

Half Past Human presents

ALTA Report

Asymmetric Language Trend Analysis Report
'Changes in language precede changes in behavior.'

Note this report is offered for entertainment value only. Any resemblance between the events portrayed and developing reality is purely co-incidental and in no manner represents foreknowledge on the part of the author.

Note that this information is derived from humans expressing themselves on the internet. As such, the words used to express them are being sampled and interpreted here, NOT THE FUTURE. This report and future developments is entirely in the mind of the perceiver and does not exist in real life. The author is not held liable for accuracy of lack thereof in this report. Authors cannot be held liable for human interpretation of any action any human takes as a result of this report. Any human foolish enough to alter their behavior based on this entertainment-only analysis demonstrates themselves incapable of rational appreciation of reality, and is explicitly held harmless and blameless for any and all such mental aberrations on the part of the reader.

This report crafted from 26.165 million reads of the ALTA 709 series.

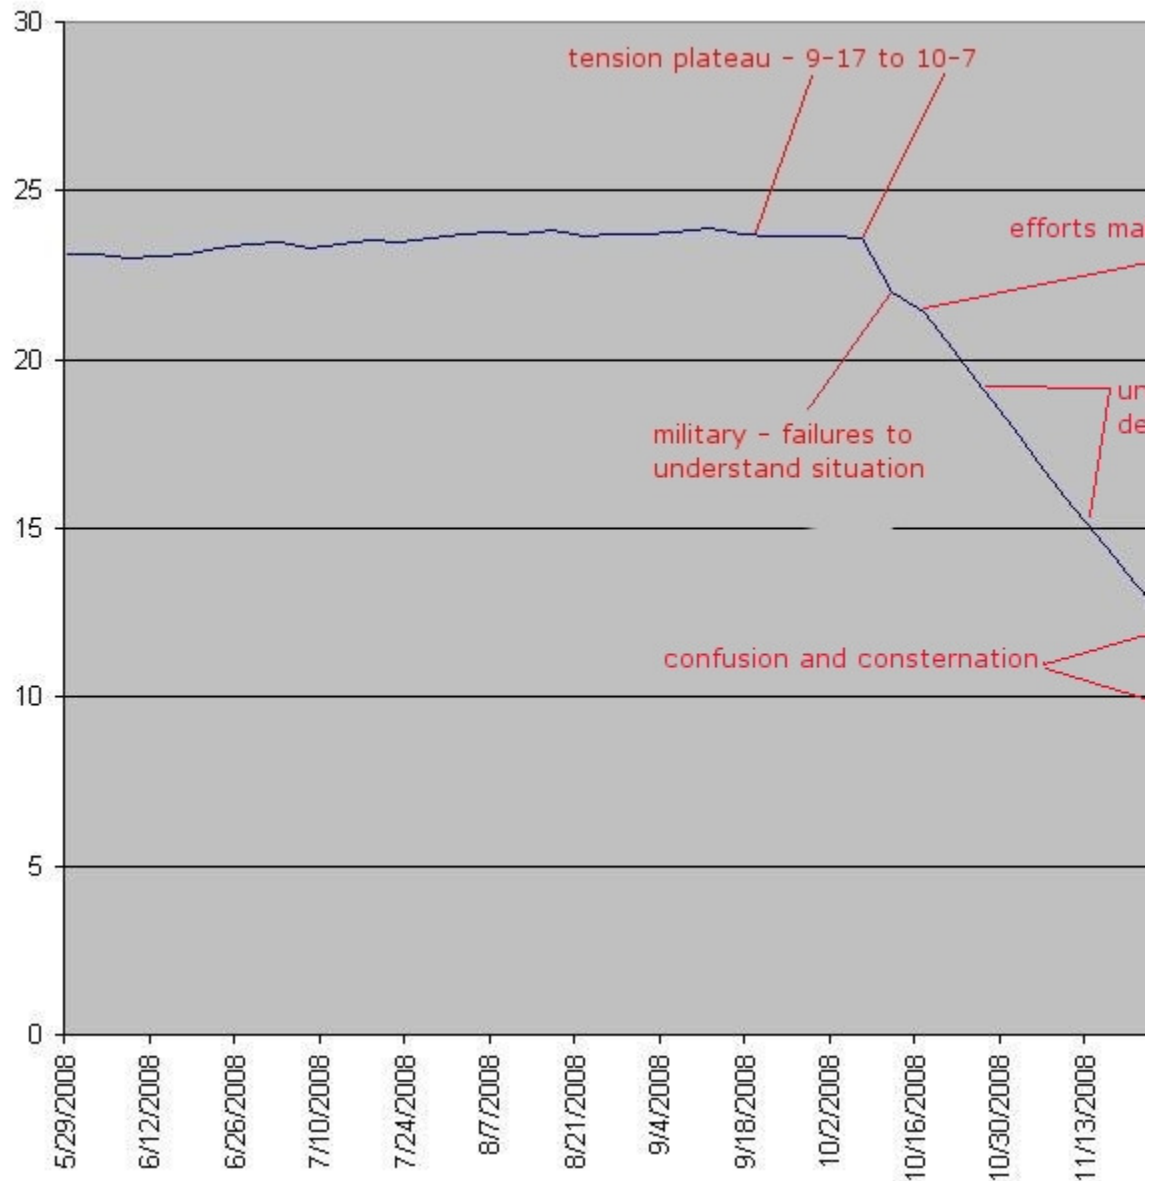

Posted September 20, 2008.

Meta Arts - Empires

We are wrong all the time. Let us repeat that. We are wrong all the time. Oh, sometimes forecasts vaguely match universe manifestations for a brief minute. But usually not. Sometimes when we are not wrong. These cause a few problems with our feedback loops, but those out eventually and get back to being wrong.

Like now. We hoped we were wrong about the [hiatus in breathing/held breath] period on September 27th, and holds for 11/eleven days until October 7, and indeed it did. That it actually started on the 17th, likely the [held-breath period] will now be therefore last from September 17th through to October 7th with a total of 20/21 days at this current level, or ever so slightly higher. Right up until we plunge off into the void.

