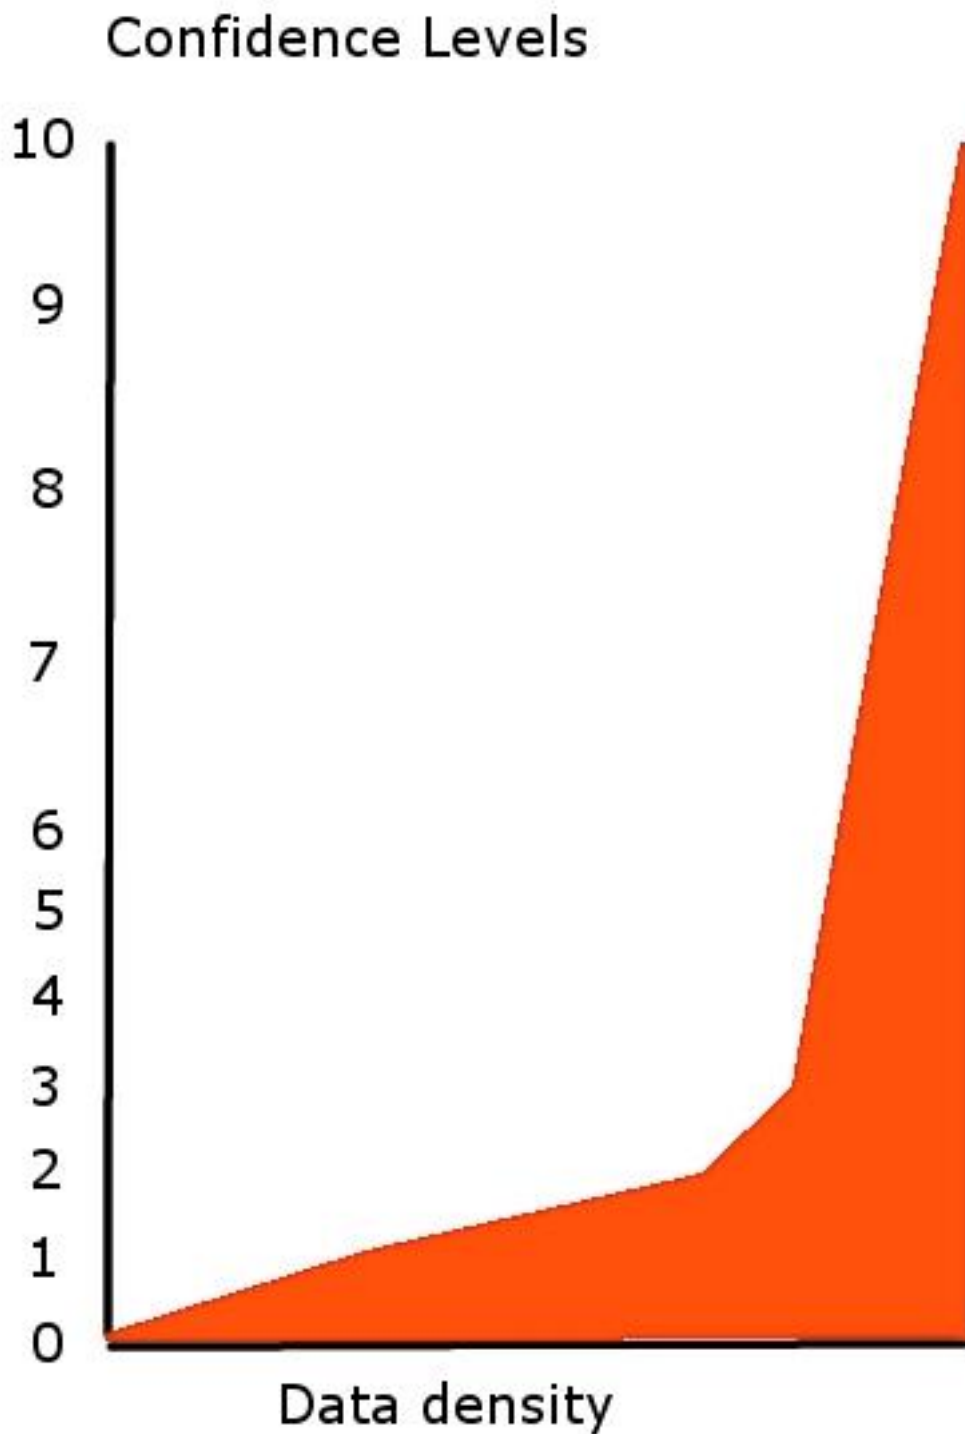

Meta Data – Confidence levels & Tension Levels

The issues of our working methods, and their assumptions and assertions will become pertinent over these next few months. Our data processing and subsequent interpretation works by coalescing vast numbers of linguistic inputs (words/phrases) into groups (fuzzy set methods employed with prolog programming language) in order to use set mathematics to extract linguistic archetypes. In other words, we concentrate words around basic, pan cultural concepts and work ‘down’ from there. We express our confidence levels internally here at HPH from the level of 10/ten down to 0/zero. The layout of the linguistic structures against our confidence levels is expressed in the graphic below.

Confidence Levels

10	Archetype Descriptor
9	Primary supporting aspect/attribute set descriptor
8	Secondary support sets
7	Tertiary support sets
6	Cross link (inter entity) descriptors
5	Cross links (intra entity)
4	Detail aspect/attribute sets supporting primary
3	Secondary support aspect/attributes
2	Details layer 1/One
1	Details
0	

The confidence levels also can be used as an approximation of the level of actual linguistic and emotional ‘mass’ composing each layer as is shown in the graphic below that indicates the data density at each level.

As will be noted, our methods provide the highest degree of confidence at the broadest level of 'theme' or 'context', but that this is also the thinnest

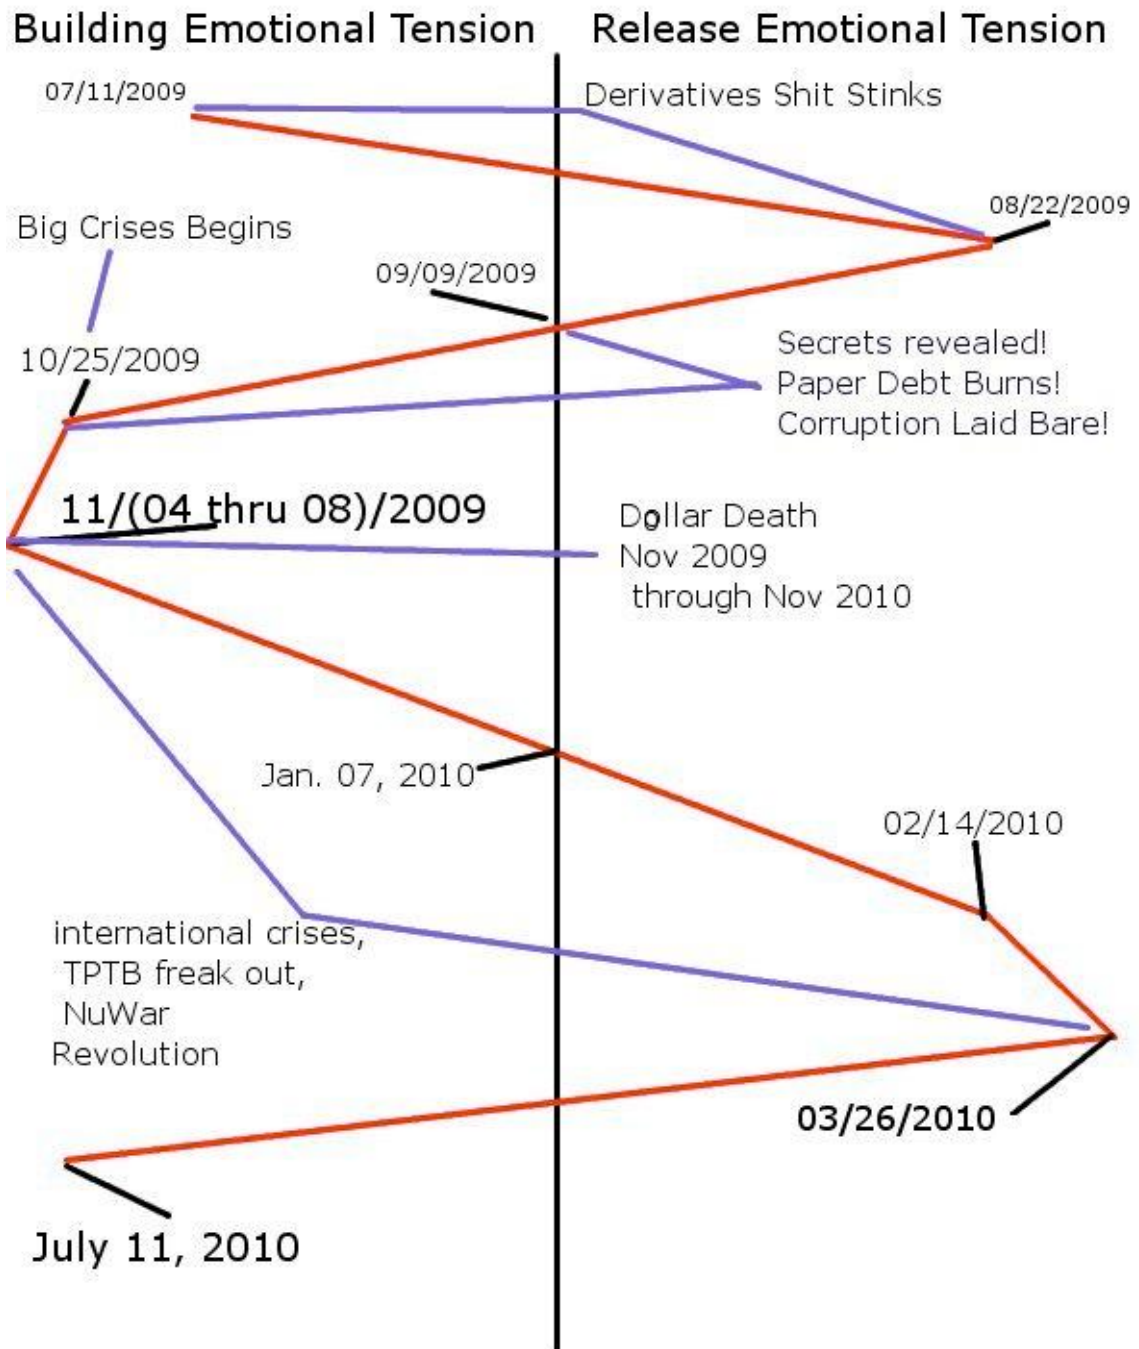

level of the data density spread. This explains how we can be very accurate both in timing and in the general theme and still nearly completely miss details. Or, if we 'get lucky' in the interpretation, and get the right detail sets from the deepest layers of the data base, we can also be spectacularly correct in even the most minor detail. It is a function of the density of the details in support of the larger context opposed to the time and personal energy and skill that we have available for any given interpretation.

It can be expected under such a method that our broad themes, and even timing clues (a separate subject not cover here), may be very accurate indeed, but not in quite the way anticipated by the details that we happen to select in the interpretative process. This precept needs to be clearly understood, and continuously seated firmly in mind before proceeding further into this report due to the material that is presented.

Just as a reminder, the closer to the detail level, the greater the ambiguity of language will impact our interpretation of the forecast provided by the linguistic shifts.

