Asymmetric Language Trend Analysis  
Interpretation and Predictions for 2012 and beyond

## Meta Arts

The forecast shift into continuous release language has occurred. In our current run we have no building tension dominant weeks, though there are occasional days in which the level of release language does not grow (overwhelming the building tension language) quite as fast as others. Nonetheless, the challenge for us here at HPH has been to devise a strategy and tactics to adapt my processing approach to continuing our work in predictive linguistics.

The most daunting aspect of the language change for our processing has been the concurrent shift (deep discussion about nature of time, and evolution of planetary mind is possible from what has been learned from this shift, but that is for another writing) into nearly total (from our perspective) immediacy values.

Again, from our perspective this shift into release language also flooded our system with immediacy values to the near exclusion of both shorter term and longer term data types. At one obvious level, my previous characterization of this time (2012) as a 'data gap' was totally wrong. It is not a gap, but an overwhelming shift of 'type' that represents, in my opinion, currently manifesting changes within humanity.

Without regard to cause and effect of the language shift, the result has required a very extensive re-examination of the principles directing our processing of the data. After several unsuccessful experiments following the shift into release language, it became apparent that something more than a simple type shift had occurred. There are indications with the data stream that various level ratios, long held, between the data types had totally broken down. Upon detailed examination this proved to be the case.

At this point my thinking was led to the horrible thought of having to totally rebuild the lexicon and its associated multidimensional array of values (intensity, duration, impact, source-type, archetype, supporting-type, et al out to 640 value intersects). The original effort involved several thousands of hours (remember there are only 2000 'billable' hours in an above average work year) that spanned from 1994 through to 2002.

In was in the throws of thrashing around trying to find ways to NOT rebuild the lexicon that our current approach was blocking my way, and so, after repeatedly stumbling over it, an 'aha' moment was reached. The fundamental problem is that all we have is

immediacy data which as noted below has a very short 'shelf life'.

**Immediacy data** – effective from 3 days out to (maximal extent) end of 3<sup>rd</sup> week from capture date.

**Short term data** – effective from beginning of the 4<sup>th</sup> week (from capture date) out through the end of the 3<sup>rd</sup> month.

**Longer term data** – effective from beginning of the 4<sup>th</sup> month (from capture date) out through 19 months (generational modifier can extend this out past 82 years from capture date)

In our previous reports the flow of the report building process involved leaving the immediacy data spiders 'turned on', but mostly ignored during the 20 plus days it would take to gather, sort, and interpret the longer and shorter term data types. Then the immediacy data would be tackled in the last 5 to 7 days as a 'race against time' mentality takes over the interpretation process. This last has always been the most aggravating part of the production of the report as sooooo many pages of data interpretation would have to be discarded on the day of publication as having already appeared within those last few days of preparation.

So, the approach that was taken has been to introduce the idea that 'at a core level, humanity is changing', which produces the thought that any such changes would be reflected in our collective language use. Further the idea occurs that a necessary lag time will exist in which we acclimatize to the changes expressing. The postulate (so from here we leave the 'solidity' of walking on the marshy grasses and step off into the swamp of deep murky thought) is that:

as humanity is undergoing changes so profound as to affect our collective and individual relationship to, and understanding of time (and likely universe);

it is most likely (within our processing flow) that the changes will be first expressed at the highest level (of our already identified archetypes) as a result of the 'flattening' of the 'temporal pyramid' within the timing component of the lexicon.

Once this thought had smacked my gob, the next most logical thought also came along and a few experiments were devised. As Igor worked on restoring our server garden (too small to be a 'farm'), my task was to produce some meaningful intelligent guesses as to what the hell was going on within the data streams.

These new experiments have produced positive results (at least within the data...it

remains to be seen if this process will produce predictive linguistics either 'at all', or at levels of accuracy as high as we have achieved in the past). The results are necessarily still based on an overwhelming flood of immediacy data types, and a small smattering of shorter term values. Without going into tedious detail suffice it to say that the range of temporal values within the flattened temporal pyramid in the lexicon has been 'lifted' by shifting certain primacy value zero points. The effect of this lift in values has been to impose a much wider range of potential time span on the total set without regard as to the near total domination of the immediacy value type. Make sense? Clear as bottom paint on sunken hull?

So restated for clarity: what has been done is to produce a report based on a new time scale imposed on the data stream. Based on some early, and few, experiments, it seemed worth a shot. Given the new 'temporal spread' range that was set to the bottom (supporting) layer of the temporal pyramid, it will take until November to get an accurate (from our perspective of the data sets) assay of the results, though we humans should see it begin to fail, or succeed (in its forecasts) by mid Summer (northern hemisphere).

As the processing is involving treating the immediacy values flood and ratio (to the other sets) disruptions in specific ways, it also made sense to try a new approach to delivery of the interpretation of the results. This approach was not possible prior to the shift into continuing/continuous release language, and is likely possible only so long as that may persist. The new format is in the form of a 'question and answer', or interview lay-out. Both the questions, and their inherent linguistic bias, are a result of selecting resulting data from modelspace based on the same criteria that has been in place since 2003 when the SpaceGoatFarts entity was created to contain all of the accumulating mass of [unknown] and [officially denied] data archetypes entering the system. So, in this respect, our work these last months is yet another in my on-going attempts to respond to 'real world' changes that affect our data flow.

Further problems in report preparation have included intrusions on our process by outside parties. We have reason to think this resolved (at this stage).

## ***Meta Data***

The data sets are pointing toward a very energetic, in all senses of the word, Summer and Fall for humanity and our solar system. Many forecasters are focusing on the (just

past as of this posting) solar eclipse, and the imminent Venus transit of the Sun in early June. In our data, while these periods are significant, they pale compared to the energetic levels of activity in July, August, and September. This is repetitiously true in all our data sets. No sooner would modelspace be progressed into July, and, seemingly, all hell breaks loose. And this is on top of the increased chaos levels of May and June.

### ***TPTB Entity Set***

#### **What are the dirtyrotenevilbastard powers-that-be going to try to put over on us this Summer (northern hemisphere)?**

As modelspace is progressed over June and into Summer (northern hemisphere) 2012, the data set for [the powers that be (the bastard psychopaths behind officialdom)] has growth patterns under a very powerful archetype, [innocence]. The growth in this set is indicating that [tptb] will be [claiming innocence] against [charges]. The [charges] are indicated to come from [underlings/minions/officialdom workers]. This [claim against tptb] will be first seen by the aware observer as [rapid promotions] are [suddenly] made public. Some [press/pundits] will be characterizing these as [mysterious]. These [rapid promotions] will be but the first [symptom/indicator] of the [internal breakdown] of the [binding (between the elites) social contract]. This [internal strife] will also be [visible] to the aware observer in the sheer [speed/rapidity] with which [documents appear] when [called for (by) national celebrity whore-propagandists]. Further, associated with the [promotions] are indicators that these are [spurious] in that the [recipients] of the [sudden upward change in status] will not [actually gain (the promised) benefits/job]. Rather the data suggests that [wealth visible (to the newly bribed recipients)] will be [denied by circumstances] that are being described in the data as [rolling over], or [barreling over] {ed note: hint from universe here = barreling} the [participants] in this particular [bribery episode] on the [planetary scale].

### ***GlobalPop Entity Set + tptb + Populace/USofA + Terra entities sets***

#### **What about the on-going Fukushima nuclear disaster (and other potential nuclear disasters) over the rest of this year?**

The longer term data sets have the [fukushima] sited under the archetype of [sound] which is also [vibration] and [resonance] as well as [energy] at this level within our lexicon. The primary supporting set is headed by [breaking movement]. This set of

[breaking movement] also contains [thunder], [explosive release (of sound)], [sound and fury], [signifying fury], and others to that same effect.

The data set continues to provide growth under [dangerous position]. In this instance this is relative to nuclear plants in general, and Fukushima specifically returns in the data here directly held as well as by cross link.

The data sets at the detail level within the primary supporting set suggest that a [visible] incident is just ahead (perhaps by end of Summer 2012), in which a [man standing on a crag/precipice/broken wall] will [lean or hang (by) one arm] over the [most dangerous (view/point of view/perception)] relative to the [fukushima nuclear plant disaster]. His fate is described within the data sets multiple times a [precariously perched (looking down upon) personal destruction)]. It is difficult to view this data set and NOT to take it as the 'whole of humanity stares at destruction'.

There are many repeated sets within the [breaking (nuclear) fury] set that include [full bloom (flushed with) mutations] across the [northern hemisphere]. Note that this set is a very large and growing set that 'stems' (dark pun intended) from our previous sets that forecast [strange plant behavior] for this time. The previous Shape and ALTA reports contain repeated forecasts for [changing planetary biosphere]. Now much of that language from previous runs as far back as 2005 is reappearing in this current data run under the archetypes of [mutations] at a tertiary supporting level indicating that the manifestation into our collective consciousness is mere days/weeks ahead. The intensity values for the [full bloom of spring mutations] set shows that the [mainstream media propaganda whores] will be forced to [make the ruination visible].

The data sets contain references (instances of sub sets) that forecast a [special express service] that will be 'in use', relative to the Fukushima [nuclear disaster]. This [special express service] set is supported by [documentation] and [cars/conveyances] that are also [documentation bound/constrained]. Within the sub sets supporting the [special express service] there are many sets for [wealth]. There are also huge numbers of explicitly bespoke (appearing within the data as written here) references to [fame] and [social wealth] that will be [involve in] and [exposed by] the [special express service] as that set manifests over these next [5/five months].