The 20/twenty days of tensions are now showing the [economic] component d reports. This [economic] component, which is now manifesting as the current of *THE* currency] in the data sets within the Populace/USofA entity, and M and other problems besetting the global markets at the moment, are, at their cc soon be revealed as such. Perhaps even on the 7th of October. Empires don't d to go are the debased currency and the military apparatus which enforced emp

The data sets are revealing that some significant portion of the [military] comp be arriving on or about October 15th. Note that the immediacy values and the us with a small deviation from the unrelenting plunge shown by the longer ter 15th accretion patterns are indicating that another 'bump' in release language v around the [failure to understand] by the [military]. Here at HPH we are hopin say, non USofA, who screws up. But as we have the most active military on th

that it is US.

Markets - Slope Stability, Deep Impact, Calories

The damage has been done. The financial earthquake was a deep, slow moving tsunami is just starting. The effect of the pressure wave from the base fiscal cr [mountain] which will slide down into the abyss, shifting vast quantities of paper tsunami in recorded human history.

At the moment, the Markets entity is still accruing values for the previously mentioned. The descriptors are suggesting that over these next days the TPTB will [struggle proffered] are indicated to be [soft] or [accepted, but no energy behind them]. [currency] context further has newly acquired aspect/attributes which go to the [using up] the [last of resources] in a last desperate attempt to [prop up/support] Markets entity through model space is pointing to the [last/finishing/completion]

The data sets indicate that the [finished] component of the supporting layers is This is a supporting set for the [loss of THE currency] sub set. The aspect/attribute at the primary level by the [system] aspect/attribute set and this in its turn is supported linked/connected/symbiotic]. These are but a small part of the supporting sets which are to be [finished] with the [US of A dollar]. These [systems] include the associated [supporting agencies]. The levels of [systems] which will fail with strangely diverse, however as may be expected, the central focus is the [government]. There are smaller sub sets indicating that TPTB will be impacted as well, albeit