Anticipated Temporal Markers:

The graphic below uses the red line to represent the swings between the Building Emotional Tension values or state, and the Release of Emotional Tension values. Note that the center line represents an emotional neutral state, while the red line is the projected emotional tension values derived from our data. Key points in the next year have been indicated. The annotations are associated with time using the light purple lines.

Markets – Minions Shudder

As the Markets entity is progressed through the Summer of 2009, the data sets forecasting a [cracking] in the [happy speak] {ed note: detailed in 709, 909, and 1309} for this period are being backed by emerging circumstances. Noting the recent theft of [trading secrets] at the core of the banksters cabal, Goldman Sachs, it would seem that universe is providing for several possible ways for the other forecast for this period, that is [derivatives as giant steaming stinking piles of excrement] to be [exposed (as) worthless], to become manifest. While we at HPH had our sights focused on the [collapse] of the [grain stocks] globally, and specifically on [bad news for (soy) beans], and other [commodity crops] that participate in the [interest rate/commodities options formulas] for [derivatives], universe provides the [secrets revealed] meta data layer with manifest support in the form of the theft of source code from GS. This may yet prove a larger impact on the [derivatives markets] than might at first be apparent.

Our forecast for this last year and a half for Summer of 2009, is that the [happy speak] would start to crumble in August due to the [derivatives problems] occurring between the 15th of July and the 16th of August (inclusive). While not particularly [visible] as they manifest, the [derivative problems] are nonetheless forecast to cause episodes of [confidence wavering] in late August through September. The [shattering (of) illusions] {ed note: the forecast [paradigm shift] into a realization, at least within the USofA, that [recovery] for the bank based economy is/was an illusion} of late Summer and very early Fall is forecast as being a [stepping stone] or [precursor stage] of the [October currency/commodities crises] that will in their turn propel the [November international crises].

The data sets are continuing to build support under this general picture of a [derivatives lock-up] followed by a [dip/drop] in [public confidence] in the [global banking system]. The data actually points to [2/two] events of [confidence loss] in the immediate future of late August of 2009, and then again in very late September that continues to grow over all of October and then into crisis mode in early November. The November 2009 [confidence crisis] is centered on the [dollar as global reserve] {ed note: in the midst of global international crisis at the [military], [pharmaceutical revolution], and [disease] levels.}. The first of these [confidence crises], although it is [derivative] focused, will also [spark] the next phase of the [dollar woes/problems] besetting the [markets].

As the planetary [bankster system] reels under the [collapsing roof beams (of their infrastructure)] over the month of [derivatives lock-up], the [political elite] globally, but with special emphasis on the [usofa], will also start to exhibit [fear sweats] in [public] {ed note: likely teevee/video} due to the [secrets revealed] of their [intimate/illegal/criminal/immoral corrupt links (to the banksters)].

As the Markets entity is progressed through August with modelspace, the cross links forming between the Markets entity, sub sets [corruption] and [banks] and the [banks] sub set in the PopulaceUSofA entity, starts shifting over to support for a lexical set headed by the descriptor of [lock down]. This descriptor is also active within the [derivatives nightmare (from the banks point of view)], however by late in Summer, and into early Fall, the [lockdown] sub set within the [banks] sub set in Markets reaches levels larger than seen in the [derivatives] sub set. Further the [lock down] sub set in the Markets entity is connected to the Populace/USofA entity where it terminates in the [banks], and perhaps more surprisingly in [local (federal) government offices]. In both cases the [lockdown] sub set within the Populace/USofA entity is also supported by aspect/attribute sets for [disease], [pharmaceuticals], and both of these levels of support are dominated by [revolution] with specific sub sets of [refusal]. A reasonable interpretation is for some form of not so subtle ‘threat’ to be ‘leaked’ by TPTB or more likely their [political minions], in which [access to money/banking] would be suggested to be [at risk] without [forced medicines]. The detail layers (admittedly the most unreliable of our data sets) would suggest that the [political elite] would [shut down/lock down] the ability to have [public access] to such things as [banks] without [proof of vaccine]. Noting how absurdly impractical such a tactic would actually prove itself upon implementation, nonetheless the linguistic structures are pointing to the [threat] of such a [lock down of public access] as yet another tool of the [political elites].

Parallel to the above sets, and also beginning in late August the Markets entity suggests [difficult times] for the [pharmaceutical industry] within the [developed portions] of the planet. The data accretion patterns in support of these archetypes are all being dominated by [revolution]. These sets include aspect/attributes at the secondary level of support which go toward [refuseniks] or [persons who (make a point) of refusing ‘medicines’]. Further the [refusal revolution] relative to the [swine flu] sub sets have extensive cross links over to the TPTB where they are terminating in the

bespoke [fear] sub set. These cross links also contain details suggesting that TPTB will [feel afraid] at the [magnitude] and [ferocity] of the [refusal wave] from the [global populace] in relation to the [swine flu 'vaccine/medicine']. Some of the [presumed (more) compliant] populations will be among the [first] and [loudest] in their [protests], as the [campaign] is indicated to [be polluted] by [language (around the planet)] this Summer (northern hemisphere). So the data sets are forecasting that in spite of the [awareness of increasing lethality] of the virus, the [populace] in the [northern areas (of the EU, including Britain), Canada, USofA] will [revolt] over [forced vaccinations] of their [children] or [themselves]. There are supporting aspect/attribute sets that, at the detail level, suggest such a large percentage of the populace will go into this with [stubborn non compliance] as their [mind set], that the TPTB will be [shocked] by the [response to their strategy]. Further sets support the idea of [shills] or ['good citizens promoting official policy] on even the most controlled of official media outlets will be [skinned (metaphorically) alive] while [on air] by [refuseniks]. These sets are pointing to this [refusenik revolution] as a prime and proximate cause of the [pharmaceuticals crises (within the markets)] over Fall. The damage is not limited to [big pharma] as the [backlash] will also [settle upon] the [propaganda media]. The rise of the [refusenik movement] will produce the first of the forecast [shudders] to go through the [collective minion mass] as it begins to occur to a few of their brighter members that perhaps TPTB are not as [powerful] and [all seeing] as [claimed].

As the modelspace is progressed through the Fall 2009, into October, the 'back story' on the [derivatives] will once again heat up emotionally as the data indicates that [banksters] and [promoters/sales men] involved in some of the [derivatives destruction (of wealth)] over Summer will become [very anxious] about their [health] and [lives]. The data suggests that [targeted assassinations] will begin to become [visible] to the [aware observer (including some of the intended victims)] as [patterns (of) strange deaths] will emerge in some very [rarified (and) elite 'professions']. The data sets suggest that among some of the [early victims] of this [new war (against financial enemies)] will include the [sales staff/people] who were involved in the [float up/creation] of the [derivatives bubbles] over these last 20/twenty years. The data sets accrue in patterns that suggest that [visibility] of these [patterned targeted killings] will *not be very high, and that most will be [reported (with a) cover story]. However, there are indications within detail layers that [several (plural, quantity unknown) intended victims] will

[go rabbit] and successfully evade] their [planned untimely deaths]. This area is also extensively cross linked over to the TPTB where it terminates in bespoke [fear], likely that some of these [agents] will have [proof of perfidy/treachery] in their [possession] as they [go rabbit/flee]. This area is also indicated as a longer term (45/forty-five days out to 5/five months) temporal indicator in the form of a series of interrelated events for the next phase of the [devaluation of the dollar]. These [targeted assassinations] are also indicated to act as markers for [attacks (on the) press] including several in [public spaces] in which [‘off duty’ teevee personalities] will be [challenged] by the [public]. The data sets indicate that these [celebrity press faces] will not do so well with these [public challenges].

The [devaluation/death of the dollar], in spite of all the verbiage appearing globally, is indicated to take the Markets, as well as the Populace/USofA, by [surprise]. The data indicates that this is due to the [epic/monumental] level of the events involved. The idea is that even knowing it is coming will NOT prevent the [observer] from [reeling from shock] as the [sheer magnitude] of the [events (involved)] unfold.

The cross links over to the Populace/USofA and the GlobalPop entities indicate that the Markets will, at first, not quite grasp what is occurring {ed note: on or around September 14th through to the equinox on the 21st}. The Markets entity contains data sets for [stupefaction], and [paralysis], and [lock down], and [failure (collapse)]. These aspect/attribute sets are in general supporting the whole of the Markets entity, but by late October will have very specific impacts on ALL international [trading methods] including [commodities], and [currencies], and even [energies].

As the [dollar death] is indicated to proceed in parallel with the [developing international crises] of Fall, it also is indicated to produce [bifurcated markets] within most of the [developed parts of the planet]. The concept being described is [gray/black markets] and [official markets]. Further the [official markets] will be examples of [extreme bifurcation] as they will be exhibiting both [crushing deflation] and the start of the [hyper inflation] that is still being forecast as yielding nominal prices of [silver] in USDollars in excess of [\$600 per ounce] in 2010. Further the [hyperinflation] is being described as [curtailing] the [cheap energy] that used to be used to [heat homes] in the north, and [cool] in the south. The expectation from the [hyperinflation] component of the [dollar death (as global reserve currency)] within the newly arrived supporting aspect/attributes is [several multiples]

of [base costs] will be felt in the [heating and cooling] of [homes] in Winter 2009/2010.. The language is a bit dense, but the impression from the detail layers would lead to an understanding of several [hundreds of percents] increases in basic costs for [energy] to arrive by a combination of the [hyperinflation], as well as the [deflation] over the next few [fiscal quarters]. The [deflation] is expected to hit the [home maintenance *(heating/cooling)] at several levels, including [reductions in monetary velocity], and [hoarding (reductions in supply)] of basic [commodities] {ed note: such as diesel fuel} necessary for the production of ['down stream' power]. Further problems will beset the [housing markets] as the [deflation] coincides with [rising basic costs] such that [housing (and commercial real estate) values] begin a very large drop. The values being indicated are staggering and difficult to comprehend as the data sets point toward a [far greater than half (50%/fifty percent) drop] in [property values] over these next few [fiscal quarters]. The [reduction in property values] is described in language so extreme that the [emotional impact] of the [plunging property values] will [prompt] the [local legislative bodies] to [publicly consider/propose] the [taxation of churches (in the USofA) (as commercial, income producing property)] as the [local tax base crumbles] to what will be described as [woefully inadequate].

It will be this next phase of [dollar devaluation] that is indicated to [crush] the [local councils/governments] under [excessive mandated spending] and the [total failure (of the local) tax base]. This area of the Markets entity is very extensively cross linked over to the GlobalPop and the Populace/USofA entities where the termination points are within the [revolution] meta data dominated data sets. The cross links from Markets entity over to [revolution] dominated data sets ramps up beginning around November 5th 2009, and grows steadily as modelspace is moved through to mid year 2010.

In the very early stages of the [hyperinflation] the Markets entity is suggesting that [food] and [energy] firms will produce a great deal of [talk/hype] within the [structure (and propaganda)] supporting the markets [trading paper debt] in general. Further the [excessive promotion (of food companies)] as the 'savior' of the [future of the markets] will be a very very good temporal marker for the next [step downward] on the rush toward [international market (trading ability) collapse]. Again, the data sets are pointing to yet more interrelated supporting threads that will assist in propelling the [dollar death/collapse] into the [public consciousness] at nearly global levels of awareness through the last of 2009 and most of 2010.