Within the top level for the [fukushima ongoing nuclear disaster] are repeated

supporting layers that reinforce the idea of a [loud noise] that is [heard (but not seen)] and is ['felt in the hairs'] for [one hundred miles around]. Note that there are supporting sets also showing that the [loud noise] is [affecting ships] of [many countries] for [days].

There are repeated references to [summer, northern hemisphere, 2012] within this set.

There are repeated references to [startlement], and [sudden fright], and [nervous worry/response] within this set at several key levels of the archetype.

The [startlement/shock] word sets are in their turn affecting (directly and by cross link) the sets for [authorities] and [pan-global]. This last is a dually modifying set so the interpretation is for a global [fear fest] or [freak out] involving the [pan-global authorities].

This set contains specific references to a [period of (intense) unease] that will last for [six months]. The forecast here is for the [fukushima on-going nuclear disaster] to contribute to the release language increase for a 6/six month period that begins in very late May, or early June. This set extends the [worry] and [unease] language to [other manifestations of nuclear disaster]. These will likely be [new events].

This set contains references to a [flight to safety] which will be [directed south (of the equator)].

This set contains specific references to a [ring (of 540 miles)] (presumably around Fukushima power plant) that will be declared to be [no life] and [all must move]. Further the supporting sets go to the idea that [everything (regionally, nationally, and slightly less so, globally)] is in a [furor] of [turmoil/chaos/upset]. These sets do include shorter term values that are very long range {ed note: new extended range} that show some [clans] and [groups] and [individuals] who will be [adjusting] to the [relocation] by the end of this year.

Ed note: as an aside to the main point, there are some hints within the specific [diaspora] data sets that show that some people will make a [great success] of their [response] to this [forced relocation]. These [successful relocators (new life or nova vitae)] will share a [dedication] to [careful attention to detail], [doing it right (the first time)], and [a far view (of potentials)].

On a very important note in support for this 'answer', the data is quite clear in containing explicit statements that [shock (forces movement) from (the) successful]. In my

interpretation of this data set, it goes to the idea that 'those who respond well will be those who are moved by the shock, not stilled by it'.

While staying centered on this larger linguistic structure hanging under [energy/sound/resonance], and progressing modelspace forward, there appears, and this is a nasty phrase to use, but it pops to mind, a “hot spot” on July 10<sup>th</sup>. From this July 10<sup>th</sup> [day of intensity], we have cross links that go out to December 14<sup>th</sup>, 2012. That day is showing with linguistics going to [resolution]. Now please note that there are very very few data points for the December 14 date and we have not enough supporting sets to properly slot the 'resolution' word. So as of this writing, the only thing we can say about the linkage is that it exists with hints that some form of [duality] will be expressing between these two dates regarding [fukushima ongoing nuclear disaster].

The data sets are indicating that prior to July 10<sup>th</sup> {ed note: error rate is 3 days plus or minus} the tone relative to the [ongoing fukushima disaster] will change to one of [conflict] and [trouble] just as the [disaster] word shifts within the [public consciousness] over to [catastrophe], or [cataclysm]. The idea is that [yet more of the same do nothing intellectual and moral failure from 'leaders'] can be expected.

Other very key linguistic structures accrue to the whole data set of [fukushima/disaster] after modelspace is progressed past July 10<sup>th</sup>. From that point forward the primary supporting sets are [stillness], [sound(less)], [noise-less], [empty], [calm], [deep], and other representations of [profound silence]. So apparently the [shock] or [large noise] that will [induce startlement] around the planet will be followed sometime after July 10<sup>th</sup> by [silence (of the) deepest form].

The immediacy data that rises to the surface of our attention (in modelspace) that seems to 'break the silence' are sets going to the idea of [swimming/fleeing (to escape)], and [avoiding nets], and [running for life], and [chaos] and many other expressions along these same emotional lines.

As part of the [fleeing for life] sub set, there are links over to a descriptor set of [humans/people] who will be [struck to sit]....or [forced (by body needs) to stop] and [sit until death]. This set is linked over to [paralysis], but only loosely as though that word will be bandied about in relation to this forecast.

Further data sets go to the [impact of radiation] on the [fishes] at a [planet wide] level.

As a related note, since [fishes] are the symbol of the [picean age] and have other archetypal meanings going to religion, that cross-links over to the TPTB entity, and the Populace/USofA entity are indicating that the first [flush (of) outrage], and [shock], again, also a key word within the [fukushima] sub set, that are indicated to [propel] a [storm (of) popular anger] directed at [religious institutions]. The terminating links within the Populace/USofA entity have descriptor sets for [crowd based/mob caused burnings (of religious buildings)]. This aspect of the phenomena is more limited to the [christian cults]. Those descriptors for both [judism] and [islam] indicate that a [wave of abandonment] and [atonement] will [overtake rabbinical culture] {ed note: lots of linguistics here swirling around 'disgust' and 'revulsion' associated with 'dedication to space alien/off world god-pretenders.'} while in [islam], the response is shown as being [split] between a [rabid reform movement] and [large scale abandonment]. It was this period, mid 2012 (July), that was forecast to be the [visible threshold] of the [abandonment of the faith based religions] movement.

ED NOTE: On a personal level, my thinking is that there are risks to being wrongly placed in the southern hemisphere as any solar expulsion in December 2012 through March of 2013 **may** be directed, by the southern polar magnetic fields, into that hemisphere. Perverse to the logic of the 'facing' hemisphere of the planet....yes, but there is still some evidence to suggest this may be more likely than not, that is, that the 'southern' polarity will be the attracting focus for any solar expulsions. The issue for all is where, precisely, will be the southern magnetic pole near the end of this year. As had been noted in previous Shape reports, the [torroids] on [earth] will be going [walk-about].

## ***Markets + GlobalPop + tptb + Populace/USofA + press entities***

### ***What about 'precious metals' over 2012?***

{ed note: a very broad archetype that brings in all forms of uses including monetary. We are concentrating on this latter, though note that there are many data items suggesting that upcoming = soon-to-be-leaked energy devices will propel the demand for precious metals. }

The data sets within both the populace entities and the Markets entity for the [precious metals] {ed note: increasingly bound to 'rare earths'?} all include a primary support for a [crisis] in Spring (northern hemisphere). As this [crisis] is showing for May and late Spring into [near Summer/solstice], it seems safe to presume that the current-as-of-this-writing assault on [pricing] of [precious metals] is this [crisis]. IF SO, then the data

would indicate that in [Summer (northern hemisphere)], the [powers-that-be] and their [economic minions] will be [trying to force illness (upon the price in FRN\$)] and further to [retain low prices] through to [Fall (northern hemisphere)]. The data sets are quite clear in stating that this is an [attempt] that will have [tremendous power] behind it, yet it will fail as [hyper-inflation] will manifest, albeit, in a [strange form]. Further the data suggests that [worn green (US dollars) ] are going to be at the [center] of a [great struggle] over the [waning days (and hours?) of Spring (northern hemisphere)]. The data sets clearly indicate that [severe hardship] will [descend] on [dollar (based) economies] as Summer starts.

The data sets contain several bespoke references for a [three/3 month] period in which this [struggle] with [ignored illness (within the system)] is [denied vigorously]. The data sets are saying that nowhere will the [shrill voices] be more [denying] than [on american teevee]. These data sets would seem to indicate something of a [final frenzy] of [false patriotic fervor] on the part of the [propaganda whores of the msm]. There are sets going to [frothing (at the mouth)], and [spewing guests/opposition (with spit and invective)]. The idea is that the [linguistic tone] of the [msm] will become [so rabid] and [verbally abusive] of [any and all opposition or disputations] as to be [lambasted] by the [planetary populace]. The data reads as though the [daily spew] from the [msm] is just [so outrageously false] that the ['raggers' (video bloggers)] are waiting to [pounce] for the [juice bits] for their [parody video work]. This situation seemingly sets up a 'feed back loop' situation in which the [media (msm)] will be [tortured internally] as they [recognize] their [own vulnerability (to satire and ridicule)] and begin a rather [strange] form of [self-censorship]. This no win [media war (indie vs msm)] is indicated to last for over [3/three weeks] as the [msm] wrestles with an ['appropriate' response]. The data further indicates that the [sniping wars (msm vs. indie video artists)] is somewhat curtailed by [terra intrusions] including a [big eruption (volcano)] and a [big rip (tear in land)].

At the end of the [denial of illness (systemic to monetary/financial system)] period of [3/three months] {ed note: likely begins in very early June}, a [striking/shocking] episode is showing as [being disruptive] to [digital/paper debt markets]. This [shocking/striking episode] is focused on [3/three (way?) fish]. The data is showing that [fish] will [cause/initiate] a [rupture] in the [bowels] of the [monetary system]. {ed note: anytime that we get archetypes containing bodily references, we pay close attention as these are prime archetypes within the system.}

Further references within the [fishes] sub set show that [global fisheries (collapsing)]

and [exceptionally poor], and [disgustingly mutated] sets are at the primary level of support for the [end of the denial of global illness]. Noting that there are repeated references for [no fish], and [empty harvest], and [worn hands(?) yield hunger], the data sets are explicitly stating {ed note: correct or not}, that it will be [empty oceans/bad fishes] that will [rupture] the [shell of denial] about the [systemic rot].

The [stink of the fisheries] is an important temporal marker for the [precious metals] both as [money], and as a [market], in that this is coincident with the [transfer] of [precious metals] from the [private hands] to the [national interest].