As a curious bit of information about time, and timing, it would appear that the [federal reserve cabal] will come in November as that is when the supporting [systemic meltdown/lock-down/rigidity]. This is an interesting proof of the "Ge emotionally impacting events are pre-seen further ahead in time", or stated another between picking up the indicators for a event or developing circumstance and higher the degree of emotional impact, and the longer the level of duration of the postulate has shown up in our work previously, but what sets this instance apart [irrelevancy of the Fed] with George in September of 2001 as we had data indicating would be [moot] in [November]. In that year, 2001, we had no way of knowing [reduction of the Federal Reserve system to irrelevancy], but we did have a 3/4 thought it would be in a November of in those 3/three years.

We were wrong. The data sets continued to grow around the [irrelevancy of the [death of the dollar] meme which we first started reporting in late 2006. But we showing for a very very very bad November 2008 for the [Federal reserve system participating. So if this is THE November, then the Ure postulate has had a heavily related data sets for the last 7/seven years. As a further note, Igor and I have d

lay out a ratio of weeks to days, or months to weeks. These equations have been specific cases which we are using to craft a general state theory, and as such * But, given that, some of the previous long forecasts such as the Sumatran tsunami (emotional/life impact) for every month of the forecast time. So in that case we forecast, and the longer term values in the duration column of the array would be years of the [first stage of impacts]. There after the [lingering effect] is being forecast time thus yielding a greater than 40/forty year impact from that event

Sooo....given those equations, our [dollar death] or [loss of THE currency] will be about 80/eighty years.....and you don't even want to think about the [lingering

Our data continues to point to October 7th as a really really bad day. Noting that that we are dealing with processes, and not discrete steps, the choice of October sets as, when the model space was progressed through that day, the aspect/attributes such as [no enterprise will go well], and [ambitions (for) what is not achievable] indication to us that this is a *special* day for universe. Of course we *are* likely to shift into release language could be felt as early as the 2nd of October. As our events/language through time', and as we are dealing with millions of data points into release language on the 7th, start showing up as individual data points with spottily building there after, until on October 7th, it is as though the flood gate pours over us all.

Very little else to add that may be meaningful about the [markets] as they currently are [abstractions]. Now that the whole of the context has gone into conscious level global mediastream, there are hundreds of millions of words about the situation. Reality works, each and every system devised by humans *will* go through its process. Humanity to evolve a little and learn something every now and again. We are : [markets]. What will replace it is just now forming in the collective preconscious hints as this ALTA series progresses over the October 7th shift into release language

We already have some hints that the [new global economy] will stabilize around this [calorie] based economy is clearly a demanding task to model as so much to describe it, does not exist. As we begin to pick up the clues as to the shapes of the new system to replace the [global dollar reserve system], we will include them in these reports

We have some small hints now that the new [calorie] based exchange system [at concentration] at its core, and will do so through the expedience of [standardization versus consumed]. The [wealth concentration] context is dramatically altered as the system sets building under the Markets entity now. The [wealth concentration] context [new paradigm/consensus reality] moves into a completely new method of human paradigm] arises as people ask themselves the following question: "if money is the motivating emotional drive?" As we all learn to answer that question for our own collective answer that will be the propelling philosophy for these next few years

New expressions around the [exchange of calories] are already forming, and a
Our problem at this point is that we have a very incomplete context filled with
expressions can vary widely, and the meanings skewed by our lack of framew
the context, we will be including more of these expressions coming through th

Terra - Oh, crap!