Within the chaos of the detail layers that accrete to the various entities over Fall and Winter, and then early Spring 2010, the [hyperinflation] data sets add large amounts to the emotional tension release values. Not only are these release values showing up under [new war] (see GlobalPop, and Populace/USofA), but also under the [planned decrease (in population numbers –by TPTB)]. Apparently the [release] of the [swine flu/new disease] is but a single component of a [multiple part strategy]. The data within the Markets entity suggests that very large [manipulations] of the [global food futures] markets will be accompanying (and slightly preceding) the [hyperinflation] of the [USofA dollar]. This is thought, according to the cross links, to [prepare] for the [starvation death] of [tens of millions (directly)] while also [preparing] the [victim populations] for [eradication (by) disease] due to [weakened states] as a result of [inadequate food supplies]. The data sets confirm the [strategy], and to some extent the effectiveness of the [population reduction program], but not the end [goal] according to TPTB. Instead, the primary supporting levels for the [decrease of populace] descriptor goes to [failure], and [prompted/promoted/propelled revenge attacks]. There are some significant holes in the [strategy] of TPTB and their [callous minions (slaves)] that do not bear noting here, however suffice it to say that [awareness] or [conscious knowledge] of the [plans/strategies] is already [in place] such that the [attempt] actually will [produce the proof] that will [motivate millions] within the [global populace] to [rebel], and [seek death (of TPTB and their minions)]. It would appear from the Markets entity alone that the [horrific conditions/stories] that [flood] the [internet] {ed note: from Africa and the Caribbean} later in Fall and Winter, and especially in early Spring of 2010, will [shatter] all levels of [understanding (about the) benign dictatorship of TPTB]. This last includes very large sums of emotional building tension that will dominate events here on earth and especially within the abstractions of the ‘money’ markets, from late March 2010, through to mid July 2010 with great [intensity]. It would appear that the [new wars], and the [burning/fires] of late 2009 (see GlobalPop below), and the [disease crises] will provide such new levels of emotional tensions within the populace as a planetary whole as to [rupture] the [old paradigm] and to [pull (the) populace] into [active revolution/war] over the course of the last 3/three quarters of 2010. There are extensive cross links from the Markets entity over to the Populace/USofA entity which point to the [horrific imagery (of the starvation deaths)] as temporal markers for the [release of the Sirius poems (against TPTB)] later in 2010. At that time the [dog poet/canine lyricist] will have [visibility] both by [gestures],

and [tones], and will be [visible] to the aware observer. There are some signs that [visibility] within the [global media stream (independent reporting)] will provide [glimpses] of the [poems/language] of the [dog poet] in late July of 2010. Then the [mythic] and [mystic] nature of this form of [revenge attack] will take a [vacation], and will once again emerge in September of 2010 with the [release of prisoners] of [conscience] by TPTB in apparent [direct response] to a [threat] to yet again [unleash the dogs] against TPTB.

As the Markets entity is not the expected area of the emotional resurgence of the [dog poet], the data was carefully analyzed yet twice more “just to be sure” before preparing this report. While there are a great many reasons for the [dog poet] references to be placed in either the Populace/USofA entity or the GlobalPop, or even the TPTB (The Powers That Be) entity, we choose to leave this discussion at the Markets level as it represents the [first point of contact] between TPTB and the [downgoing (of the) dog poet].

Please Note: the whole [dog poet] language area is being reported in as full and meaningful a manner as possible without providing more light than is needed to observe just the bare outline of events. We like dogs here at HPH and other than wishing to claim status for foresight of these strange and ‘toothy’ events by providing specific words that will later resonate for the aware observer as the events begin to unfold around us all, we do not see any reason to provide more than just the ‘hair of the dog’ at this time. Please note the language used is very carefully chosen after a lot of debate internally and careful examination for any possible damage the words and phrases might cause. We are sanguine about the choices made. These words will be enough for the aware observer to note (at that future time) that “those bastards at HPH *were correct after all”, without placing the ‘dog poet’ at any particular risk.

Please note: the data sets in all the entities where pertinent including Markets, Populace/USofA, GlobalPop, and TPTB entities, the data sets are clearly forecasting a massive, global hyperinflation in the prices (especially in dollars, but not limited to that currency) for foods of all kinds. Please note that this [hyperinflation] of [food prices] will be composed of several pressure waves including the [dollar death], and the issues noted in the discussions below. As the material is presented here, each of the pressures that will create the [food crisis] over these coming years are presented individually, however, this is only for the purposed of discussion, and these pressures will all be active simultaneously (more or less). It will be not

ONLY or MERELY necessary to store food, but to also devise methods for producing foods locally, and under very adverse circumstances.

Inventiveness, and resource awareness will be key elements in this next phase of the planetary humanity move into this next decade.

GlobalPop – 2010 - World(s) Up Ended

Prelude: Orchestra tunes up...

Our data sets are continuing to rhyme with clues in manifesting reality that are forecasting a [new war] this coming [fall/2009(September 21->)]. This [new war] sub set is complex, and very convoluted. At a primary level, the [new war] is totally dominated by cross links from TPTB (the Powers that Be) entity. At the secondary level of support, this is also true, with extra support coming in from the Markets entity. It is not until the tertiary level of support is reached that differentiation within the mass of data sets provides a view of developing threads or trends.

The [new war] arriving this Fall (2009) is clearly, at its core or primary level, a [war] between the [TPTB] and the rest of [humanity]. The data sets are explicitly clear that the [combination (of manifesting circumstances)] will be going toward the end of [planetary population level reductions]. In all levels of our interpretation of the data, this same theme appears in the top level descriptors within all the supporting aspect/attribute sets.

The [war against humanity] is to be [engaged] over the course of [fall]. Actually our data sets show that ‘events’ that will set the stage for the [new war] will emerge over very late Summer 2009, which is to say from about August 16th onward, with a ramp up in frequency of [manifesting circumstances /events] in late September, and then yet another large jump up in late October which leads to the ‘full on’ rush of [disturbing/unsettling events] that will seemingly [fill the year] from November 5th. 2009 through to November 2, 2010.

The [new war] data sets include the [assault (by subterfuge)] on the ‘fronts’ of [disease] as well as the [collapse (due to dollar death)] of the [sophisticated health care systems] in place in the ‘developed’ world. The [new war] will be influenced by the [unknown energies from space], as well as the [spectacular emergence] of the themes we have had in the data for some years under the descriptor of [alien wars]. Additional emotional tensions will be arriving from both [global legislative initiatives], as well as

the first [visible] signs of [organized (and effective)] resistance to TPTB. The [new war] will also involve [extremes (in) propaganda], especially in the [usofa] and [britain], and [france].

The [new war] sub sets also include a conjunction of sets of [press] and [legislative] and [disease] that suggests the [minion classes (aka politicians)] at some level globally will [attempt] to [imprison] those persons who will be [declared (by law)] to be [dangers (to the public)] due to their [expressions] against [forced medical procedures]. The data suggests that [laws] will be [proposed], though not necessarily enacted, which will make it a [crime] to [refuse a medical procedure], or to [speak/advocate (refusal) of medical procedures]. The reason used for the [promulgation (globally)] of these laws will be cited as [public safety].

There are several interpretations for the data sets forecasting the emerging reality of [new war (against) humans] this Fall. These interpretations are not mutually exclusive, and given how manifesting circumstances usually develop, it would not be surprising to find a blend of these interpretations actually emerge.

Act One:

Interpretation number 1/one for [new war] in which the [zionist forces (alliance)] will [attack] the [persia/iran national infrastructure]. These data sets have had a descriptor labeled the [israeli mistake] for several years. This data set includes supporting aspect/attribute sets that have maintained for several years that the [attacking forces] will be [surprised/startled/shocked] at the [reception] that meets their [intrusion]. This [attack/intrusion] is described as taking losses that are [greater than half] within the first [few minutes] of the [war]. The [attack] is [met/received] in a [manner/fashion/tactic] that is described as [beyond imagination].

Unfortunately, the [zionist attackers] will continue in their [assault] that will result in a [mistake] of truly global ramifications. The [air assault] (including [drones/missiles]) will be able to get to a [tertiary target] and will [unknowingly] launch an [attack] on this [3rd/third level] target, further described as a [crop yielding field], that will result in a giant [mistake]. The data sets describe the [assault] as [producing] a [volcano of ash death] from the [storage facilities] under the [field]. This [volcano of ash] is described as [spewing forth] for [weeks].

The [ash death] is described as being so [radioactive] a [material] that a single [dust mote] being [inhaled] will produce [violent death (through) anal/internal bleeding] and [bleeding from the mucus membranes]. This [death form] has aspect/attribute sets in support of [death dancing] in which the [afflicted] die so [painfully] that their [last hours] are spent [writhing] as their [bodies (enter into/are consumed by) corruption/internal rot] and distorted by the [internal coagulation].

Not to put too fine a point on it, and actually anticipating being wrong, nonetheless, the data accretion patterns forecast an [attack] at a [fluid storage facility] in Iran, likely [underground] which produces the [radioactive eruption] of [particulate matter] so fine as to be [carried on the jet stream]. This [river of radioactive death] is described as [rounding/traveling around the planet] for [9/nine times] before essentially being [exhausted]. Within the first time around the planet, the supporting aspect/attribute sets are forecasting that [200/two hundred millions] will [perish/die]. These [deaths] will begin in [india] and continue across the breadth of [south east asia], and then go up across the [sea of japan] and the [eastern coast] of [siberia]. The [death laden airs] are then propelled across the [ice straits] over to [alaska], and then down the [west coast] of North America. The supporting sets are indicating that [2.2 (two point two) millions] will [die] on the [west coast] of the USofA within this [first pass] of the [radioactive jet stream]. The [deaths by inhalation] then proceeds across the American [south west] and then *either (status still unclear) proceeds diagonally across the continent and exits in the [north east], *or the [jet stream] will [layer particulate death] across the [south] and then turn to progress up the [eastern sea coast] of the USofA. It exits the North American continent in [far northern canada], and then skirts the [arctic circle] to come down over the Faroe Islands, [greenland], [scotland], and into [europe]. At this point the data suggests that the [jet stream] is [bifurcated] with a smaller [diversion] or [creek (of the) jet stream] which heads into [russia and china] after crossing the [french and suisse alps], while the main, and larger mass of the [jet stream] crosses down over Europe and then turns along the [north african coast] to once again cross the [middle east] and head back toward the [still smoldering (and) radioactive ruins] in [iran].

Then the still [death laden] jet stream starts back and repeats this process for an additional [8/eight] passes for a total of [9/nine] times around the planet. The data suggests that [200/two hundred millions] will [die] directly from [inhalation death], but that is not the true horror of the situation. The

resulting [poisoning] of the [bread baskets] and [food producing regions] of the [northern hemisphere] by this [jet stream of particulate death] will contribute to a [planetary famine] that will exceed anything that imagination may conjure up. The whole of the [planetary food body] will be [disturbed], and [destroyed (in large regions)]. The [farming of livestock] will cease in the first [3/three months] of the [passing death streams] as it becomes known that [food animals] are themselves [polluted] by [radioactive death]. This change forces most of the formerly [developed countries] to go to [vegan diets], though by that point it will be too late for over [1/one billion] people who will already have consumed [contaminated flesh]. It is actually this wave of a [billion dying] and the [food crises] that drives the next emotional wave of [secrets revealed] and [revolution] which results in extreme [human on human] violence as [revenge] against [priests] and [bloodline freaks (aka monarchists and bilderbergers)] leads to the [planetary pogrom].