ED NOTE:As forecast in previous ALTA and Shape reports, the data has always maintained a [stealth] or [taxation at the point of transfer] form of [precious metals confiscation]. It is here this year. Likely beginning in early July. This will be coincident with a major [failure] of the [paper debt markets] and the inception of a form of [hyper-inflation]. The [hyper-inflation] is described as being [strange] with [layers/types], and [levels]. The data sets are unclear, but may be describing a situation in which [cross border hyper-inflation] exists with [multiple currencies] simultaneously.

The data suggests that the [reconciliation (to historic norms)] of the [silver to gold ratio] will begin in July. Note that this will NOT be a good thing as the data sets are indicating it occurs against the larger problem sets of the 'economy' at a global level as is discussed below. Also note that, in the opinion of HPH, people would be seriously deranged to trade any material object for paper currencies or digital representations after mid June. The reasons will have become obvious by mid July.

***Populace/USofA + GlobalPop + tptb + Markets + press entities sets***

***How does the economic crisis of Summer (northern hemisphere) affect the Populace/USofA and (European) GlobalPop?***

As the [systemic crisis] unfolds, the data sets (as modelspace is progressed through summer) have large levels of growth for the [unfinished social contract] that will [come unglued].

There are interesting dichotomies within the data sets. As the [(greater) social contract]

with the [officialdom/minions] comes [unglued] due to [the-powers-that-be] having [corrupted] the [contract] centuries ago, there are indications that the [people] begin to [construct (with no craft/masons)] a new [social order] from the [human to human] level. This trend is indicated to arise as the [social order] and [social arrangement] with the [oppressors (tptb and officialdom)] begins to become [visibly disrupted].

Some of the [disruptions (of the) social contract] are shown within the detail sets as including temporal markers for [mild (social violence/reproach)] that will include [press (whores) = teevee personalities] who will be [assaulted/roughed up] while [at dinner] and [in transit]. The data sets are indicating that [food assaults] against the [teevee press personalities] will be so [common] as to [create betting pools (which teevee whore will be 'spaghetti-faced' tonight?)], as well as to cause [hiring of body guards]. This response on the part of the [teevee press whores] of [hiring mercenaries] will end up (late in Summer) causing yet another level of [escalation] as a [teevee press whore] and [her/his cadre] of [mercenaries] will [incite a riot] that is indicated as [involving a downtown core area], and [producing wide spread destruction] as well as [breaking bones] of [all parties concerned/involved]. {ed note: much of these details point to early July.}

Additional details within the [collapsing social contract] sub set include a description of a [member of tptb] who will be [driving (with a minion)] and they will reach the end of a [long and dangerous journey (risk of being found out/seen?)] when, just as they start to [relax their caution], their [vehicle/car/limo] will [hit (and maim/kill) someone] right at the [(secret?) driveway/entrance]. Understandably, this causes much [consternation] and results in an [incident] in which the [minion] and [his/her boss] are [outed/discovered] and the [plot (whatever it involves)] comes [undone] in a rather [spectacular fashion].

These and related details for the [disruption/destruction (of the imposed) social contract] show incidents that will become [visible] in which [minions], and [officialdom], and in at least [three/3 cases], [tptb] will be [mysteriously killed]. In these instances the data suggests [paid turncoats], or [bribed minions] will be the [responsible agents]. The data sets seem to be suggesting that [some members (of) tptb] will use this period of [upcoming (induced) chaos] as [cover] to [settle old scores]. {ed note: these tptb are not nice people and have a long history of fucking over not only the general populace of humans but also each other.}

These data sets are painting a picture of an emerging [social boiling point] in which [bubbles] of [resentment] and [actions (both appropriate and not)] will alter the [social

milieu] in a [noticeable] and [distinct] manner. The idea is that at some point, it became impossible to [continue to deny] that [revolution is **on/active**].

Now, while noting that [tptb] and their [officialdom] are all [trapped in a duality (over revolution)] as they both [desperately desire] and [intensely fear] the [revolution] {ed note: the chaos is necessary for tptb, but it is also their point of maximum personal risk}, several apparently unrelated [social] and [planetary/solar system] events or trends will emerge to [thwart] the [unleashing (of the planned, gov't traps = opportunities to riot/protest)]. Yes, there are repeated sets that indicate that [tptb] and their [minions/officialdom] will [win the first rounds] {ed note: especially here in USA} as they [provide opportunities for rioting], however, [the-powers-that-be] and the [minion class] have already (as of this writing) made several [critical errors] in both [assessment] and [judgment]. These will lead to a very [unexpected] lesson in [appropriate thinking] for [tptb]. This should be [visible (in the alternative media)] by late Summer (northern hemisphere).

There are a very large number of indicators within the data sets at the primary and secondary supporting levels **within the detail sets themselves** that are indicating that we have reached something of a 'denouement' or [crescendo period] within our (humans') relationship with [tptb] and their agenda. This is seen within the data at several levels within individual entities, but also at meta data levels where patterns are now starting to overlay similar patterns within smaller sub sets in a fractal, or scalar manner. As an instance, if we slice across the GlobalPop entity, the Populace/USofA entity, the TPTB entity, and the Markets entity all at the same levels (primary, or secondary et al), we note that the descriptors at that level all share common sets of attributes. An analogy would be going to a casino, and playing each different kind of game that they had, and within each (roulette, blackjack, slots, et al) having the same numbers repeatedly appear in a similar trend.

In both the GlobalPop and the Populace/USofA entity, the data sets indicate that [many young people] will [behave (against counsel ((\*such as this)))] and will [act rashly], or [full headed (of hormones<sup>1</sup>)], and will become [embroiled] with [tptb/minions/officialdom]. As this is what [tptb] [desire], for a while, all will [seem well and happy in ptb-land].

---

<sup>1</sup> Some suggestion that tptb/minions will use 'aresolized hormones' to 'induce upset/disquiet/disruption' that will be designed to [breakdown personal inhibitions].

Parts of the detail data sets read as [battlefield reporting] in that they provide a [running commentary] as modelspace is advanced through Summer and into Fall (northern hemisphere). The flow of the detail sets over this period take us, collectively, from [contention] and the [breakdown of the social contract (with tptb)] into linguistic sets under the archetype of [advancement/progress\_toward\_goal]. This descriptor set includes primary support of [fulfillment (of ) goal]. In the Populace/USofA at this point, the primary support comes from [energetic changes], and within GlobalPop it is [foundations (for building changes)].

It would seem that the data is forecasting a period after [tptb] have [won the first round] and [arrested tens of thousands illegally], that the [breakdown of the social contract] that [the-powers-that-be] have [imposed through deceit and force] is broken down enough that it no longer causes [hesitation] in the [minds of the populace]. The detail sets provide hints of a few instances where [tptb] and their [body guard cadres] are [reduced to pink slime] by [pissed off locals] when universe provides [opportunities]. Note that in one of these instances, likely the one we can tag as [southern], a [cache] or [satchel] of [powerful materials] will be [taken] by the [locals]. These contents will later be [disseminated], and they will be truly [disgusting] to all humans. These [contents of revulsion] are indicated to have something of a long term role in the continuing 'readjustment' of the relationship between [humanity] and [all the other fuckers including the-powers-that-be].

Of course the [enraging center] of the [social contract breakdown] is the [federal reserve cabal system] which will be essentially destroyed over the course of [Summer (northern hemisphere)] such by the time that the [faux elections (USA)] are reached, the [federal reserve criminals] are [no longer safe in public], and are described as [prisoners (of their) bodyguard cadres]. After the many [(public) direct actions] against the [federal reserve cabal members] including the [widespread (planetary?)] dissemination of the ['wanted posters'] of the [cabal members], the data suggests that [extraordinary (dictatorial?) regime 'codes' (EO's?)] will be brought into place making it a [crime] to [have/possess/distribute] any [pictures/representations] of any [officialdom minion]. This is a very large temporal marker as it is indicated to occur near the point that the [gov't/officialdom] will [seize (probably quasi-legally)], all of the [media (not currently under their control)]. Much of the impetus for the [media seizure] will come from the [rioting] and [inter-urban battles] of Summer (northern hemisphere). The moves to [complete control (hahahahaha)] of the [media (not only msm)] will be [begun] during the [governmental/officialdom retreating action] in late July or early August. This will be as [officialdom] is trying to [alibi] the [unexplainable deaths (of the children/young

people)). {ed note: about one third of the data is involved with dead protestors, and one third is ambiguous, but the last third contains [radiation] as an associated keyword.}

As modelspace is progressed through June and into July, the [economic chaos] shifts over to [active destruction/breakdown] of many [national systems]. The data sets under this descriptor include [electrical service], [health care], [just-in-time delivery], as well as many of the [monetary sharing arrangements (nationally)]. {ed note: data suggests a total breakdown over a couple of months of the states-to-federal gov't \$\$\$ sharing deals.}

As the [national monetary cooperation agreements] come [unwound], or, as is described in some cases, [violently explode/implode], the [populace] is indicated to be [tense] and [strained] as the [msm propaganda whore press] does their [job/role] to [excess]. {ed note: quite clear here...watch out for egregious hyper pimping in the media over summer globally....remember, 'media whores are lying when their lips are moving and their eyes are open'. }

The full-on [pressure (from media) assault] against the [populace/usofa] over late June through July is indicated to produce some very interesting [free video] of [personal confrontations] in August. {ed note: in the future, 'free' media will not mean 'without cost', but rather will come to mean 'produced without tptb control'. }

As the [planetary dollar based economy unravels] in June and July, the natural response to the [rapidly shifting conditions] within the [north american continent] is indicated to cause several [visible] changes. The [borders of USA] are indicated to be [virtually closed], but curiously NOT by USA officialdom, but rather by Canada and Mexico. In both cases it is to stop a [flood] of [economic] and [political] [refugees]. Many data details suggest that some [spectacular stories] will be emerging that will be [negatively pimped] by the [msm propaganda media whores]. The idea coming across is that the [TSA (terrorist suspicious agency)] will attempt to take over [all transportation] and [border functions] by late 2012, but along the way will be [making news] for the [msm propaganda media whores] as they will [adopt] the [IRS/infernal revenue system] approach to [terrorizing stories] to [enforce compliance]. The data indicates that [pictures of fleeing families (found raped/mutilated/robbed)] will be [used by TSA/officialdom] to [control cross border flight]. Of course, the data indicates that these will be [officialdom prompted, created incidents].