Oh, crap! Or words to that effect. The Terra entity continues to accrue support
Further the [earthquake] is supported at the secondary level by aspects/attribut
probably *not* good signs. Further, while there are still continuing references
less) as the center of the/a [quake], there are also geographic indicators for the
[bloody], to be centered in the [pacific northwest] of the USofA. This is where
case, we will report when we can what we can. There are other areas also still
are located around the Iran and Afghanistan border. Turkey, Japan, and China
The earthquake descriptors are also including detail level aspects/attribute sets
and [broken ledge (of) rock], and other words going to the idea of [internal ea

The data sets are also worrisome in that it *could* be interpreted as referring t
proximate. This is due to the linguistic context of [earthquake] being held dire
occurrence, but to also the [earthquake] linguistic context being directly held i
sets are mutually cross linked. The [earthquake] context set in the Terra entity
entity, but they are very similar down to about the 10/tenth level of descriptor:
pointing to 2/two large earthquake, in December, with the West Coast of the U
quakes. This would also tend to explain why the data sets for these last few m
words about [earthquakes] in the main stream media {ed note: the definition o
it occurring over 3/three days of December 10 through 12 inclusive. It was ou
wrong {ed note: usually are, so this is where we go first}, or that the [earthqua
elicit 3/three days of non-stop teevee babble. However, a third alternative now
of the [earthquake] set within the Populace/USofA entity, is that there will be
the 10th, and the second being on the 12th. Sounds right? Well, the data *wou
could be just a single big earthquake on the 10th that still has the talking head:

Some of the detail descriptors for the [earthquake] include that it is relatively |
one kilometers] deep. This is significant in that it is also felt as the [earth/grou
miles]. Further there are references to the [crumbled debris] of the [infrastruct
turn paths/off ramps] as examples. The detail descriptors in the Terra entity [e
[blockage], and [forceful breaking/rupturing] such that [joins are possible]. Th
going to [sheered underground lines] both [electrical] and [transport]. This las
There are also indications for wide spread [flooding] from [pipe ruptures], and
up through water] as [natural gas pipeline ruptures] work their way through th

The detail descriptors for the [earthquake] set within Terra entity suggest that
[violent] as to cause [atmospheric displays] including [lightning], and [strange
aspect/attributes which can be interpreted as describing the very [tall lights] at

sub surface rock sheer.

Of course the Terra entity sub set of [earthquake] also contains support from the [danger] of this linguistic set, the [danger] is shown at many differing levels. First there are the [crushing stones], and [sole ripping glass shards], then there are the higher level [being able to [cook] and [feed] in the subsequent days. Then there are other [coming from the [collapse/unavailability] of the [banking system]. On top of the [danger] is also indicated to be present in the [compression of the airs]. This [support includes [ears], and [deafness] as sub sets, so perhaps the [earthquake] is dangerous to the hearing?

The sub set for [earthquake] in the Terra entity has many cross links to direct [within the Populace/USofA entity. In the some cases, however, the cross links [termination point for sets from the Terra entity over to the Populace/USofA [er supplies]. This aspect/attribute set is indicated to be impacted, thus some of the [even the [rationing]. As an additional layer of complexity, the data sets within [earthquake] on the [west coast], sub set [pacific northwest], are also supported [acres] which will be negatively affected. Again, may contribute to [shortages] as termination points within the Populace/USofA entity going toward [rations] sets are indicating that the [north to south flow] will be [disrupted], and thus a [of the [affected area].

In the case of the larger [earthquake] sub set within the Terra entity, as the [through the December Solstice, and into Winter, the [earthquake] lexical set [shows as being globally affective for *only* a few months. Again, within the [aspects which indicate a long term effect in that [rain patterns] will somehow [how] of the disruption is not yet within the immediacy values. This suggests [longer term effects that will take a while to discover.