In attempting to validate the impression being presented by the data, we will examine the entities involved from differing directions within the data sets. In doing so with the GlobalPop entity, specifically for the Spring and Summer of 2010, the view is not encouraging. The data set that is the dominant aspect/attribute set when considered from total emotional value sums is headed by the descriptor of [winds], and further the primary support and modifier for this data set is [extremely high altitude] which again would be yet another way of describing the [jet stream]. As we examine from yet other perspectives such as the sums of all the cross links by layer of support, the data yet again presents a dominance for [winds], though with the inclusion of the SpaceGoatFarts entity, this sum for [winds] is almost equaled by [unknown energies from space]. In the secondary support position for both views of [winds] as a sub set, the dominant aspect/attribute sets are headed by [strong] and [storms], and [wrecks (marine)] and [wrecks/destruction (terran/land based)], and [harm (to people) from [wild winds] and [contained/carried (by) winds]]. Further this area also contains tertiary support from [dangerous conditions], and [death (by) disease]]. {ed note: separate from the 'swine flu disease' sub set or the [disease from destruction (of) health care (by dollar death)]}. At lower levels of support, the linguistic sets are dominated by [small particles] or [impact (of winds) through (what is) small].

In the years following 2009, the data sets are forecasting that as a direct consequence of the [ash death], the [food chain] or [food body] for the [planet] is [disrupted]. The [global famines] which manifest cause a truly

[massive (or epic)] level of [diaspora]. This area has internal cross links to sub sets for [flames], and [fires] over to the Populace/USofA entity, and the Terra entity. Some of these sets, especially when taken in conjunction with the [change events] sub sets in the Terra entity, suggest that [200/two hundred millions] of the north American [populace] will become [refugees] moving [north] into [Canada]. Much of the language in the Terra entity suggest that it will be a [rush (to get above the) 50th parallel of latitude]. There are a number of pressures for this [diaspora] north, including famine, war, and planetary upheaval.

Please Note: there exist several alternate interpretations for the data as it is being presented by the GlobalPop entity. It could be a case of [cuban missile crisis linguistics] as is discussed below. It could also be a case of deliberate memering by TPTB in order both gain acceptance of an Israeli/American strike on Iran, as well as to promote the [fear] of the same {ed note: fear as a tool in their efforts at global control}. These linguistics could also be indicating exactly as the data suggests at a primary level, that is [israeli war with iran], but that the detail layers used are NOT applicable to the actual outcome and at best only represent a potential of probability which cannot be accurately judged. This last is the 'fogs of war' issue. That is to say, that a war could be instigated by zionist forces, and from there on the data we have does show up within the language that will ultimately be used to describe the events of this war, but not in the order, nor outcome that has been selected from our data sets. Hmmm... yes these are weasel words, partially as we here at HPH have a very difficult time accepting that the zionists actually will murder yet more millions, and partially as the detail layers of data under the primary linguistics are both huge in size and very hot emotionally which increases the chances that the forecast is incorrect. That is to say, that the sheer amount of language showing up around this concept makes it particularly difficult to extract meaningful examples without receiving a false picture. Again, the data sets are massive, and the spread of language within the data is also large, so the 'odds' increase on the size of the set, that the finite examples that we have time and energy to view will be the "right/correct" sub set from which to interpret. A very lengthy way of saying that there is a probability of some significance that we have gotten this wrong. If ever there was a set we hope to get wrong, this is it.

However, if we are not wrong, or are only inaccurate in some respects, the outcome will increase the problems facing terran humanity over these next few years.

Act One: Alternate Opening

Interpretation number 2/two for [new war] in Fall of 2009 involves the [staged release] of the 'swine flu' this past Spring, and its rapid mutation over Summer (northern hemisphere). As the [virus] has moved extensively into the Southern hemisphere, and is already showing increased [impact] and [lethality], this particular interpretation is seemingly gaining support from universe on a daily basis.

Within this interpretation, the [zionist] war against [iran] is *only a [propaganda campaign] designed to [distract] the [populace] from the actions of the TPTB in their [assault (on the population of earth)] by [disease]. The idea coming from the data sets in this interpretation still acknowledges the [particulate (material)] in the [jet stream], as well as the [pan planetary movement] of the [death] from the [high winds], though the [minute particles] in this interpretation are the [virus lifeforms] rather than [radioactive dust]. In this scenario the [immanent threat], and [palpable fear] created by the [public threats of zionist nuclear eradication] of Iran are used to [raise the fear] levels within the [planetary populace]. This [fear mongering] around [nuclear war] is a deliberate tactic of TPTB in their [effort/plan] to [force or trick] the [populace] into taking the 'vaccines' against the [lesser (slightly) threat] of [deadly disease]. The rationale in this interpretation is that the [brinkmanship] of the [nuclear war threat (between zionists (Israel and slave state USofA))] will act as both a [distraction] from the [disease tactics], and to [augment] the general level of [fear] within the [populace] in an [attempt] to [panic] the more [mind controlled] of the [populace] into [accepting TPTB control (vaccine)].

Within this second alternative the data sets of [winds] are *still seen as the [carrier] for [death] in the form of [millions of small particles], albeit in the form of [air born particulate viral cells]. Again, in this interpretation, the [winds (very high altitude)] still are seen as [raining death] for [9/nine passes (around the planet)]. Again, in this interpretation, the [death (from the) winds] causes both [populace deaths] as well as [contamination] of the [animals (used for) food].

In this latter instance, the language around the [fires] and [burning] is still applicable in several forms. As an example the [burning (as death cause)] is now related to [lung collapse (due to viral infection)] rather than [radioactive dust]. A further example is the [fires] and [burning (of) food] still persists

only in this form the [burning] is of [animals] believed to be [carriers] or [contaminated] by the [viral diseases]. Soooo....yet another interpretation for the high confidence values of the descriptor sets and primary supporting layers going to [winds] and [high winds (bring death) 9/nine times (around the) earth].

The movement of the GlobalPop entity along with modelspace through the Fall of 2009 shows accretion patterns of aspect/attributes in support of the [disease (attacks/assaults)] *even if the [zionists wage war on Iran]. However we note that within the detail layers there exist linguistic sets which could provide yet another component to the whole [emotional release/tension trauma] that is Fall, 2009. These data sets could be interpreted as forecasting that the [israeli mistake] will not only cause [national grief] in [israel] as the [zionist armies] are [crushed] by [worldwide/global opposition], but also that the [mistake] of the [zionists] in their [attack] on Iran causes a [reverberation] within [TPTB(the powers that be)] and within the [minion class]. These data sets being interpreted are, in the main, participating in the meta data layers of [duality], and [revolution], as well as [transformation]. These data layers provide hints that a [backlash] against TPTB as a direct [consequence] of the [israeli mistake] might occur due to the [cowardice] of their [minions] who, when faced with [mob action /violence/incarceration/death/disemboweling], are described as [recanting innocence], and [claiming duress (by TPTB)]. In essence the data sets are pointing to a period (likely mid to late 2010, past the Summer solstice) when [numbers] of the [minion class/political elite] will actually [name] their [masters] in order to [avoid consequences].

Noting that our data sets have in-built bias toward negative extremes, it is nonetheless pertinent that the data sets are suggesting that [giant/huge mansions/palaces] will be among the many instances of the [fires] that will [burn 2010]. The examples provided within the detail layers of the data suggest that the [TPTB] and their [upper level minions/political elites] will, along with their (mostly) innocent [families] be [consumed] by [fires] that will be [fueled] by [mob rage] and [furniture] and [wax/volatile compounds]. These [death by fire] incidents within the data sets, especially late in 2010 and 2011, when the [revolution] meta data layer rises to total dominance of the entity, are described as being [initiated] or [caused] by what will be labeled as [sticky balls]. These [sticky balls] are described in the details as being concoctions of [wax], and [soaps] and [volatile compounds] which are all [balled (up) together] into a mess that will [stick] to [surfaces] when

[thrown]. The use of these [sticky balls (of) fiery death] is described within the data as being [2/two phase], in that first the [target] is [pelted] with [hundreds], and in some cases, [thousands] of these [sticky balls], and then a [source (of ignition)] is applied. This is but a single example of the detail layers suggesting that the [global populace] will be inventing [hundreds] of [new weapons] in their [successful war] against the [TPTB (the powers that be, or were)].

Act Two:

Without regard to which of the 2/two alternative forecasts actually will manifest, and also noting that reality will likely provide a blending of both, or some third alternative, the data sets are still showing the [global famines] at a primary support level in both the GlobalPop and Terra entities, and are independent of the [ash death], which is to say, they are forecast to occur without the extra burden of [radioactive foods]. The Terra entity contains a completely separate linguistic set for [global famine] which arrives not by the [vice of war/blood lust], but rather is indicated to be part of the [solar system stress] experienced these last decades. This separate [global grain crop failure] linguistic set is in support of the [global famines] sub set, and by way of a separate linguistic set of cross links, is also in support of the [cessation (of the) cultivation of flesh (for) food]. Following this linguistic set, the proximate 'cause' of the [cessation (of killing animals for) food] comes as a direct consequence of the [collapse (of the) grains plant stocks], which in its turn is supported by [climate shock], and [unknown energies from space], this last indicated by very extensive cross links over to the SpaceGoatFarts entity.

Both directly held and cross linked supporting aspect/attribute sets for [fires], and [flames] are to be found in the Terra entity which also will be contributing to the general 'fire' meme as Spring 2010 ends. Some of these 'earth generated' [fire incidents] will be [blamed] for the beginning of [famine] by the [power political elite], however, by that time the [credence] of the [minion class] will be all but lost excepting on those directly within [punishment] range. The data suggests that [rumors] at a planetary level will point to [deliberate burning] of [food] as yet another instance of [cruelty] and [slave control] by TPTB (under the 'explanation' that the [food was contaminated (by radioactive particles)] {ed note: IF the zionists actually do launch new war on Iran} or [viral contamination], and the display of this [casual attitude] to the [starvation deaths (of) millions] will spark yet more

instances of [revenge] merged with [revolution]. It is within this linguistic structure, and its cross links over to the GlobalPop entity, that the [burning] and [looting] of the [vatican/ palace of sorcerers] is forecast for late in 2011. The proximate cause of the [looting] will be [rumors] of a [large cache/stash] of [food]. The [food riots] are indicated to [throw fires] into the [guards/slaves] of the [vatican/ place of sorcerers], and then to [assault] the [barricaded doors]. Even though [thousands of people] will [die] in the [assault] the [doors] will be [breached], and the [inhabitants] of the [vatican] will either [successfully flee] or will be [caught] and [tortured and hung]. Some of the [sorcerers] will be [trapped/captured] and will later be [tried] in [public squares] for [crimes against humanity] including [food hoarding], and [food destruction]. These [priest trials] are shown by the growth of the aspect/attribute sets in support as being [prevalent] after a period of some [months (perhaps as many as 8/eight)]. The [trials] are to be [recorded] and later [stored] for the [re-education effort].