Within the vein of the detail layers pointing toward [officialdom terror stories] are hints that the [gov't/officialdom] will be [caught out] in some [glaring lies] as some of the [pictures] showing [victims] will actually be [recognized] as being [people (illegally) arrested (months earlier) during protests].

As modelspace is progressed through Summer (northern hemisphere) and into Fall, the [central banking cabal (globally)] is indicated to hit the [second round/wall] of the [knowledge crisis]. As the data describes, a [wave of revealings] about the [elite] and [money] and [corruption/murder] all leading to [enslavement] will be [washing away] much of the [ability] of the [central bank system] to continue. The data sets point toward the idea of [curses] against [paper money] as being [death skins (?)] becomes so prevalent that the [commerce (of the corporate world)] is shown [staggering] and [lurching] in a [visible (within msm)] manner by Fall.

Some of the [sun changes] sets include wording around the idea of [shattered energies] that would seem to be [fragile] due to [rigidity] much in the same was as glass. These sets include supporting sets for [out flow], and [all bodies sweat]. We note that this last [sweat] reference is specifically focused on the [sun] and [solar bodies], and is brought into the picture by the SpaceGoatFarts entity. Further, the [sweat] sub set is internally linked over to [sweating bodies (here on earth)]. And within the [sweating bodies] here on earth sub sets, some are due to [heat] issues, while others will be [sweating] due to the [release of insight/knowledge] to the [global populace].

The [sun changes] sets include a number of descriptors painting pictures of [dispersed humans] who will be [stopping to wash bloody wounds] while [walking away (from) destruction].

Over 60/sixty percent of the [destruction] set supporting sub sets are referencing [nourishment/foods]. These sets are describing the [increased radiations (including unknown energies from space)] as being [causative] to a [spreading change] in the [production of foods]. These sets in their turn contain references to some plants [run amok] with [flowers] and yet [no fruit]. There are a great many sets pointing toward [famine] and [disease] as a result of the [solar changes] {ed note: and 'time' changes} that will [affect food crops]. In some of the [famine] sub sets there are indicators that the [elite's food granaries] are [opened and distributed]. In at least one instance the [facility] will be [opened to the people] by those [charged with securing it for the elites].  
Hmmm...not much loyalty at the top.

Also cross linked to the [famine] sets are many data sets related to [climate change] as an [affective agent] for [populace dispersal] and [food crop production]. In a few of the detail sets we do note the soon-to-be-visible [food production buildings] that the [mega giant control freak corporations] will be [touting] as the [savior of the planet]. ED

NOTE: please pay attention to the use of language from the-powers-that-be and their minions the corporations over this next year. Whenever you are offered a [savior], please remember this is for [willing slaves only]. And also please note that our data shows that an upcoming [visible-within-msm] incident will show just exactly how the-powers-that-be feel about, and treat their [slaves]. This incident will be so [bloody] and [terrible] that it will not be shown on teevee, but you will both hear about it, as well as discover that the [teevee stooges (of the-powers-that-be)] will (surprisingly) be [at great pains] to [deny the rumors (of blood drinking 'sacrifice')].

Also note that the-powers-that-be and their minions (will be in the near future) suddenly, and greatly surprisingly, [exhorting the populace] to [sacrifice] for the [nation and 'god']. When you hear this language, you will know that [the-powers-that-be] are [speaking not of the recent past (as they may say)], but rather of an [imminent occurrence]. This, by the way, is one of our last temporal markers within the-powers-that-be entity. Oh, and the [sacrifice for god and country] rap will mean [cover my ass while we beat feet outta here]. There is a 'good' side to this temporal marker in that the data sets point to the [abandonment] of the [political minions] to the [crowds] and the [concentrating of power] around [money and military]. Many of the supporting sets for these resolve down to [guns, grub, women, holes-in-ground]. Please note that the majority of the [women] references, over 90/ninety percent, within the-powers-that-be context come down to [sex slaves/distractions/tools], or [breeders]. Again we note that the-powers-that-be entity shows a shift into open [resource grabbing] that will include [vanishing women] as well as [vanishing food stocks]. In the [food crops] sub sets within the-powers-that-be entity are repeated references to [secrets (about to be) revealed] in which (shock!horror!) it turns out that the-powers-that-be have had a [three/3 generations (65 years)] active plan for this year. And, it seems, much of their, the-powers-that-be, consternation and [fear] has been around [energies from space].

Further sets within the [energies from space] sub set describe [barren plants], and [barren soils], while others indicate a [sprouting (in abundance) of (new) life forms (within plants and plant-like beings)]. A number of the sets for the [new life forms] include [mountain tops] and [oceans] as the sites. Some of these [new life forms] will [excite] enough interest to [break through] the [deluge of information] that is indicated

to be [flooding the planet].

As a supporting sub set to the [information flood (that undoes so much political 'gain/'face')], the [markets] at the [global level] that are [dollar participants] are described as [coagulating (into sludge)]. Further, the [sludge] is described as [smelling (so) bad (as to) induce vomiting (to those near)]. Again, within the supporting sets for the [sludge (remnants of derivatives boiled down)] are indicators for at least [2/two (very) public deaths]. These [public 'suicides'] are also internally cross-linked to the GlobalPop entity where the temporal echo seems to point to a [demand] from [china/chinese officialdom] for the [surrender] of [several derivatives 'salesmen'] for [trial and execution]. This [demand note], or [officialdom document/claim of fraud] is indicated to arise later in Summer (northern hemisphere) as the [Bo incident] heats up even further leading to [giant international financial squabbles]. In turn the [claims/demands] from [chinese officialdom] will come back to the [usa] for an [election interruptus episode].

The imagery affecting the whole of the [planetary economy (as it relates to dollar based markets and financial scamming by the federal reserve crime organization)] is of [noise and shock] from [both] the [top] and [bottom]. The detail layers paint a picture of the harried [msm propaganda lying editors] who will have to try to [spin] the [desperation] that will be [visible-within-msm] in both the [populace (aka bottom)], and the [parasites (top/banksters)]. The data points to something of a [conundrum] for the [msm lying propaganda whores] as almost all of the real [news] of [summer here in the northern hemisphere] will be material that they are [forbidden] to [broadcast]. Staying with the plight of the ['news' editors] at the [msm propaganda lying whores bordellos], the data suggests that by late July and early August, the [msm] will be [forced] to [address (their) failures] of recent [years]. There are indications that the [EPISODE (involving old men with beards – 'nuf said 'til it happens)] will [compel whole communities] to [repeat the experience] in their [local environments].

The data sets for the [economic/dollar death] continue to bring in support from aspect/attributes sets including a [trial] that will bring out an [unexpected noise filled response] that will [shock] the-powers-that-be and, more importantly, start a [flight] of sorts of [minions]. This period is indicated to be [visible-within-msm] in that they will be forced to discuss some very [high level resignations] in which the [resigning parties] will [not be seen (on msm)].

Of the new supporting sets for both the Markets entity and the Populace/USofA entity, the area with the largest growth in both impact and intensity values is the descriptor of [shock (discovery/noise/news rolls over humans in masses and results in disturbing the national/planetary equilibrium)]. This [shock] sub set contains numerous supporting sets for [fear] and [social disarray] that ALL are themselves supported by [shock (of discovery) of extreme poverty].

These and other, interlinked, data sets are describing the [shock] of the [thunderous noise] that will [roll over] the [american (sleeping) populace] this [summer] in such a [violent manner] as to [awaken the masses]. The problem is, of course, that the [masses of the american populace] will not like being so rudely awakened.

Noting that the awakening is actually a process, and is already engaged, the data is referring to the first of the [visible-within-msm] evidence of a [mass awakening (to *some* of what is going on)].

This [stirring of the populace from slumber] is indicated to [cause] all manner of problems.

As some of the [undigested meals of (past) history] are [regurgitated] by the [information flood] overtaking [humanity] this [summer], the data sets are describing a [global discussion] that will [commence]. Here at HPH the term being used is [talanoa] from the [polyneasian] understanding in which a [telling (of the stories) of personal suffering] are used as the [basis for community healing]. The data sets are pointing to a [planetary talanoa] in which [discussion of the suffering (at the hands of priests/bankers/officialdom/politicians/tptb)] will actually [spark] something of an [intellectually confusing event], that may involve [video capture] of [vibrational interference (with a lifeform/person)] that will also be [seen live].