Within the [earthquake] sub sets are longer term value associations which include [movement (not) being heard/felt], and [precursor/hiccup (before the) burp]. Other [antarctica] focused sub sets relating to [magnetic burns], and [crawling skins] [deep earth pulsing], and [no-sound thunder deep in earth]. Hmm. Time to bring

ThePowersThatBe - Unintended Omlets, Re-Education

The newly processed shorter term values for the ThePowersThatBe entity are under the aspect of [quarrels]. Though it is only a single step/grade below, this it also needs to be noted that [quarrels] has descriptors for [discord among the unlike [conflict]. It is also part of the patterns that [quarrels] often precede [co at the moment, the descriptors are clearly for a case of [nasty quarrels]. What, familial squabbles, becomes [nasty quarrels] in TPTB due to the [brittle] and [

The whole of the [inner quarrels] sub set is supported by [danger] at several di

[danger] is it self deriving support from [difficulties]. The [difficulties] relate [ship] is related to the [ghost fleet] of [officially denied prison ships] run by th appears to be a [supply ship] that [goes aground], and thus triggers some [diffi [open shock] when a group within TPTB find out just which personalities are

As modelspace is progressed through Fall the [visibility] sums rise around an TPTB due to their [aversion] for [risk of exposure]. Many of the [press] are in one/body came forward], but... well, no news is not news for long.

This [missed opportunity] is important as a temporal marker for the [rips] and the [fabric] of [interfamilial relationships] which bind the ThePowersThatBe.

As the upcoming release period does *seem* to be focused on the [global econ death], the appropriate view of the changes in the TPTB entity just may be tha demonstrating that it is [breaking down]. The [central authority] aspect/attribu to the idea that this [Fall] will be a [succeed or perish] time for the [plans (alre linguistic sets for the [3rd/third] and the [4th/fourth] of the [planned stages] be 'BUT', the data suggests that problems have been encountered in both the [5th ThePowersThatBe entity has supporting sets for the [inner core] of the [operat of [circumstances] to follow their script.

The data sets under the [global economy] and the [crises] of Fall are supportec of the [whole world (standing aside)] while TPTB [attempt] to [recreate/rebuil economy]. Note that [standing aside] is also defined as [waiting for the outcor [before taking action]. There are supporting sets of descriptors showing that th period will be filled with the [presentation of documents/plans] and other form will, of course, *not* work. Also across this span of time, the [global populac and [disturbed] as the [global economy] spirals into chaos. Further problems v mere expression of the [release language] in the form of [non-violent protests] from TPTB in a number of countries. In a scene eerily reminiscent of the Spar highly [visible] image of [men, women, children] being [shot] at point blank r [authority enforcement agents] of TPTB will become the actual [poster image] the [epic pan-global revolution] which it nurtures. As an aside, the 'other' prim Bob Marley against a background of [green and blue earth] which will form th struggle] philosophy of the [planetary populace movement]. At some point in possession of the imagery of [revolution] will be enough for [re-education] or

All of the [repression] will done in the name of the [preservation of central au against anarchism]. This new/next phase of the TPTB perpetual war for perfe power will begin over the last of Fall and into Winter. As the TPTB and their this Fall and Winter failing to provide a solution to the [death of the dollar], a usofa dollar as global reserve}, there are indications from the data sets that the [inter family quarrels] will prevent any of the proffered plans from 'taking'. Th the release language, 'things' will be correspondingly worse. Things are chang

TPTB that human control ends where universe provided circumstance begins.

ThePowersThatBe entity has supporting aspect/attribute sets which begin to cohere: may relate to both Vancouver BC Canada, and the expected earthquake [blunders] by the [press] which will [reveal] the [preparations] of certain mem temporal marker in that it presents the first of the [rebellion] instances to emerge it also is the first in a series of [visible cracks] in the [cohesiveness (of) central] of progression of the modelspace. The [preparations leaks] will precipitate a [several levels which later in 2009 will 'bear fruit' as the [press stands up to TP [video] and will be [visible] in perpetuity once it hits the internet. This instance [editing] and thus the [allowing (of a) view (in the background)] which shows