There are some indications of a [bloody battle] as a [minor delay] within the [looting of the sorcerer's palace (in the vatican)]. In this [bloody battle], the [faithful minions] and [priests] acting in [defense] of the [sorcerers] will produce [banned weapons] including [gas] and [burning fumes]. These will cause the [rioters] to initially [flee], providing the [defenders of the sorcerer's] some [relief] through the [first day] of the [fighting], but the [burning fumes] will so [scar] the [city], and [kill] so many of the [rioters] that [rage] will bring back a [determined crowd/mob] of [starving people] who will turn the [banned weapons back (upon)] the [defensive positions], and then [overrun] and [slaughter] the [priests/defenders] remaining.

The [burning fumes] descriptor set is replete with aspect/attributes going to the [scorching (of the) lungs] and the [peeling (of the) skin]. These [fumes] are apparently from [emitters] that are [worn/carried] as though a backpack. These [fume emitters] are further supported by descriptors going to [burned (from within) children], and [weak people (half starved)] who will [die] as they [watch their skin peel off]. Harsh for people merely wanting food. But of course, the data sets indicate that they (the rioting starved humans), will be *totally [ignorant/unaware] of just [what secrets] are being [defended so fiercely].

The data accretion patterns are also forecasting that it will be [slaves] from within the [vatican/sorcerer's place] who will [open] some [hidden doors] and [defeat] the [defenders] from the [rear].

Again it is necessary to note that the [vatican looting] is but a single instance of several examples of [prominent icons/symbols] of TPTB [power infrastructure] that are forecast to be [attacked] by [mobs]. Also, as with some of these other instances, a secondary wave of [emotional reactions] will stem from the [secrets revealed] by the [looting mobs] as the various [safes] and [hiding places] are [discovered and opened]. The [secrets revealed] meta data layer ties together both the Populace/USofA and its [looting of infrastructure] incidents with the GlobalPop entity and its looting of [TPTB] as each will produce yet-another-round of [perfidy] and [egregious crimes against humanity]. The data sets are pointing toward at least [2/two] such [riot/revolution looting] incidents within the USofA {ed note: Maryland has the largest number of associations with both instances} following the March 2010 release period peak. These instances are under longer term value descriptors and so are more likely later in 2010 {ed note: some data points suggest mid November 2010.}. In each of these cases, the resulting [secrets revealed] will participate directly in the [alien wars] theme becoming [manifest (at a planetary level)] in late 2010, or early 2011.

It is necessary to note that the [sacking of sorcerer city (the vatican)] is supported primarily by the [global famine] sub set, which has extensive support independent of the [new war (by the) zionists]. IF the data sets relating to the [zionist mistake (of attacking) iran] are a case of linguistic shadowing (see discussion on Cuban Missile Crisis below), the [sacking of the vatican] will nonetheless still be supported by 2/two very large linguistic trends relating to [global famine]. The proximate cause for the [sacking of the vatican] appears as [hunger/famine] at a tertiary and secondary level, and thus has a relatively high degree of confidence behind it.

Act Three:

As modelspace is progressed into 2010, and the [hyperinflation], and the [disease] lexical sets within both GlobalPop and Populace/USofA entities grow through Winter (2009/2010), the data sets indicate that many areas within what is called the 'developed world' will begin to experience [breakdowns] in the various [infrastructure systems] that provide for the [support (for the) social body]. These are indicated to include [power/electricity], [fuels (for heating)], [food deliveries], [repairs (to roads/et cetera)], as well as the [health care system], and even [public meetings].

The data indicates that [officialdom] will be [pronouncing] and [declaring] a series of [restrictions on movements], as well as the [official curtailment (of) public gatherings]. These [restrictions] will not be blanketing the various countries, but rather are indicated to be [implemented] in [specific] albeit, [hidden patterns]. The [officialdom] {ed note: especially within the USofA, and greater Britain} are indicated to [lay down (a) pattern] that they [hope] will [reduce revolution/revenge] issues by [dividing] the [habitat (of the) populace] into [no-go/travel restricted] [zones]. These [zones of control] will be the [first line of offense/suppression] for TPTB and their [political minions], however the data sets are clearly indicating that [nothing goes as planned] as regard to the [zones for control (of the populace)]. There are apparently [severe/crippling] issues that will arise for the [political elite/fascistas/corporate masters] in [all levels] of their [personnel (for control) structure]. Also, ironically, and even humorous at a universe level, the very [culture of corruption] that TPTB have created globally is indicated to cause their [control structures] to [fail] due to their [minions] actually [following/embracing] the ‘company motto’ of [‘get mine, screw the system’]. As the [zones of control] language rises within the entities over the course of Spring 2010, so do the [bribery], and the [‘fiddle’] lexical sets. These [breakdown] modifiers of [internal corruption (within the TPTB systems of oppression)] are indicated to reach a level of [critical mass] within only a few short [months] such that the [whole zonal control system] is indicated to be [cracking] and [ineffective] in less than [4/four months] of its existence.

As modelspace moves through 2010, the [zones of control] and [restrictions on movement/gathering] begin to [fade] as [issues/problems] for the [populace] just as the [populace] {ed note: special emphasis on the [bereaved] sub set} becomes [real threats] to TPTB and their [minion classes]. The data sets indicate that most of the [rage attacks] from the [populace] over the [crushing conditions] of [disease/death of children/family members (to the PTB flu)] and [economic chaos] and [infrastructure breakdowns] are initially focused on the [minion classes] {ed note: politicians and high ranking corporate people}, but there are also indications that a [cadre (of) old men] who [know (who is responsible)] begin to [respond/fight back] against the [ThePowersThatBe], with [specific families] being [targeted]. The data suggests that by mid Summer 2010, some [spectacular assassinations] will be [very visible], indeed, the supporting aspect/attributes provide for [visibility] so high as to [compel] TPTB to even [further restrictions/clamp downs] on [information], as well as

to [clean house] of their [own security services] as it would appear that the [Praetorian guard (top eschalon security staff)] will be involved in [several (more than 3/three)] attempted [palace coup de tat incidents]. Also at this time TPTB entity is indicating that some of TPTB will [seize the opportunity] to [take revenge] or [press their own positions forward] during the [general chaos] by [assassination] of their [rivals]. The data indicates that the [blood letting] and the [ferocity] of the [sophisticated (familial) assassinations] will [shock] the TPTB. The [shock] is indicated to be so [deep] that even organizations such as the [council for foreign relations] {ed note: CFR here in the USofA...known rat/bloodline freak hang out} will be [rendered/boiled down] with the ['fat'] coming to the [surface]. This area very much participates in the continued growth and rapidly rising [visibility] of the [alien wars] meme that seemingly reaches its most visible plateau in late 2011.

Populace/USofA – Secrets Revealed Propel Slave(s) Revolt

As the Populace/USofA entity is progressed along with modelspace into Fall of 2009, the rising to the dominant supporting aspect/attribute set is headed by the descriptor of [revolution]. This descriptor set is modified at the primary level by [incept], and [building/growing], and [eruptions/explosions]. Noting that the [eruptions/explosions] modifying aspect set is plural, and within its supporting sub sets at its primary level, this aspect contains repeated support layers that are themselves plural, and many contain specific bespoke references to [many/multiple/multitude], these aspect sets are likely forecasting multiple instances of [eruptions] and [explosions]. In the supporting sets, plurality dominates at all levels. Probably *not a good sign for TPTB.

The whole of the meta data layer of [revolution] is itself a supporting linguistic structure for the meta data layer of [secrets revealed]. As modelspace is progressed through the Summer of 2009, the [secrets revealed] meta data layer swells to near dominance in several entities including Populace/USofA, but also Markets, and SpaceGoatFarts, as well as GlobalPop, and the Press/Propaganda entity.

As the modelspace is progressed into November, from the initial [crises] development point of October 25th, 2009, some of the first signs of [growing revolt] will be an [unexplained (to the press) drop] in the Obama administration approval ratings. The [change/alteration] in [political stance]

and [support] will be much discussed within the [press] by the [political propagandists] albeit briefly. The [crises] rise in [visibility] in the global mediastream in early November will parallel the [unexplained] and [troubling reports] of [elite movements/travels]. There are indications both within the Populace/USofA entity, as well as the GlobalPop entity that [misdirection], and [obfuscation] of actual [movements/travel] of the [western world political elite] will be so prevalent as to itself [draw attention] to the phenomena of [jet travel marathons] amongst the [elite].

The level of [chaotic energies] involved in the [international crises] of Fall 2009 are carried forward into 2010 on several different linguistic structures. Of course, the [international crises] themselves move forward toward the [beginning (of) resolution] with the peak of the release of emotional tensions in late March, 2010, but also these [chaotic energies] and [frothing emotions] continue on at the level of [minions/government employees] as well as the [populace] as a whole. The [minion class/gov't employee class] specifically excludes the [political elite (petty people)]. While the [political elite] maintain their own degree of [emotional frothing] through all of 2010, it is very [personally] focused. In the main, this is *not true for the [minion class/civil servants]. This sub set of the Populace/USofA entity is supported at the primary level by [disruption/dissolution] of the [bonds] and [boundaries] which link the [minions] to their [masters]. The imagery coming up from the detail layers of these sets paints pictures of [good people (within the minion class)] who [impact (the) realization wall/shock] about how they have been [personally deceived], and the [bonds (imposing) silence] are [torn apart]. The [realization (of being) dupes/duped/fooled] is indicated to take a [terrible toll] on many of the [minion class], some of whom are indicated to [take drastic actions] in attempts to [shake off] the [crushing burden] of [shame (for being dupes)]. These sub sets of the [chaotic energies] are dominated by the [secrets revealed] meta data layers, and are also in their turn, part of the supporting sets for the increase in the [secrets revealed] meta data layer later in 2010. This feed-back loop effect of [secrets revealed] prompting [defections] amongst the [disillusioned/shamed minions] should be visible by July of 2010.

The [defections] amongst the [minion classes] will produce a number of [sayings/tellings] of [detailed perfidy/crimes] that will be [confessed to] in order to [implicate TPTB] as the [minion class defectors] begin to [cleanse themselves] of their [corruption]. This process is indicated to proceed for [several years (over 3/three)]. As the [minion class] goes through first the

[economic disintegration] and then the [corporate bankruptcy (shutdown)] waves beginning in earnest in late August 2009, the [defections] and then the [whistleblowing] will form a feedback loop that will further reinforce the [secrets revealed] meta data layer. The longer term data sets within the supporting aspect/attributes contain descriptors pointing to an [emergency effort] to get a [law/legal basis for suppression] in place within the USofA over Winter of 2009/2010 in which it would be made [punishable] to [criticize] either an [agency (of the government)] or any [individual] working for the [government]. The extremes of the lexical sets around this descriptor even include an attempt to make it [illegal] to [criticize] any [government policy] or [government sub contractor implementing policy]. As may be expected, the [surfacing] of this attempt, forecast to be led by [deeply compromised politicians] will further [fuel] both [rage] and [revolution]. There are deeper supporting sets which are pointing toward a [flurry] of [outing's or expose's] on [politicians] and [corporations], and [government agencies] which will participate in the [backlash] that will produce the [failure] {ed note: later, nearer the Spring equinox} of many [legislative initiatives] as the [deaths/disemboweling] of several [prominent politicians/political elites/(power wielding insiders)] will cause a [chill] to [overcome] the [relationship] between the [political stooges/minions (in congress and the senate)] and their [handlers/owners].