Without regard to the more [woo-woo] components of the [talanoa], the data is quite clear in that the [effect] while [positive] over the next few years, is [without precedent] in its [impact on humanity], and is based (initially) on [fear] so [shocking] as to [incite insane behavior] in [tens of thousands (of people)] across the planet. The descriptors include [realizing (the seriousness of the situation), induces suicides and murders], and [examination of the laws (all of them, including the [imposition of the UCC])], and [disclosure (of financial crimes) by politicians en mass], and [doors (to) personal

madness], and many more of the same vein. The idea coming across is that those people still trapped in the illusion of 'normalcy' will be [receiving] a [shock so large] as to [destroy (for all humans)] the [illusion of the USA dollar and the 'american dream'].

There are several sets indicating that the [shocks of Summer] to the [american populace] will induce a [rapid response] that will [not be (to the liking) of tptb/officialdom]. This [rapid response] is NOT any form of 'instant savior new financial system bullshit'. What is being described is a [discussion (at the national level)] of the [delusion (of the previous) political system (and other systems such as the federal reserve crime system, and the lobbying-as-institutionalized-bribery system)].

The data sets describe the [mental impact] of the [economic 'events' of Summer (northern hemisphere)] as impacting the [populace] as though [struck (dumb/senseless)] by the [airwave/shockwave]. Further support goes to [reeling], and [staggering], and [vomiting (from the realization)]. Other data in the same vein continues to accrue as modelspace is progressed from June through November, with the largest level of accretion during the July/August/September period.

The data sets include [desperation] causing [large scale population behavior changes] {ed note: perhaps the most frightening to the parasites on our collective backs}, as well as [abandonment/repudiation of debt burden]. This last is part of a [global initiative] to [hand back the debt] to the [bankster cabal]. Further efforts along this line will be attempts to [collect the 'national debt']. Note that this will be a [people's initiative] to [collect (on the debt the banksters owe for social services)].

Further data associated with the [on-going economic warfare against the populace] include [frightening shocks (to the financial system)] that will [ripple through the populace] as the [just-in-time delivery/warehouse system] collapses. {ed note: this is a GOOD thing.} The data sets indicate an [instant response] and [rebuilding] of [local economic bases] around the [globe] as the [realization] that the [wicked witch of bankster occupation] has [ended]. Please note that this data set does not apply ubiquitously across the populace simultaneously. It is a process. Therefore the population will experience this at different times, and in different forms, however, the data does show that a [dawning global realization (of staggering change)] does take place over the last half of 2012 that will result in [millions] of [people] just [abandoning] the [parasitic power structures of the 'former elites']. Also note that this is not an 'instant golden age', nor any other form of 'channeled bullshit'. Instead the data is describing

quite clearly a period of [extremes in opportunities] as well as [extremes in screw-ups]. Without the pyramidal parasitical power structure imposed from above, humans are free, to advance, as well as fail in new and unique ways. We will certainly do both.

The universe is indicating that it will be helping humans to advance in their [personal development] in that it will be placing so many [prompts to action] kind of events into play over these next [4/four months]. Note that this does not mean any easing in the fifth month, but rather that these next 4/four months are specifically a period of the [boiling (of all the ingredients)] before we will call it a 'stew' in Fall. These [ingredients (in the social/economic mixture)] are to include [states (fighting) other states (with words/money)]. This is slated to occur both in the Americas, as well as [globally]. The idea is that at the [root of the state versus state/federal government disputes] will be [money], and the [ability of some states/areas/regions] to [generate it] and [others to spend it].

This [inequality] of [net distribution] shows up as modelspace is progressed into June. Further, for the [americas], the [states] are indicated to soon be [in active contention (legally, en mass?)] with the [concept/core of (federal/corporation governmental dominance (of local resources))]. The data sets are pointing to a period starting this June when the [shock of economic disaster] hits so hard as to [cause bits and pieces (the body sheds limbs)] of the [dollar/banker empire] to [fall off]. There are continuing accrual patterns indicating that the [far west states] of the [american empire] will be the [first to leave]. We have specific data references to various [different bespoke (celebrated cause of action)] that include [air flights/air quality/water rights/military problems for Hawaii], [gold rights/energy rights/radiation deaths for Alaska], [radiation pollution/land/water rights/air quality for Washington], [Oregon has a 'personal' issue develop which defines their fight as the 'feds' are indicated to 'publicly murder' a local activist], [California just goes bankrupt]. The [California] sub set shows that the first [alternative (west coast of north america)] to [federal elections] will be discussed before September as a part of the [breakdown] in [california to federal govt relations].

Of course, before any [insight] and [awakening] of the [populace] can occur, we must progress through a period of [rampaging confusion]. {ed note: as if we have not been doing this for years!} This [confusion] is described as being [planet wide] as the [information flood] causes [breakdowns] both in [personal/collective relationships (previously based on lies)], and also [personal internal mental integrity]. This last is a sub set that is part of the supporting sets for the [impact (of) poverty shock wave] that will [roll over] the [american populace (more so than others, but all federal reserve

dollar based systems will fail)].

### ***Terra + GlobalPop + SpaceGoatFarts entities sets***

#### ***What about Terra intrusions on human thrashing around this Summer and Fall?***

Curiously, the data sets within the Terra entity and the Populace/USofA entity both contain directly held sub sets for the descriptor of [chemtrails], with a primary supporting set of [hiding sun from view]. These data sets are specifically focused on [north america], however, there is a sub set within GlobalPop entity that is connected via cross-links that also holds the same values, though focused on [northern europe].

In all these sets, cross-links back over to the Markets entity are terminating in [rupture (of the banks' currency)] as being a [determining factor] in the [reduction] of the [global chemtrails] program. The word [reduction] is further supported by sets indicating that as the [financial pressures] are [impacting (the) chemtrails agenda], the-powers-that-be will be [pushing] for [an all out effort] for the [Summer and Fall (northern hemisphere)]. These sets contain large numbers of supporting cross-links over to the SpaceGoatFarts entity where many of the terminating points are within the [alien wars] sub set. Again, however wrong it may be, the data sets throughout all the entities have some form of [alien wars heating up] language accruing by September.

Without regard to the [alien wars] component, the [chemtrails so thick as to hide the sun] language is very explicit. Within the supporting sets for the [chemtrails] descriptor are linguistic structures going to [threats (to the) regime in power], again let us note that this set also has cross-links over to [alien wars]. Further the [regime] is apparently [threatened (by)] both [space based] and the [sun]. Somehow the idea that [chemtrails], from the perspective of the-powers-that-be, will [protect] the [(planetary) regime] from [collapsing].

In spite of the [chemtrails] sub set 'bubbling up' in modelspace in such an odd area, that is outside the SpaceGoatFarts entity, most of the [planetary intrusions] onto [human consciousness] over Summer and Fall (northern hemisphere), are showing as involving various other forms of [obscuring clouds]. These sets point toward [volcanoes], as well as [space based (intrusions)] into the [cloud making processes] here on terra. The dominating theme is one of [inland occulting (of the sun)]. Most of these sets are also

directly geographically supporting [large population centers] within the context of the [coagulation] of [THE effort]. This last is an indication that [some reason (economics? Political? Climate? Space Aliens?)] causes the [chemtrail program] to be [reduced] in some areas while others are [heavily increased].

Ed Note: Living in Puget Sound (Pacific NW of North America), where we have a high density population, these words are tough to take, excepting that it is good that chemtrails are at least being reduced somewhere....if not over your (my) old bald head.

Much of the [increasing pressure (from chemtrails)] language seems to be focused on [southern california] and [north eastern corridor]. There are some sets for [mid country], including [chicago] and a large swath down to the Gulf. The greater sum of intensity values indicates [southern california] is to be the [primary target] over this Summer and Fall.

While the [chemtrails] are cited as a cause of [occulting the sun (hiding from view)] the Terra entity is suggesting that across the planet, the primary issue for [Summer (with a near term peak in early September)] will be [volcanoes]. Not only are [smoke], and [ash] referenced repeatedly within the supporting sets, but they also include [gases], described as both [maiming], and [deadly]. These [deadly gases from volcanoes] are further described as [interacting with] or [catalyzing] some [unknown] in the [atmosphere] to produce [long lasting], and [obscuring], [fog] or [cloud] like [bands] that will [drift about].

In all of the [obscuring clouds] sub sets, including in the Terra entity, are links over to the Populace/USofA and GlobalPop entities where we have terminating sub sets of [fashion], and [clothing], both of which show [lower face masks], and (some form not quite well described of a) [nose/mouth breathing shield]. These [adaptations] to [polluted air] are further showing as being a real pain for the [fascista gov't officialdom types] as the [air] is so [obscured/occulted/polluted] that the [masks] are [required], but they will [render ineffective] much of the [surveillance devices] recently installed.

By way of further notes from the Terra entity on some of its intrusions into the human comedy, the data sets are pointing toward some kind of [marine/ocean/salt corrosion] that will be [blamed] in [england/scotland] for the [malfunctioning] of various [camera apparatus]. In some cases this may actually be true, but from hints in the data, it appears that the [scottish populace] {ed note: likely the beer drinkers} find a new meaning to [piss off (the powers-that-be)]. The data indicates that some in the [surveillance

business] will have a busy Summer learning that it is difficult to make video cameras work when their connections are continually swimming in urine. And as an aside, the data forecasts a few stories in which the 'tag line' will be that the [fine] for [public urination/drunkenness] is far less than for [destruction of crown property].

As a point of further curiosity, there are repeated references to the [crown] as in [claimed right to rule]. This is specifically NOT referencing the 'crown' as an abstraction for the 'law', or 'state', but is actually pointing toward the [claim of royalty (by) windsors]. Further, within this sub sets supporting structure are sets going to the [claim (of crown)] of the [vatican/sorcerers]. These sub sets are very unusual within the Terra entity. As modelspace is progressed, the data sets point toward [towering clouds] that will come [across the oceans] to [blanket inland areas].