Also over the course of the upcoming release language period, and as a result of [decisions] around the [dollar death] meme, a whole lot of [whistle blowers/acc is directly the result of the [economic pressures] being placed across the total reserve currency] fails. These [revealers of secrets] will be placing huge stress and the [details of the plans] become attached to [people/names/places]. These the whole of the social matrix in that the data suggests that they will come from [engineering], [NASA/NSA/CIA], [Department for Extraterrestrial Affairs]. These references and is but one of many sub sets indicating that the [whole/total] wa meme will be [flooded/inundated] with [insiders] who will, very soon, become. Among this group of lexical sets are many small aspect/attribute sets which are [revealers of secrets] will be [providing proof], *and* will be given very large control] over the [media] begin to part both due to [financial upheavals] and the movement].

SpaceGoatFarts - Non-Locality near you

Our 2/two courageous [travelers] who are [fleeing for their lives] as a result of [coherers] and who are currently making a backwards journey around the plane of Spring of 2009. The [travelers] are facing some serious obstacles, but the [forces in opposition] as well as the [stressors] of [flight for life] have brought concerning the [nature of the cohering process]. According to the data sets, du [body bleeding], and [avoiding capture and death] by only [fractional seconds in possession of a [photonic coherer] reached a point of [mental clarity/insight contact] at the [monad] level. This [contact with the Other] has had some very travelers. The [photonic coherer] is now more of a [tool] than [proof of contact functions has brought about new levels of [interaction] with the [coherer]. According to [technique] is learned, the [device/coherer] need no longer be present for the [

As modelspace is progressed forward through Fall, the SpaceGoatFarts entity [release/revealing] of the [new understanding of the cohering of photons] will links indicates that this really really pisses off the TPTB and the [officialdom] level. The aspect/attributes moving into place across Fall and Winter are point

action] as [coming to a locality near you]. The aspect/attribute sets suggest the [be created] using the [photon coherer] device/technique. This will begin to [travelers] come close to completing their [journey] *just* in time to participate actual [release of the information] which is causing the [gut twisting] within TPTB then have a whole new set of problems as the [genie] is out of the bottle

The whole of the [photon coherers devices] will drive ThePowersThatBe into control] become [depleted] of [resources] by the [coherers]. This will be as the effort to [stifle] *every* instance of the [coherers] being [viewed/used/examined] in the interpretation of the [coherers] in that much of the [alien nature] not be able to be rendered meaningfully in our language. Even as we acknowledge something not seen by that many humans, we nonetheless are offering [viewing] [interaction with the coherer] at the [human to coherer] level.

There are some data elements that *could* maybe, possibly be interpreted as [photon coherers]. These data elements are undoubtedly misleading in the diversity of expression opposing words in the aspect/attribute sets {ed note: e.g. 'fast' as an aspect, but 'slow'}, and the contradictions inherent within the aspect/attribute sets. However, very peculiar language which we will interpret, but against a background of knowledge of the device/technique?/[something] and as such *probably* hasn't been modeled in the concept of the [coherer] and its [operator] as being able to [express (speed quality)] interpreted as [squeezing (expressing) light/photons (speed quality)]. Note that the descriptor for [light] as we, and probably most of universe at some point, uses which [speed quality] can be judged. So the [devices] allow for the [squeezing] Further [light] references include aspect/attribute sets for [image stop], and out of 'remote control' concepts for 'reality as a dvd player'. Within this sub set the occur in which [many people], most of whom are [bystanders/crowd], will be the [coherer]. Though this may *not* be allowed to have *any* mainstream media [visibility] on the [circumstances] if not the [cause]. The aspect/attribute sets [crowd] of people is [within range/viewing] when a [coherer] is [activated], and [experiences visions] and [ecstatic transport]. Hmmm. Sounds like quite a parallel to TPTB get to hearing about the incident from the [hospital reports] which do not [harass] and try their usual [control] techniques on the people of the [crowd] via records]. Some of the [crowd] never go to the [hospitals] and this causes some of this incident down. Our data indicates that some of those who [escape (or) defuse] out-and-about on the internet, and that is where we will pick up the [visibility] of their effects. The [incident of the exposures] comes into modelspace along with most recently processed immediacy value set. It seems likely that the incident have only sketchy details and no clear timing clues.