Also within the Populace/USofA entity are many (25/twenty-five) supporting lexical sets which are all under the chain of meta data layers from [transformation] through [secrets revealed] through [revolution] that ultimately leads to instances of [abject horror], and [bloody] or [fiery] [death]. Some of these instances are related to [transportation] which will be [known to carry] members of either the TPTB or their [minion classes]. The detail layers are describing [attacks] in which [vehicles] are [surrounded], and [forced (to a) halt]. Then the aspect/attribute sets in support suggest that [during assaults/gun battles] instances of [fire bombing] will occur such that the [propagandists] have [charred corpses (of the) minions] and their [families/children] as [tag lines] for their reports. Further, the [fiery death] linguistics also occur in other structures, most notably several that go to the idea of [gated/secure communities] that are [encircled] and [torched]. Within these data sets are descriptors for [gutting/disemboweling] of the [fleeing occupants] by the [enraged mobs] gathered to [watch 'the event' (the former TPTB infrastructure) burn].

There are also indicators of a [secret war] in which TPTB will [cause] the [disappearances (hidden deaths)] of [opposition/revolutionaries] and [innocents] who will be [targeted] in [revenge (by elitists and minions)]. This [dirty war] will not only rhyme/echo with the 'dirty wars' previously seen around the planet in the last century, but is also indicated to start [2/two] additional layers of [conflict] which will also be [invisible] at least for a small period of time. These [new conflicts/new wars] will include [intercine strife] amongst the [minion classes] of TPTB, as well as a curious new manifesting circumstance which is described as [theatrical] and which will be centered around the [canine lyricist/ dog poet]. As modelspace is progressed past Winter 2009/2010, and into the [agonizing Spring (2010)] the data sets are indicating that the [dog poet/canine lyricist] will begin to gain [visibility] in the global (not mainstream) media, albeit slowly and in a [misunderstood/miss reported] manner. In the data sets at the level of support for primary descriptors for the Populace/USofA the [dog poet] is described as [releasing] the [sirius song] against TPTB, specifically within the [populace/usofa], though the memes involved are forecast to go [planetary] in short order.

Note that from March 2010 onward the [burn], and [flames], and [watch it burn] language will come to dominate conversations as the many and continuing instances of [revenge] merge with the [general civil unrest]. There are also extensive cross links from the [burn] and [flames] sub set within the Populace/USofA entity which go over to the GlobalPop entity where they terminate in sub sets that are in support of the [following upon or aftermath] to the [new wars], and specifically to the [famines] which will be [prevailing] due to [polluted winds].

Independent of the [fires] and [burning] of the [food supplies (due to bespoke 'contamination')], the Populace/USofA entity carries a large amount of linguistic sets toward [starvation] and [debilitating hunger] {ed note: this last is almost a death sentence with the hyper-flu outbreak in Fall in the northern hemisphere] that will be directly caused by the [dollar death/devaluation] and the [resulting global market chaos]. These linguistic sets include archetypes that are also directly supporting the [epic (monumental)] meta data layer currently 'settling in' on the [populace/usofa]. As forecast in previous ALTA reports, the major [paradigm changes] occurring within the [populace/usofa] over 2009 and 2010 will be driven by both [secret acts] and [secrets revealed]. The [secret acts] will be [slaps in your face secret behind closed doors meetings]

amongst the [ultra wealthy], and other [powerful elites] over [summer 2010] that will [become visible] to the [general populace] in a [very unfavorable light]. Unlike usual ‘news’ that the [populace] is powerless to [affect], these [Ultra meetings] will have a [public component] as the [participants] are seen to [return] to the USofA. These [comings home episodes] are indicated to have a very high level of visibility within the [independent media], and to even be reported in the [propaganda/corporate media]. The result will be several [video captured] incidents of [attacks] on the [ultra elite] as they are [vulnerable] in [transit]. At least a single instance of such an [attack] is forecast to involve [biological weapons] that will be [spectacularly successful], so much so that the data sets within TPTB entity describe the [extremely effective attack] on a particular [house/clan] of TPTB as [releasing excrement (down the legs of) TPTB] who happened to be [near by]. Of course, the Populace/USofA is indicating that [many/hundreds (of people)] will be [made to pay] for the [blatant attack (by citizen/terrorists)] against the [‘natural ruling classes’] in a rather [brutal] and [inhumane] manner. But, as Che has noted, “nothing advances revolution like naked oppression by the powerful against the weak”. The [horrific deaths] in [retaliation] of the [attacks (against the ultra wealthy)] will *not be meant to strike the [children] and [innocents] so heavily, and not that it will be any solace whatsoever, but the [epic/monumental] sub set indicates that the [deaths of the thousand(s) innocents] will be [memorialized] and [understood] in the next decade as being a [pivotal fulcrum] in the [war against TPTB] by terran humanity. Again, while not [deliberately targeted], the [crime (of killing the) innocents] will not be the only motivating factor in the [revenge wave] that will sweep through the TPTB, but rather it (the mass murder) will be accompanied by [callous words (of disregard for life)] that will be so [emotional] as to lead to a [wave (of) smart suicides] against the TPTB, as well as [highly visible], and very [brutal] [assassinations].

[Terra – Planet Up Started](#)

The Terra entity accretion patterns are heavily dominated by longer term values {ed note: 4/four months out though 19/nineteen months (detail level)}, as has been the case for these last few years. The supposition, from the data accrual rates and patterns, is that the planet is now entering an [active phase] of [alterations/changes].

The data sets continue to show both [large groups] of [earthquakes], as well as [single, and very large earthquakes] within these next 10/ten months.

After the Spring equinox, 2010, the Terra entity [changes/alterations] sub set takes an even bigger growth spurt and nearly doubles in emotional tension value sums. Further, during the period of [increasing activity] or [new expressions of change], such old forecasts as [new lands (rising from ocean)] will become more manifest. The [new lands rising] from the [ocean bottom] will be part of [changes] at a [planetary level] that will reach enough [visibility] that the [planetary populace of humans] will, as a mass, [move (toward) acknowledgement] or [accept consensus] on the [devastating earth changes]. There are data elements at the detail levels that suggest the [seasonal changes (from Spring to Summer 2010)] will include [dusting (from earthquakes)] that will affect very large areas at a time. A [dusting] is described within the data sets as [earthquakes (so shallow)] as to cause a [rolling wave] to [course/travel] through the [upper layers (of the ground)] such that [everything] is [picked/lifted/kicked up] to coming [down (with a bang/loud noise)] and the release of [masses (of disturbed) dust].

The accretion patterns for the [increasing planetary dislocations] include language {ed note: more likely in 2011 than 2010} that goes to the idea of [1000/one thousand mile circles] in which [all bridges/dams/overpasses] will [collapse (all in mere hours in a single day)].

The descriptors within the supporting aspect/attribute sets grow at very accelerated levels after mid Summer 2010, and seemingly reach a near term peak of building emotional tension values in late 2011. The bad news part of that statement is that in late 2011, the planet goes through a release of emotional tension values not seen before in our work. The totality of the release level in 2011 is extreme by any measure that we care to use, and a large share of the tensions that are released come about as a result of the building tensions within all the entities (see discussions above) against a background of [unsettled] or [disquiet] planet. This [disquiet] relative to the [crust (of terra)] and its [movements] is indicated to become [central] to the [planetary human collective consensus] in 2010, after some [spectacular] and [shocking] planet [changes] over the last of 2009, and through to Fall of 2010. These [shocks (to human consensus about terra)] are forecast to include more, and [strange] episodes of [new lands], and [rising lands (on already existent land structures)], as well as [new holes/caves (being created)], and new [water features/spectacular ‘eruptions’]. Further instances of [shocks] will come from [magma movement] that will in turn be [inducing/triggering] a period of [quavering lands] or [quivering grounds]. This last is indicated to cover a very broad area, and to rise to the level of a

[near constant annoyance]. This last set includes [constantly breaking plumbing and electrical lines], as well as [communications disruptions (continuously)] such that when repaired, the [broken connections] will almost immediately [break (somewhere else)] in the next round of [quavering].

A large part of the supporting aspect/attributes for [quavering] is directly related to [volcanoes] and [magma movements]. The [up starting/freshening] of the [magma flows] are indicated to directly affect [transportation] including [trans pacific ocean shipping], as well as [air shipping].

Other issues for [human activity] in the [Antarctic] and [south America] will become [visible] as was initially forecast in ALTA reports from 2005, and will include the rise of [visibility] within even the [main stream media] that the [electric circuits/magnetic circuits] of the [planet] are out of the [ordinary] to the extent that [business as usual] is [no longer possible] by Summer of 2010. These [planet affecting circuit changes] will {ed note: and do already} include [new ocean currents *(due to undersea volcanism)], and new [air flows] {ed note: which come into play in the [bad winds] sub sets as well }, and the [natural suppression (of) electric circuits] by [erratic magnetics].

These [erratic magnetic circuits] being [generated] by terra are forecast to be a proximate cause for a number of [change events] over these next few years. Resulting from our previously discussed [BIG SQUEEZE] as the [solar system] passes through the [intense magnetic ribbon (20 years wide from earth's perspective)] at the [ecliptic plane (of the milky way galaxy)], the [erratic magnetic circuits] are also indicated as [prompting change] or [inducing irregularities] within the [atmospheric] and [oceanic] circuits or currents. These are forecast to be [visible] within the mainstream media over late 2009, and to be [highly visible] over 2010 as the [climate] and the [weather] patterns shift significantly. Again we note that [bad/ill winds] are a dominating sub set within the Terra entity where the supporting aspect/attributes are going toward physical impacts on the environment. Further the [bad winds] sub set within the Terra entity is extensively cross linked over to the same set within the GlobalPop entity.

The [change events] being forecast for this next decade out to 2019 include language for very [shocking] levels of planetary and interplanetary change that will include [moons (relocating)], and [drifting objects (visible to the

naked eye)] in other parts of the solar system, while here on terra there will be [new lands] {ed note: habitable by 2019}, and [loss of lands] as parts of the planet decide to [relocate]. Further there are data sets going to the [exposure (of the) land/ground] in Antarctica (as well as Greenland). These contain some smaller supporting aspect/attribute sets for a near term, perhaps as near as late 2011, time in which a [wave] will [race] from the [south pole] to the [north pole] over the course of [a half day (12/twelve hours)]. This [wave] will be the result of the [separation] of a truly [gigantic ice mass] from Antarctica land mass. The [separation] is described in the supporting sets as being preceded by [several (over 3/three) days] of [exploding lakes] that will send [fresh water] out over [10/ten miles] from the [antarctic coast]. The [wave] will be most destructive to the [african] coast line, and the [southern regions (of low lying coast) of eastern south america], and then later, when the [2/two halves] of the [wave] meet in the [arctic], further damage will be done to [siberia, and alaska, and the northern coast of canada]. The [backwash] from the [waves meeting] in the Arctic is also forecast to cause damage several days later in northern Europe, Scotland, and Ireland, Finland, and northern Russia.

There are other [change events] sub sets that appear to be forecasting the [rent/rendering] or [separation] of [north and south america] and this is indicated to [follow], albeit briefly, the [cracking (of) africa into 2/two continents]. These sets get all of their emotional sums from very long term values and thus begin to show up when modelspace is progressed into 2013 and beyond. At that point the data is most unreliable as the total level of details are extremely small.