The movement of modelspace across June and into Summer (northern hemisphere), has accretion patterns that suggest both an increase in [active volcanoes], as well as [land building eruptions (without known volcanoes in the area)]. This last is likely almost exclusively an [underseas phenomenon], however there will be at least one instance in which the [unexpected eruption] will [build new lands] in sight of the [msm], and the [media whore-propagandists] are indicated to broadcast the event, if not a correct understanding of it.

The Terra entity has other sets that are headed by the descriptor of [sinkholes] that we have been noting since 2005 as an 'up and coming' [planetary threat]. Now the data is indicating that a major part of the expansion of the planet process will produce a number of really [spectacular] and [horrifying sinkholes]. These include the [consumption (of) complete apartment buildings], as well as at least one instance of [destruction (on or around)] a [sports stadium] such that [events are canceled]. This last is indicated to be [visible] within the [msm whore-propagandist press] by late in Fall (northern hemisphere). The data sets would seem to be suggesting that the [sinkhole eats soccer stadium] episode/event will be in [eastern europe].

Other sub sets that are within the [inland occulting/obscuring (of the) sky] include sets that go to the [transformation] of large parts of [north american continent] by [fire]. The data sets have a very large level of support for a conjunction of sets including [fire] and [transformation]. The [transformation] sub set is itself further supported by [transition into (new state/form/kind)]. These sub sets also gain support from internal cross-links within the Terra entity indicating that [fires] due at least in part to [long term droughts]

will be so [prevalent] in Summer 2012, that major parts of the [north american infrastructure] will be [disrupted]. These [disruptions] are shown as including [roads/inter-state highways] being [closed] for [indeterminate periods], and [crowds ] of [ displaced persons] looking over the [distance] at the [massive smoke and fire storms]. The detail layers of the data sets have descriptions for [long caravans (of fire refugees)], and [tent cities], and [days long (vigils)] as [towns/cities burn]. Note that in the data specific references also show up for at least one [fema camp] that will [burn]. This will NOT be making the msm propaganda whore press as they do not discuss anything that is officially hidden from the populace.

### ***SpaceGoatFarts + Terra + GlobalPop entities sets***

#### ***What about the Sun and destruction here on earth over 2012?***

The combination of the [sun] related data sets from the entities paint a picture of [solar changes] that will [induce], or [compel], the [alteration of circumstances] here on earth. These data sets are pointing toward a [Fall (northern hemisphere)] in which the [sun] takes its [next step] in [internal/external changes].

These data sets include language for a [change (in) solar (respiration)] that will be [visible] {ed note: presuming chemtrails are not overhead} on earth over [several (perhaps as many as 11?) days] in the [Fall (northern hemisphere)]. This [change in respiration] **IS** indicated by the data to be **DIRECTLY** [caused] by [proximate (to an exposure (to nourishing celestial waters))]. This last is a poetic form of the archetypes related to the [alignment with the dark rift of the center of the galaxy]. Now note that the [exposure to nourishing celestial waters] is a 2/two part archetype as it implies by its relationships within the lexicon the [coming out of] or the [return from] the [far side (of darkness)]. {ed note: this archetypical expression is new, and heavily supported. It is also very positive in that it rides at the very top of the 'intensity' and 'duration' values while having a net positive emotive sum.}

These data sets also include linguistic structures for [annihilating any illusions], and [returning (to an original/previous state of being)]. {ed note: this was the same language that forecast the Sumatran earthquake and tsunami some 9/nine months before it occurred. Likely similar meanings now.} Within the detail layers of these linguistics are instances of directly held [alignment (with center)] will [bring out/expose] the [ancestral laboratory/temple]. This last is supported by the idea of an [earthquake] that will be

[participating in a volcano eruption] will [expose the ancestral laboratory/facility] that has been [walked upon (for) centuries]. There are repeated references to [rural] and other indicators that the [location] of the [ancestral laboratory/temple] being described is within an area currently quite remote. Yes, there are some small number of details pointing to the [sphinx] and the [Giza plateau], but given that the [hidden temple (of the ancestors)] is to be [exposed by earthquake], it would seem that the other geographic pointers toward [Kashmir], and [peace valley] are more probable. Without regard to its location, and while some hints will come out directly from the remnants of the [media], the real indicators for the [discovery] will be a [gigantic mobilization] of [planetary military/officialdom resources] that will be [focused (like a lens)] on a [surprisingly small hill top].

Also note that the word being interpreted as [temple] is from the archetype which is headed by [library] or [knowledge store]. There are many other forms of the [temple] archetypes which go to the [religion] or [place of worship] definition. The data sets are not presenting any of these, rather the set being presented ultimately translates as [place of working with intent (concentration of energy/intelligence)]. In this set are references to [work (to clearing the mind)], and [destruction of illusion] and [removal (of) thought (from) mind]. Further down the supporting sub sets for this description of [temple] as [place of intense mind work] are other sets for [science], and [exploration], and [discovery (of universal secrets)]. This variant of the archetypes of [temple] links back to [laboratory] at the primary level of support.

According to modelspace, this [laboratory/temple of the ancestors] will be a [sparkle of interesting activity] during a [Fall 2012 through Fall 2013 (year of dissolution/dispersion)]. The [temple of the ancestors] {ed note: yes this comes from the data} is also described as the [key] or [source] for/of [redemption]. So a pretty big deal it would seem. Hmmmm...while seemingly a bit like the movie 'Prometheus', the data sets are going to a [rush of persons/resources] that will be [draining]. This [draining] descriptor is interesting as it has details pointing to a [visible (within msm) ] questioning of [why now?] as the [resources] are [diverted from crisis aid] to [disappear (seemingly)].

These data sets are also describing a [great consternation] among the [relatives] of the [missing/vanished persons (involved in the laboratory discovery)]. The [relatives] are shown as [kicking up a fuss] as the [vanishing] of these [people] could not come at a [worse time].

Without regard to the [laboratory discovery], there are several other interesting sets that are directly held within the [solar changes (of state)] for the remainder of 2012 that include descriptors for [time flowing], and [being changed]. Hmmm....? Further descriptors with [time] as the object point toward a [flow interruption] that will be [part of] or [participate in] the [annihilating of illusion]. These are directly held sets under the archetype of [time] which is, arguably, the key archetype within human consciousness as we express it in the matterium. So, this is probably a big deal.

Other references within the detail sets for the [changing of the flow rate of time] include the [word (for time)] some how being [split] or [sectionated] due to [on-rushing discoveries]. Also during 2012 the data sets are pointing toward the [sun's affect/impact] on [time] also [changing]. Within these sets are repeated sub sets containing [compressed] and [energy (squeezed)]. Other sets include [energy tunneling], and [vibration resonance (causing) cross currents].

The [sun] producing [dissolution/dispersion] sub sets are themselves internally linked as they come back to the [crossed currents] and the [destruction] archetype that is associated with [solar activity] over the rest of this year and through to Fall of 2013.

From the really clear as mud view above we descend into sets made murky by their very proliferation of details. There are sets indicating that the [sun causes life to disperse]. There are sets for [solar activity induced electrical damage]. There are sets for [destruction of pathways/transportation systems] due to [solar damage]<sup>2</sup>.

There are several supporting sets for [disintegration] which will be [prevented] in [some cases] by the [strong (energy?)] that will be [dampened] by a [counter (or cross ) flow].

There are repeated sets within the GlobalPop and Populace/USofA entities for [distributing (the wealth)] that will occur simultaneously or within the context of the [sun changes]. The data sets show that some of the [distributions] will be [voluntary], and others not. This will vary with [geography]. Most of these sets are split between

---

2 The [destruction of transportation] language has specific references to [northern hemisphere air flights canceled/curtailed] en mass due to [radiation] in several forms including [solar] and [fukushima]. Further there are sets indicating something of a [desperation project] on part of [airplane manufacturers (civilian and military)] to [retrofit] various [radiation protection schemes]. None of these show any success words in the data, but it may yet be too soon. The idea is that [global air travel] is put at [risk], or [seizes up] in Fall, 2012.

representations of [wealth] as [grains/foods/supplies], and others where the [wealth] is described as [insight] or [knowledge].

Detail sets accumulating to the [sun] archetype as modelspace is moved through [summer (northern hemisphere)] include [winds (from space)]. These [space winds] have several different levels of descriptors that include some which say that [space winds] will [blow over (throughout) earth's atmosphere]. This is also described as [the unexpected] that will [come true]. Curiously, there are supporting sets for [nourishing], and [rising/uplifting] as [impacts] of the [space winds] flowing through the [atmosphere]. Other levels of supporting sets are also headed by [space winds], but in this case these are describing something more akin to a [galactic wind (unknown energies from damn deep space)] that will [contribute (something new?)] to the [solar display].

Within these detail data sets are descriptors for a [strong] and [bold] [woman] who will be [at the center/nexus] of the [galactic winds discussion] at a [global level]. This [female personality] is described as being [decisively insightful]. We will know her when we see a [debate] that will take place within the [msm propaganda media whore press] in which the [strong woman] will [eviscerate] her [opponents]. The appearance of this [strong female personality] on the [global media stage] will be a very significant temporal marker for a WHOLE LOT of SpaceGoatFarts forecasts. Think of this [intellectually dominating woman (of late summer/early fall)] as being similar to the [final thread (breaking)] that [causes the curtains to fall] and [reveal] the [stage 'craft'] behind the [scenes presented]. By the way, our clue as to the [female personality] at the [center of galactic wind strangeness] is ['in her hands'].