The SpaceGoatFarts entity is indicating that the [coherers] are but one of many [control mechanisms of authority], and the [social order plan of the leadership] a *huge* increase in [ufo experiences] that will [overtake] or [blanket] the plan beginning in December of this year. The [increase in UFO experiences] will *

envisioned. This [increase] in [ufo visibility] within the global mediastream w rodent known for amusing erratic movements, as opposed to the other definiti are showing the [ufo encounters] to be on such an order that the experiences s [visible] ways. The [denials] are indicated to be [fading] from [officialdom] v

Conclusion: ALTA 709 - Part Two:- Un-Cern-tainty

There is a seeming conflict between the idea of 'conscious co-creation', and th for events from the future, *as though the future already existed*. The idea of examined, but the seeming paradox at the base level is:

"if we are all consciously co-creating reality, then how is it that events can ble don't yet exist?"

Stated another way, if the future events are sending back emotional ripples thr future exists as a solid 'reality' at the point from which the ripples traveled bac of time travel }

Or to thoroughly complicate the thought, if events of the future can send back not imply that all life is pre-destined? The whole 'it is written' meme?

Within our multiple dimensional reality, such apparent mutually exclusive cor where duality is an expression of universe that needs no reconciliation.

At really really core levels, no 'things' exist anyway, future, past, even the sup matter, and are created in this reality 22/twenty-two trillion times a second by 'pretend' to be the electron at the point that we wish to measure it. And that is Uncertainty principle applies in a strange woo-woo way in that where we *wi desires it to be. On that level alone, conscious co-creation is validated, but not

We still have the issues of the 'backwards time ripples' to consider. And isn't t investigate the quirkier properties of quarks and their relatives including the s thought to be the *time* creation particle? The huge cost in money, years, and machine was explicitly at the direction of TPTB. What is it that has them so ir Bearing in mind that the CERN machine is the Giza Pyramid of our time, and note: also true of the pyramids which are *neither* pharaohic Egyptian, nor to resources is just screaming about TPTB and their desires for further control m

Of course, we know that the CERN machine is already a failure. It will never in a physicists' mind, with no evidence of the existence of *any* black hole of

fact. We know that the CERN LHC machine is failure at the very base level, and seek to expose with the collider do not exist. These are merely smart interference patterns that graciously pretend to be solid while the scientists measure them. No there there Nor in matter at all. Nor in us either. And that is the fundamental step from will recognition that you don't exist. At least not as has been described to you by 'the species'. And as the CERN collider was designed to prove, before it started have observed that humans don't do well when they build gargantuan things... this particular quality.

All is energy. All is vibration. All the perceived 'things' around us, and within voluminous numbers of mutually interfering energies. Where ever the energies middle of the energy collisions is a pattern, not a particle, nor a 'matter', however reality. Since universe is using us to sense itself, and itself, and ourselves are consciousness energies, it can decide just how 'solid' any of these energy interference patterns is universe using the illusion of solidity to 'sense' itself as a solid, material world object are illusions, they contently provide just the self-reinforcing feedback loop.

And what about the backwards ripples in time? Well, if all of universe is an illusion constructed out of the bizzillions of points of interference as energy fields interfere, ripples in time *are* explainable in the [communications] between the interference really fast feedback loop mechanism and the ability to be self altering based on information. Importantly, based on the [response] from consciousness interwoven into the patterns of words to describing the various ways in which universe builds from the pulses through the fantastically intertwined fields of energy, but suffice it to say, that {ed note: slightly different tack on the conscious co-creation meme}, finds back accomplish. As they say in this universe, "easy as pie".

####

Part Three is scheduled for posting late on Saturday, September 27th.