At the beginning edge of the [change events] sub sets accretion as modelspace is moved into the middle of 2010, there are supporting layers of cross links over to the TPTB entity, and the [officialdom] sub sets of the Populace/USofA entity, and to a far lesser extent, the GlobalPop entity. These cross links are terminating in the [underground] and [survival shelters] sub sets within the more [woo-woo] sets of the 2/two populace entities. The [change events] are indicated to be [boosted] into the [mass/collective consciousness] by the [liberation/looting] of the [knowledge repositories] during the upcoming [revolutionary fervor] of these next few years. The [suppressed knowledge] that is [brought out] by the [looting] and [rioting] will be participating in the huge explosion of [secrets revealed] that starts to bloom into terran humanity in 2010. Some of the aspect/attributes are suggesting that [underground shelters] will be [disclosed] and that

further [riots] will take place at these [sites (for safety of TPTB)] as [rumors] of [hidden food stocks] sweep through the [famine affected populations]. In the case of the [looting of the vatican], the data sets are forecasting that [maps] taken from the [floor vault room] will be revealing not only huge [food stores/caches], but also the locations of [secret power plants] and [entrances] to [underground shelters] across the planet.

SpaceGoatFarts – Cousins and Enemies

Please Note that the SpaceGoatFarts entity is where we place all of the values that arise in the areas of [officially denied (anything)], and [truly unknown], and [thought known, but questionable]. This entity houses everything from [UFOs] to [OOPArt (out of place artifacts indicting human history radically different from officially proffered versions)]. It is therefore the strangest of our entities in many ways, and also, curiously has a higher level of accuracy of detail than other entities.

As we progress in the interpretation of the data sets, NASA is still [on track] to begin the first in the overt actions that will (and already have) generate the language that we have been forecasting for over 3/three years now as the [alien wars]. NASA plans to [execute] a [strategic maneuver] that has already been pumped into our planetary consciousness under the heading of [NASA to BOMB the MOON]. We note with irony that the [war] language is synchronizing with the [interplanetary/alien] language almost exactly as first forecast those many years ago, as well as being very nearly on the mark for timing as we had forecast it to appear by [Summer 2009] , and indeed NASA, at the behest of universe, has kindly obliged. This ‘first salvo’ in the opening of the [alien wars] meme and the appearance of the next round of linguistics is scheduled to occur between October 8th and the 10th. Again we note the irony of the language coming from the ‘civilian’ space agency of the USofA and the many instances of aggressive and ‘war words’ within their official press releases on the upcoming event. We also await with some anticipation the event itself, as it should be visible from earth, and should also generate vast quantities of language around this meme, as had been forecast for Fall 2009. Further, should the language appear as forecast, then the confidence in the other [alien wars] forecasts rises proportionately, and so there is every reason to also anticipate {ed note: with pies instead of ‘relish’ - linguist joke here} the manifestation of some of the other [casus

(lingua) belli] that have also been indicated for Fall 2009. Hmmm. Lots of pies needed as there are LOTS of SpaceGoatFarts forecasts for manifesting woo-woo and hoo-doo and all kinds of strange sheeit for this Fall.

As modelspace is progressed into Fall of 2009, which is to say actually very close to the September equinox on the 21st, the SpaceGoatFarts entity begins to pile up mountains of new supporting sets under the [unknown energies from space] sub set. This sub set becomes split into 3/three large sub groups by 3/three separate aspect/attribute sets each vying for dominance over the rest of 2009 within that sub set of [unknown energies].

These 3/three want-to-be-dominate archetypes are [radiant (energies)], [knowledge (unbound)], and [energies (employed/put-to-work/made-practical)]. In the case of the last of these, this sub set is extensively cross linked over to the [new electrics] sub set under the OmniHumanity entity, as well as being very heavily cross linked to both the Terra entity, and the GlobalPop entity.

The [radiant (energies)] as a potential dominant modifier for the [unknown energies from space] sub set is itself very complex and contains descriptors for [run-away/out of control energetic process(es)] at one end of its range and to [infiltration/seepage (from/through atmospheric hole) of radiant energies]. This last descriptor set is extensively cross linked over to the Terra entity where it participates in the [sweating plants] and [crops (over) radiated/energized], and as such provides some of the emotional support for the chain of [crop failures] that in turn participates in [famines] within the GlobalPop and Populace/USofA entities. The [infiltration (of radiant energies) from space] sub set is also extensively cross linked internally over to the [crop glyphs/circles] sub sets within the SpaceGoatFarts entity.

Also notable within the [crop glyphs/circles] sub set are directly held values for [escape] from the [cage/walled in chains] of a [young (bald/wizened) human] who is indicated as being [not terran] in origin, though apparently a [long time resident]. This [human] has [been incarcerated] in [recent years] due to [political turmoil] within the [region] of his [internment/residence], and it would seem that his [captors] are not knowledgeable about his [point of origin]. There are aspect/attributes which suggest that the [internment], though not a [choice], was [relatively pleasant/non threatening/secure] and therefore also [not resisted], until [circumstances changed (politically)]. The [point of origin] issue is described as being [visible] {ed note: at least within

the independent media} about the same time as the [chaos (political/economic)] of mid Summer 2010. There are some indications that [cousin Alexi (the non terran human)] will be both [interviewed] and [videographed] in the midst of [disapora] and [dispersing (of the) populace] following a particularly rough [week] of [earthquakes] and [other adverse events] following the [summer solstice, 2010]. There are language clues within the aspect/attribute sets that the [video] of [cousin Alexi] will not be [recognized] for what it is, either at the [point of origin] {ed note: yes appears within the set as a supporting aspect/attribute set about the video, and note that internally consistent repeated references are usually very powerful in the ways in which they manifest (note the [wounding] around the Dick Cheney (former secret commander in thief, usofa)}, or at the [time/point of visibility]. Basically the idea is that an artifact of [cousin Alexi] being here on earth produces something [strange/wonderful] about his [image] in certain [video cameras/methods] which will not be seen by the [crew] who actually creates the video. The detail layers of the data suggest that the [video crew] will simply be in a [chaotic place] during [chaotic (human) movements], and will [press (an) interview] on [cousin Alexi]. Whether out [cousin Alexi] knows about his [image on video] or not is not revealed by the data sets, but apparently the [crew], while they will notice something [remarkable] about the [young/seasoned/wizened man] will not be aware of the [video artifact]. The accretion patterns suggest that the [video] will create [shock waves] when it is put out-and-about, and will cause a [storm of interest] that will prompt the [authorities (officialdom/TPTB)] to [go hunt] both the [video crew] and [cousin Alexi]. Apparently [neither] will be located, and the [video] of [cousin Alexi] will become something of a [underground hit/ or planetary human cultural phenomenon].

Other sets within the SpaceGoatFarts entity relative to the [contact] meme point to growth of a very very very significant level in both [UFO sightings], and [accepted knowledge] over the latter months of 2009, and through all of 2010, with the total emotional sums involved in the [contact meme] more than doubling over the last half of 2010, after nearly doubling from November 2009 through to July 11, 2010. Within the 2009 accretion patterns for the [contact] meme are yet more indicators that the [2/two liberators/thieves] who are in possession of an [extremely ancient device] will begin to show their [visibility] in 2009 albeit not in the main stream media. The progress of these [2/two thieves] has been [erratic] and a bit [aimless] to this point, though there are now indications that the [thieves (of

the technology)) are starting to [become aware] of the [potential (uses/utility?) of the [ancient technology], even if they are [not (yet?) capable] of its [effective operation]. Apparently they will cause something of a [problem] for some local [authorities] {ed note: in the mid east? Lots of Jordan/Egypt/Syria/Turkey] references, as they [attempt (to) practice] with the [device] a bit later in the year {ed note: *most of the accretion on this comes in by late November 2009, though some trails off into finality only by late January 2010}. The aware observer would be focused on language around [mysterious collapse] of [extensive cave systems]. As well as [fused/bonded dirt/ground]. Some of the language goes to suggest that the [bonds dissolve (within the dirt atoms)] and then [reform] in ways that will [astound] those who [discover] the site later.

As the SpaceGoatFarts entity moves along with modelspace through early 2010, a new pattern of accretion with lexical sets in common with the Populace/USofA entity arises. This set is headed by the descriptor of [draft] which is modified/supported by [military] at the primary level, and then both the [secondary] and [tertiary] layers are supported by [alien wars]. The imagery from the detail layers of the data suggest that a [hidden/occulted draft] will be [attempted] by [sub groups] of [officialdom]. This [draft] is to be [knowledge specific] rather than any form of [general induction], but that as with a general [draft] on the [population], the intent will be to [augment] the [capacity] of the [military]. This may be referring to a [secret draft of knowledge workers] rather than an [induction of soldiers]. The imagery would suggest that [abilities], and [skills] relative to [sciences] are [desperately needed] by this level of [sub group of officialdom]. There are significant ties over to TPTB entity to suggest this [planet wide talent search] is [sanctioned (by upper management/dictators of TPTB)], though also that there are layers upon layers of both [intent] and [actions] which will be involved. And further that not [all will be as it appears] at that time. This area participates in the data stream initially set up under the [disappearances] descriptor set.

There are very interesting patterns of accretion within the SpaceGoatFarts entity, sub set of the [unknown energies from space] that are binding the [radiant energies (from space)], and the [knowledge unbound] sub sets. Within the conjunction of these sets, the [knowledge unbound] sub set is the larger in emotional sums, and is supported by aspect/attributes that go toward [release] or [appearance] of [devices] {ed note: terran manufacture, terran technology}, perhaps as early as Spring of 2010, that are based on

[new electrics/hyperdimensional principles]. These [devices/tools] will be linked, temporally, to the activities of the [siberian couple/radicals/human change agents]. Though not linked overtly within the data, there are some similarities in the patterns of accretion, and these both (the [devices/tools], and the [siberian couple]) are indicated to be [affecting (the) planet]. And further, each has a directly held supporting set of [hyperdimensional principles]. Further the [siberian couple], although they are described as being more in the [political gnosis] area, are also showing up within the detail layers at the same time, and thus act as a linked temporal markers for the appearance of the other detail language within the same layers.

It is worth noting that the SpaceGoatFarts entity continues to accrue data sets in support of the [alien wars] linguistics at all levels of previously noted support, as well as in new aspect/attribute sets. Some of the largest areas of growth in support of previously cited aspect/attribute sets include the [rural anxiety/fear] sets that had been discussed in ALTA reports of 2/two and 3/three years ago. These [rural fear/anxiety] sets are based around the concept of [acceptance (of alien visitation)] here on earth, as well as the conjunction of the [increased, and visible, alien abductions] which will [create/trigger] a [wave of panic] in [rural areas (most notably in the USofA)] in which [inhabitants] of these regions will be [standing guard] of their [doors] with [loaded weapons].

Much of the [rural anxiety/fear] sets are also participating in a much larger linguistic structure that is going to the context of [planetary (global human populace) consensus (that the) aliens (are) evil] . This attitude of [acceptance of alien evil] is not the result of social meme engineering by the [officialdom], though there is plenty of that going on, rather this is a case of the [planetary human populace] sensing the [evil intent] from these [alien beings] that is then backed up with the [service to self] motivation of these beings becoming quite clear indeed as they continue to express their fundamental attitude of [“all you humans are as lab rats to us”]. It is this [exposure (to) self serving evil] and [collective (giant) ego] being manifest by the [aliens] through the [abduction episodes] following the [contact] exposure of early 2010 that propels the [on-guard, shoot first, then shoot again, then look at the result] attitude among [rural dwelling peoples]. The data sets describe a number of [accidental killings] of humans by humans as a result of this [wave of justified fear], as well as the [production] of a number of [alien corpses]. At this point the [alien wars] linguistics starts to rise toward dominance of the SpaceGoatFarts entity.