### ***SpaceGoatFarts + Terra + GlobalPop + TPTB/W + Populace/USofA entities sets***

#### ***What about December 21 – 23, 2012 and earth?***

While it is true that nearly all humans on this planet are front-loaded with some knowledge about the Mayan Long Count end on December 21, 2012, there actually is very very very very little [certain knowledge] about either the Long Count, its ending, and any meaning. There are huge amounts of conjecture and a few, very few, salient points of predictive value from the Mayan civilization(s) {ed note: inca, hopi, and aztec also included here}.

However, given the [msm propaganda whore press] and their [constantly lying teevee], it seemed wise to take another approach in examining the data sets around this issue. So, what has been done is to revert to the lexicon as it was in existence in 2003/2004 when a very large number of [terra] and [space] related forecasts from modelspace were very successful. This was the period in which the Sumatran tsunami and other accurate earthquake predictions were developed months before they appeared.

As the data runs themselves are too voluminous to save, or even for us to store, we are unable to recover any of the longer term data sets from that period, and it is even doubtful that they would be of much use at this point, however, the lexicon is barely over 3/three million words, and the various tunings have all be kept stored over the years. So, given the many changes in the language flowing across the net, the shift into what-seems-to-be perpetual release language, the older lexicons were searched with a view toward finding our 'best' version relative to [terra/space events]. This led to the 2003 through 2005 tuning set.

The current data run has been processed twice for this report. The second processing was against this older, specifically tuned, lexicon. The results of that processing and interpretation produced this section of our report.

Before getting into the details of the movements of modelspace against December 2012 and beyond, we note that the results of this run are displaying very high levels of 'referential integrity'. These checks that are run against the data sets and the lexicon are designed to show 'inconsistencies' within the linguistic sets. There are any number of reasons that such inconsistencies appear, and it has been a real issue over the years in coping with the continuing data shifts. It is worth noting though, that this tuned lexicon produced the highest referential integrity check value seen since 2008 (the financial forecast).

Also please note that the lexicon is a very dynamic structure as new words and meanings and archetypes are added with every report. Soooo....this older lexicon is woefully ignorant of anything that has occurred since its last tune-up date in 2005. Given the subject of this examination of the data sets, that may not be a problem.

As modelspace is progressed into December {ed note: approximately December 19<sup>th</sup>}, the accretion patterns show a very large growth of new sets under the archetype of [union/fusion]. This data set is supported at its primary level with [mass(es) of rain/water (hovering over earth) (in/from space?)]. The archetype of

[fusion/joining/union] also has secondary supporting sets that are headed by [flood]. Hmmmm...probably not good. These secondary supporting sets are correct and complete and are repeatedly filled with [water], [flood], and [deluge]. Further, the tertiary sets are headed by the archetype of [terra/earth] with its support at the primary level also headed by [flood].

As a (likely) not very good note, the archetype of [fusion/union/flooding energy from space] has its core, as an archetype, constructed around [destruction (of the past)], yet another of our favorite archetypes from years gone by.

As modelspace is progressed through Fall and toward December, several areas of growth emerge in sets that indicate that [the-powers-that-be] will be [appointing regional warlords/governors] across much of the [planet] in ['preparation']. There are even some sets that point to a very interesting form of ['disclosure'] in which [the-powers-that-be] will be [revealing themselves (\*as they are?)], and [revealing (their) allies]. However, before David Wilcock and all the channellers of the world get too excited, we note that this will be a [horrifying event] for most [humans] {ed note: real shock to the sheeple}, and is described as a temporal marker for the [last days (before fusion/union/flood)]. Further, the ['disclosure'] will, as noted, be accompanied by [blood], and [saliva] in [great quantities]. Further, and as an interesting note, the [aware observer] may be able to detect the same [smells/odors] that will be [pervasively filling (the) atmosphere] prior to the [fusion/union/flood]. These [smells] are something that the-powers-that-be are described as [anticipating]....at least those few with the [gnosis], and the [senses]. There are repeated sets indicating that [chemicals/pheromones/and???) will be the [excitatory agent] that will begin the [blood flow/quickenening/alteration].

Within all of the core sub sets are a plethora of references to [time] in a great many aspects, each with many modifying attributes. Some of the more interesting aspects seem to point to a situation in which the [head(s) of the-powers-that-be] will be [striding around vigorously] as some form of [preening (attempt) to attract followers]. The way that the data reads it is almost like choosing sides prior to a ball game in a playground. However, in this case the modifiers to the lexical structures are **anything** and everything other than playful as ALL of the [choices proffered] are [horrors (dripping blood/flesh (from) misshapen teeth)]. Hmmmm...eyup, sounds just about right for tptb...

Many of the [time] sets can be read as explicitly warning against [hesitation], and [coming in too late]. These not only apply to the [minions] and [officialdom] who will

(apparently) have to [choose up sides between scum and shits], but these [time clues] as to [not to hesitate] are also applicable to the [global human populace]. In many of these, as in the case of the Sumatran earthquake and tsunami, the data sets advise a [close relationship to/with nature/animals]. The issue of [timing] is repeatedly emphasized within the data sets. The idea that [hesitation equals loss/death] comes across quite clearly. The only hint offered by the data for making an [appropriate choice] is [deep introspection]. Other than this mere hint, all the other data sets are externally focused descriptors.

During the shift of modelspace into December 21, 2012 the data accretion patterns escalate in a manner never before seen within our work. Noting the dominance of external descriptors, the indications are for the collective consciousness of humans to be [externally (out side our abstractions) focused].

As modelspace is moved from early Fall (September autumnal equinox), the data sets accrue huge amounts within the [press/msm propaganda whores] indicating [national calls/demands (by officialdom)] for [unity]. These [national demands for unity] are seemingly NOT specifically focused in any single country, but rather show up with geographic indicators for most countries, as though the phenomenon would be a general trend. This [strident demands (across media) for 'unity'] can be used as a pretty reliable temporal marker for those persons who have made [bug out plans] with the intent of [vacating (developed areas)]. The data sets are indicating that [several weeks (perhaps as long as a couple of months)] of [increasingly strident calls for unity] will be [anticipatory clues/messages]. These [messages] **should** be coincident with the [disappearance (\*from msm visibility)] of many of your favorite [personalities/celebrities/officialdom/minions]. **IF** that does occur that a [discussion] about these [vanishings from the public eye] begins shortly after the [autumn equinox], that will be the [last (sort of by absence) visible clue] prior to the [shift (into disclosure) mode] within [the-powers-that-be] and their [corpo-fascist control structure].

There are a number of sets pointing to a [brief] bit of [visibility] for [SOCs (self organizing collectives)] as they also, [form up, and 'head out']. This is indicated for after the [equinox].

There are repeated sets in support of the [union] side of the [fusion/union/joining] archetype that are supporting the context of [groups], and [new associations/tribes] that will [form up following December, 2012]. These sets include descriptors for many of the

[sheeple] who will be [simply wandering around (seeking) the ruler above themselves/authority]. That there are very large number of sets that all have as a significant minority of their supporting values descriptors going to [lost/can't find it officialdom/authority], the indications are that some component of the [shift] in December into the [flood/union] will [disrupt] the [nation states].

Now, as modelspace is progressed from December 19<sup>th</sup>, over the next week (from Wednesday to Wednesday) to the 26<sup>th</sup>, the accretion patterns hit both the point of most rapid accuracy of new supporting sets, as well as the point of the highest of the referential integrity check sums.

In this week long shift of modelspace, the dominant archetype shifts from [union/fusion/flood] to [fluid motion]. Now note that within our archetype, this also could be [fluids IN motion]. This newly dominant archetype has [thunder/storm/noise/chaos] as supporting sets at the primary level, and [waves, ripples, movements beneath] as secondary support. NOTE that these [ripples and waves] sets are entirely about [water/fluids].

There are no sets within this context indicating any form of crustal rotational shift. What we do have are large numbers of sets indicating [planetary growth/swelling], and [new lands], and [sink holes of great size], and [up welling], and [new mountains (likely underseas)], and others of similar form in great numbers. But nothing indicating any form of [geographic pole shift] here on [earth].

There are a number of sets that have continued to grow within modelspace as it is moved from March 2012 through to March of 2013 that indicate that the [magnetic structure] of [terra/earth] will [change]. However, even this is not described as a [pole shift], rather we have descriptors for [torroids unstable], and [multiple magnetic poles (both north and south)] that will [go walk-about], but these are not indicated to be [flops]. Rather the bespoke data sets indicate that a [time] of [instability (will ) flood] the [plasma core] of [terra] producing [walk-about magnetic pole-like effects here-on-the-surface].

Also, while not necessarily a 'causal' agent, the data accretion patterns for the [walk-about torroids/magnetic poles] are temporally coincident with new sets indicating that in spite of the otherwise [horrific] and [terrifying] conditions attending the [fusion/union] shift over the week of December 19 through 26<sup>th</sup>, there are repeated sets within the supporting structures for [cheerful], and [celebratory mood]. These could well be

accurate forecasts as a giant “whew, dodged that one!” sweeps across the planet, however, the data is not describing this as a [visible-within-msm] type of phenomenon. Rather the sets concisely, and in a focused manner, are stating that a [relaxed], even [joyful attitude] will [bring progress]. However, note that these sets are specifically supported by [disengage (yourself) in time (to avoid problems)], and [errors are avoided], and [acting firmly and sincerely (taking leave (of others who will not go?))], and other data sets in the same vein. The idea is distinct, and clear; [some persons] will have a [cheerful] and [willing attitude] as the [waves ripple throughout matterium]. Will this help? Can't hurt....

Other data sets that accrue during this significant week long period have support for [dispersal] in which [experienced guides lead groups] to [the right course]. This is noted as being against a [background] of a [carnival/harvest festival] like atmosphere in which [merchants] and [other whores] who are [intent on exploiting the situation] will [create/cause bad behavior (in abundance)]. This [bad behavior] is defined as [feasting, drinking, stealing, raping, murder (for self pleasure or gaming)], and, as if that were not bad enough, [vulgar behavior (showing genitalia? (note: not nudism, described as 'fuck off gestures' of a most rude kind being displayed on video as [helicopters] and their [video crews] record [public debauchery]. Hmmmm...probably NOT a good sign.

The data sets continue with accretion patterns that go to the explicit or bespoke reference to [mountains rising up/new rises in lands]. Note that these sets are directly opposite in numeric values to the [sinkholes] sets, and are indicating that the [crust (of the earth/terra)] will [expand/grow] up to some indeterminate point, then the [growth internally] is described as [pushing (the) mountains upward]. These [new lands/rising mountains] sets are temporally linked to [peaks (and peak activity)] during the [chaos] of the ['emergency'].

There are many sets with the [flood/union/fusion] supporting sets that gain new supposets themselves as modelspace is moved into January 2013. At this point, these new aspect/attributes include a large number of descriptors to [humans/life in motion]. These sets include explicit references to [people (amidst the chaos)] who will [in groups] or [individually] be [setting off for the mountains], or [putting themselves into motion] as situation where they were becomes [untenable]. These sets include support in the form of [retreat], [leaving], [saying (farewell to old places) and leaving], [set feet to motion], [walking away], [leaving in quiet solitude].

Further sets within modelspace are referencing some level of minor [visibility] within the msm for the [leave takers]. This is against a general level of [chaos] that is described as being [filled with/chock full of/replete with mental baggage] and [material concerns]. There are also descriptor sets in which the [leave takers/refugees] are described as being [without baggage], [bereft of possessions], [traveling light], and other sets of similar nature. The detail sets paint a picture of [skirting towns], and [keeping distance (from crowds)], and [cautious awareness of mobs].

Within the overarching sense of [chaos] and [retreat of civilization], there are a number of sets within the SpaceGoatFarts entity that gain significant levels of new supporting aspects. These areas include what we have been labeling as [alien wars]. Within this set are some curious references for [open warfare], and [inter-dimensional attacks], as well as [inter-species (non-terrestrial humans) clashes]. Hmmm...did NOT want to find these sets...but onward.

As modelspace progresses into January of 2013, the descriptor sets paint a picture of [officialdom on edge] with [daily lists] of [proscribed words] very much like the dystopian 1984 vision, however this is one in which a [shrinking core] of [corpo-fascists] are [attempting to hold it together] against the larger background of a [planet run amok].

The accretion patterns for the data themselves reflect this discordant time. As with the overall nature of the time, and reflective of the same sort of data duality that led to the [blonds on boats] forecast from the last Shape report, we have duality of data expressions in which the [atmosphere (of the times)] is described as [controlling ones words (out of fear)], and in opposition to that set, we have [atmosphere (of the times)] that is supported by [lashing/flailing/whipping (chaos)], and [so fierce (as to) snatch words from mouth]. It would seem that both descriptions have a very good chance of being accurate.

Within the [officialdom on edge/hyped up] sets are several that are fair-to-middling promising in that they specifically reference [time control technology]....so maybe, just maybe, the-powers-that-be or the high-level-minions or the-shadow-govt-aliens-agenda people will 'allow' the technology to be used to control what the data sets are describing as a [sprialling (out of control = into super criticality)] of most of the nuclear energy plants. There are apparently some nuclear plants that will not be affected and these are seemingly not based on [rod technology].

There are indications that a [big blooey/explosion/electrical disruption of serious magnitude] will occur near or within the LHC at Cern. The data points to an [arc] that will [incinerate] a [very vital piece (of) ceramic]....hmmmm...fuse? Anyway, it will be toasted pretty well according to the data sets.

In general the movement of modelspace into 2013 is **not** attended with lots of 'ascension' kinds of language. And with the small, and focused, exception of the [leave takers groups] the tone of the language is very negative. There are a great number of points of exceptions to the negatively summing language sets. In the main, the geographic indicators that we have for these [not so negative] places are south of the equator, or just slightly north of it.

As modelspace is moved through Fall 2012, and then into Winter 2012/2013, the Terra entity has a primary rising supporting values of [winds] that will be [participating] in the [floods]. The [winds] are described as being [forced down (from above)], and will be [propelling movement (causing diaspora)] across much of the [planet]. In fact, the data is explicitly (or bespoke) stating that [80/eighty percent ] of the planet will have [increased winds] during the [fusion/union/flood] period {ed note: over next 4/four years? Into 2016?}.

By burrowing into the supporting sets, we are able to locate some interesting details that can help us describe the period. The new data sets that accrue from December 19<sup>th</sup> onward have a heavy 'salting' of descriptors for people [living a dawn to dusk life]. These sets have a large number of geographic pointers to northern hemisphere, industrialized regions. The implication is that [electrical failures] have left people without the [ability to extend day(light)]. Further support for this idea comes from repeated sets in which [ships (at sea)], and [in harbor] will be [uniquely visible] in the [dark coastline]. In the same vein, other sets (cross-linked over to the Populace/USofA entity), show [war ships], and [freighters], that will be [tied up (at piers)] and used as [electrical generating platforms]. Further there are other aspect/attribute sets within this group painting pictures of [village like-life] that will [revolve around] the [ships (in the harbor)]. There are word sets attaching [civil] and [administrative] functions to these [floating city centers].

There are a number of sets that accrue for the 2013 period that show a [mature relationship] forming between [earth and sun]. This [changing] between the [sun and earth] is not restricted to [earth], and the data suggests that [night sky viewers] may find

quite a few [planetary surprises] in store. Hmmm...damn...just when my one good eye was able to spot the buggers for celestial navigation...

The SpaceGoatFarts entity is suggesting (to my, by now seriously derranged, mind) the idea that [light squids] will be a [new feature] in the [sky] in 2013. These are not in any way described with threatening language, but rather have a sense of [wonder] about these [strange], but maybe [alive], and [new] [natural phenomena]. Further there is some suggestion in the data that these critters will stick around for a while. Inter-dimensional? Perhaps...data is not specific.

Other strange [space] and [atmosphere] phenomena are also appearing in the data sets as modelspace is progressed into 2013 as far as the 'push' on the immediacy data will allow which is near to May. The [space] phenomena sets include a diminishing impact value as though either the [populace] is [aware] of the [space activity] and more or less just accepts it as background to their lives, or, alternatively, that there is far less population around to care.

### ***Conclusion: Sufficient unto the day...***

There will be a great many, emotionally driven, humans, the majority of them young, who will become very righteously angry over these next few months. The-powers-that-be have set a trap for these young people that preys on their emotional intensity. They will be setting these traps in plain sight over late June and early July. As the events of the [turn of the month] unfold, these traps and their consequences will become visible to the aware observer. Consider awareness to be a prompt to personal action.

Take that kid near you, slap them upside the head, and say clearly, "Yo, dude! It's a trap!"

The-powers-that-be are planning for a [long hot summer] as the economy is destroyed. They anticipate riots, and other expressions of [discontent] from the [body politic]. My suggestion is that we do not have [national strikes], nor protests, nor any form of overt public demonstration.

So first grasp this thought...THEY, the-powers-that-be, are planning for [actions], but are totally incapable of coping with [non-action]. That is, they have no method for controlling the populace unless they willingly present themselves to [officialdom] collectively in the form of [street protests] and [actions]. If the public stayed home,

officialdom does not have the resources to go out to arrest them.

So [non-action] is [effective] in this case.

Riots? Violence? Forget it...that is the game of the mentally incompetent that officialdom (being such) is really really good at...so let us regular humans not fall for it this time, eh? Better things to do, such as [leave taking].

Modelspace is quite clear that the-powers-that-be are on their last legs here on Terra. We the people have ownership of this planet. Time to let the tired old reptiles know that the primates have arrived. The differences are clear. Lizards live in reptile mind, constantly living in fear, creating fear, and dodging shadows. Whereas we primates have been given (thanks?) the reptilian brain, we are individually, and collectively greater than the limitations that narrow our vision into the scaly terror that the 'elites' are trying to foist on us all. We the people, humans all, care.

We will win. Have won. Will have always won. There is no doubt of this outcome, only the matter of its manifestation.

### ***...is the evil thereof***

There is comfort to be taken from the thought that ALL that unfolds is exactly as universe would have it be; and that our participation is as much for it<sup>3</sup> as ourselves or others; and that all beings possess their own destiny. Any attempt to impose our desires on their path through universe is contrary to universal will and will not result in success. Therefore, peace, such as it may mean to us individually, can only be obtained by learning to let go, and accept that universe would have destruction of the past in order that there might be a future.

Destruction is always messy. Soon it will be time to clean up. Get your brooms ready now.

###

Fair winds, a fast boat, and **clear vision to pie** are wished to **all**, from **all** of us (Igor, Cathy, clif, and dog guys) here at HPH.

---

3 As gandiji notes, each of our individual acts is insignificant, yet without all of these acts, universe itself trembles.

May 21, 2012