The [contact] meme is forecast to take another very large jump upward in global collective consciousness this Fall and Winter, albeit against a background of [dollar death] and [chaotic economic and social] conditions that are further augmented by [rampaging disease] and [revolutionary impulses (made manifest)]. The [contact] meme continues to grow such that by 2011 the [alien wars] context is forecast to have [planetary visibility]. It is worth noting that the [contact] meme is being forecast as [generating] or [creating] a [pluralistic understanding] of the [nature of life in universe] such that terran humans will come to accept [humans], [hominids], and [aliens] as [existent] not only in universe, but also within our [local environment]. The [off-terra humans] are further classified into [friendly], [indifferent], and [bastards/self-serving space scum]. The [hominids] are not so easily understood, and are forecast to be a continuing [question/debate] for [decades]. These [hominids] include the [greys (aka archons)] who are (and will be) known [agents (for/of) evil masters], as well as [lying/self serving collective ego/mind creatures]. Many of these will be ‘victims’ in the [shotgun response episodes to alien abductions].

A large group of the [aliens] sub sets within the [contact] sub set of the SpaceGoatFarts entity are supported by aspect/attributes that suggest at least some [alien (non human dna beings)] will be [accepted (as) emotional (cousins)] to terran humanity, as these beings will possess the [fundamental 3/three natures], as described here at HPH as being able to honestly answer the following 3/three questions: “what is your favorite kind of pie?”; “how do you express your art?”; and, “what is your favorite bob marley song?”. This [acceptance (of aliens)] as [emotional cousins] is forecast to really really muddy the waters of the [contact] meme as well as to [press down] upon all forms of existent [belief systems] such that every [religion] and many [spiritual practices] of these days will be ‘fundamentally affected’ {ed note: pun intended}, and many, perhaps the majority will be [abandoned] and will [fade] into [ancient history].

As an adjunct note to the [alien wars], there are supporting sets from SpaceGoatFarts entity that are cross linked over to the [looting/rioting incidents] in both the USofA (Maryland, we think), and the [looting of the vatican]. In both cases the [alien wars], and the [contact] linguistic sets gain large areas of support from the [dispersion/distribution] of [real history (of terran humans and planet earth)] that is forecast to come not from the [alien

contact] per se, but rather from the [suppressed knowledge] held by the [TPTB] in their [religious vaults] and [government lairs].

Cuban Missile Crisis (1960's): Linguistics Study

Our data processing forecasts the [attack (botched and mistake riddled)] on Iran by Israel/USofA/Zionists that will precipitate a planetary crisis in [radioactive winds]. In order to ascertain whatever level of increased understanding possible about this forecast, it was decided to 'back test' our processing on past events of a similar nature. After examining a number of candidate events, I choose the Cuban Missile Crisis (between the USofA and the USSR (CCCP)) of the 1960's.

By locating the language that appeared in the press at the time, and then extracting that language for the period of a year on each side of the actual crisis point, and then running our current processing against this data set, certain conclusions were reached.

As we all may be aware, the Cuban Missile crisis was 'resolved' by the 'brinkmanship' between Kennedy (Pres. USofA), and Krushchev (Pres. CCCP). The Cuban Missile Crisis did NOT end in war and destruction. Our processing indicates (now, in our backwards test against the linguistics actually appearing in papers of the day), that we would have only had about a 1/one in 8/eight level of probability of being able to 'forecast' that NO WAR would have resulted from the building emotional tensions at the time. Does that statement make sense?

To restate the situation: IF the internet and our processing had been in existence at the time of the Cuban Missile Crisis, the probability would be that 7/seven out of 8/eight sets of linguistics, that we would have obtained at that time, would have pointed toward [actual war]...while only 1/one set in 8/eight would have accurately forecast the [near war] that actually developed.

As of this point in time, that is to say, late July 2009, our data sets, taken as an inclusive whole extract from modelspace and all entities involved, have a 1/one to 11/eleven ratio in [near war] versus [actual war] linguistics when the [israeli/usofa/zionists] versus [iran/persia] is examined.

This level of confirmation of our process against a back tested model for probability is not particularly reassuring, however there is still some small room in the forecast for [averting] the [total fucking disaster] that is the forecast alternative if [israeli zionists] actually do attack [iran].

Please note: no apologies for profanity as both the subject and the times are profane in their manifestation. Also note that 8/eight of the 11/eleven [actual war] linguistic sets also include the total [destruction] of [all monarchies], and [all priests], and [all 'illuminati']. Further, these sets also include the [hunting (down)] and [killing] of the [children] of [monarchists (and priests)] and many [politicians] and their [families] as well in a horrific [planetary orgy of blood] that will continue for nearly [3/three years] until finally the [pope ratzinger] and the [last of the british crown 'royals'] are located and [publicly killed]. Also note that in 8/eight of these 11/eleven (though a different grouping of 8/eight) include the [glazing] or [total destruction of the israeli state and lands].

Conclusion: Puddles, Benthos, and the Kairos Crest

In the early 1990's I went through an 8/eight plus earthquake while on software engineering assignment in Mexico City. I was having breakfast in the huge, and elegant dining room of a 400/four hundred year old hotel in the Zona Rosa, Mexico City's 'old town'. As the earthquake hit, and the patrons all stood and rushed to go outside, the violent rolling nature of the quake made itself felt in the yard square stone floor tiles (each nearly a yard in thickness) as they floated as if gray square corks on a violently choppy sea. The huge floor tiles heaved about as if receiving random electric jolts. The people attempting to walk across these heaving stones were hurled into each other, and into furniture, food, and hot cooking equipment from the kitchen which was open to the dining room. A very dangerous and frightening 10/ten minutes engulfed the room of several hundred people as the earthquake shook the whole of the region in the process, bringing down buildings, and crushing and killing thousands.

What made that walk across the unsteady floor so horrific to so many of those the room was the time compression forced by the events. As all of Mexico City rocked and swayed, the whole populace there at the time was forced into living in the NOW. And that NOW lasted for over 10/ten minutes. For all involved it was the single longest 10/ten minutes of their lives, and for some thousands it was the last 10/ten minutes of their lives.

That form of intense time compression into the NOW experience awaits all of us over these next few years.

Given our experience in what we call ‘riding the time wave’ these last few years, our perspective on time is perhaps a bit more refined than most. That perspective of the current period is that the quality of time is indeed changing. While the measurement of time still has seconds ticking off in their usual pattern, the quality of the experience of those seconds has definitively changed. From our perspective it also seems as though the level of changes within the quality of time are expressing themselves in ever increasing scope such that even our earth, its sun, and the other planets within the solar system are participating...and seemingly the whole of the milky way galaxy is also involved. Such observations naturally prompt the question of whether all of universe is now participating in a qualitative change. As may be expected and even forecast of temporal quality changes, the effects relative to the observer are emerging at both the macro and micro levels. The micro levels would include alterations within an individual human perception of the quality of time. Our work here is expressly pointing toward a massive, probably even global, human experience of kairos (<http://en.wikipedia.org/wiki/Kairos>) over these next 3/three years. The patterns are evident at so many levels that the forecast for nearly all individual humans to experience kairos conditions is a fairly safe prediction to proffer.

Unfortunately, the prompts that universe provides to induce the kairos perception will not be what may be desired by humans, but rather, what universe has determined we need, individually or collectively, to experience.

Humans with skills in meditation to the level of the “razor’s edge” of samyama (<http://www.swamij.com/yoga-sutras-30406.htm>), are globally reporting that the “stream entering” (<http://en.wikipedia.org/wiki/Sot%C4%81panna>) experience has changed over these last few years, and continues to alter itself. As the first line of experience of temporal shifts in collective kairos, the 21st century sanyassins (<http://en.wikipedia.org/wiki/Sanyassin>) of all origins will be the first to encounter, and thus vocalize the experience of the kairos wave just starting (September 22, 2009) to crest upon us all. The early reports from the “stream winners” promises change levels such as to make the whole of humanity diligently work on redefining the personal meaning of the word ‘epic’.

Here at HPH we swim in a sea of language, free diving amongst the flotsam and debris of humanity's travails as we seek the deepest level of meaning amongst the benthos (http://en.wikipedia.org/wiki/Benthic_zone). It is tempting to say 'progress' or 'forward' in regards to our collective journey, but as words have power, we need to always address the hidden levels of assumptions and assertions inherent in quickly fetched words. Will/does humanity progress? If so is there a direction called 'forward' in a universe clearly composed of repeating cycles? Not knowing, we elect to use 'travails' to describe humanity lumbering about in time and space. If there is progress to the species it is not without overcoming obstacles. If the measure of the progress is the size of the obstacles overcome, those of humanity who will exist in 2014 and beyond will have made huge strides for the species given the sheer amount of trouble and obstacles currently 'disturbing the stream' of manifesting reality.

Many of the obstacles facing humanity over these next few years are the denouement of great themes that have woven themselves through our history for thousands of years in order that we who live now might be presented with an opportunity to participate in their resolution. Such participation requires an attitude of fear-less-ness against a rising mass of fear at all levels. Within the aikido dojo the instructing sensei admonish all students to express fear-less-ness with each act through mind-full-ness. It appears that universe is pressing the kairos of the NOW upon us all as it compresses events and time for our edification and elucidation. The experience of mind-full-ness will be new to many humans, and they will need assistance in locating a perspective from which fear-less-ness can proceed.

Humanity collectively need only look back to the prescient words of our poets for advice during the descending wave of kairos. Here at HPH, we find that Percy Bysshe Shelly offers words that steer toward an appropriate view of our temporal journey and its currently turbulent waters.

Ozymandias

by Percy Bysshe Shelley

I met a traveler from an antique land
Who said: Two vast and trunkless legs of stone
Stand in the desert. Near them, on the sand,
Half sunk, a shattered visage lies, whose frown,
And wrinkled lip, and sneer of cold command,
Tell that its sculptor well those passions read
Which yet survive, stamped on these lifeless things,
The hand that mocked them, and the heart that fed;
And on the pedestal these words appear:
“My name is Ozymandias, king of kings:
Look upon my works, ye Mighty, and despair!”
Nothing beside remains. Round the decay
Of that colossal wreck, boundless and bare
The lone and level sands stretch far away.

And a very pertinent quote from The Mask of Anarchy,
(<http://www.artofeurope.com/shelley/she5.htm>)

'Rise like Lions after slumber
In unvanquishable number,
Shake your chains to earth like dew
Which in sleep had fallen on you –
Ye are many - they are few.

Addendum:

Our next possible point of publication will be in mid to late September, 2009. The intention is to examine the data sets from the currently running data gathering effort in early September with an eye toward making a decision to post a new issue, OR NOT. If the data sets , and or manifesting

circumstances suggest that nothing significant has changed, we will not waste ours, or anyone else's time with another issue.

A shielded discussion forum on this material is located at the following URL. Halfpasthuman does NOT run or operate this forum, it is entirely reader controlled.

Hello,

I have made several changes to the forum, starting with eliminating the dreaded double-password. It is a private forum, open only to members. Membership is now open again.

If you include a mention about the discussion group in your reports, please include this link to get started with registration:
