**WARNING:** This report is not for the faint of Heart. Very nasty stuff follows that **WILL** impact your consciousness in a negative manner (at least at first). And may affect your health. **BE WARNED NOW!**

So make a decision now to **NOT** read this material any further if you have any health or consciousness problems that may weaken your bodily systems.

**NO BULL HERE! VERY SERIOUS WARNING!~**

**DO NOT READ FURTHER IF WEAK IN HEART OR MIND!**

Stop now and make your decision. Refunds are available on request.

## Disclaimer of Methods

The predictions herein are produced using our radical linguistics method that has been in development and production since 1997. The data sets employed are a result of the data gathering begun in October of 2008.

## Conventions employed in this interpretation.

Within this document, words or phrases that are enclosed within square brackets [example] are extracted from the data presented in its more raw form. Words, not delineated in other ways, and that surround such bracketed words or phrases are used to place the marked word/phrase in context. This is to say that there is a deliberate attempt to present the information in as coherent an essay format as is possible, given the complexity of the subject matter, and the process involved.

## Disclaimer of the Extremes

The process employed to produce the ALTA reports seeks out emotional associations with words in common use on the internet. As a result of the nature of emotions, it is easier to find and identify such words that are associated with extremes of emotions. Thus there is an in-built artifact of our production that will always tend toward the most extreme ends of the emotional range. Further, it is easier to identify words associated with negative emotions than with positive emotional states, therefore, again, there is an in-built artifact within our processing which tends to focus on the more extremely negative range of words.

## Disclaimer of status of knowing

This document presents forecasts of trends and predictions based on radical linguistics that are derived from a process of invention. This invention process is on-going, and self-transforming. This invention process is inherently flawed at so many levels that it discussion of the discrete problems is beyond the scope of this presentation. The reader is cautioned against the in-built process in humans to 'believe' the written word. The information presented herein is at best a very poor process of mapping the collective consensus reality and some small amount of the changes that it manifests. To restate this premise: it is our understanding here, that each viewing of the future, changes the future. Usually these changes manifest in unanticipated ways. Likely this is due to universe favoring 'surprise' as a method of keeping consciousness awake and slightly jittery.

## To repeat this in other words:

Do not assume we know what we are doing in the presentation of this material.

Always discount the information presented as it has an in-built error toward the most extreme connotations available in language and trend interpretation. In yet more words, the information presented uses words that presume the worst-case for future manifestation of the collective consensus.

## ALTA Disclaimer

The text of the last of our subscriber 'runs' is included in this presentation. The following disclaimer applies to all the text of this document, with special emphasis applied to the text of the ALTA reports.

Note that this report is offered for entertainment only. Any resemblance between the events portrayed in this report and any developing reality is purely coincidental and in no matter represents foreknowledge on the part of the authors of this report.

Note that the results presented herein are derived from humans expressing themselves on the internet. As such, emotional values and the words used to express these emotions are being sampled and interpreted here, not the future. Any resemblance between this report and future developments is entire in the mind of the perceiver and does not exist in reality. The Authors cannot be held liable for accuracy, or lack thereof, in this report. Authors cannot be held liable for human interpretation of this report nor any action any human takes as a result of this report. Any human foolish enough to alter their behavior based on this entertainment only analysis demonstrate themselves incapable of rational appreciation of reality, and the Authors are explicitly held harmless and blameless for any and all such mental aberrations on the part of the reader.

## Meta Arts (Manifesting Reality): ScrewUs Interruptus

With the recent ‘whistle blower’ episode in which bright mind(s) hacked into the climate data base (nasty stuff, data), the forecast emerging from previous issues of this report has begun to manifest. The hackers have provided proof to the populace of the planet that those pandering to ‘man made global warming’ meme have been fools. Further, this whistle blower event has placed the **WHOLE** of the global warming power structure at risk **JUST** as they were reaching the climatic point of consolidation of their power grab globally under the banner of “global warming”.

The [theft (of the) incriminating material] is part of the forecast for a [whistle blower] to emerge in Fall of 2009 who would [alter the state of the planetary consciousness]. While our forecast was wrong on the nature of the (initial) information to be brought forward by the [whistleblower], we nonetheless still maintain that not **ALL** of the information is yet released, and that the flow of events stemming from this [whistleblower episode] continues to unfold in the direction of a focus on [space]. There are still threads within the linguistic sets that are being manifest as the mainstream (propaganda) press now are using forecast language to describe aspects of the problems emerging for the pending Copenhagen conference and its goal of the Global Power Grab Treaty signing.

Again, we had forecast that the [whistleblower] would be connected to the woo-woo world by way of the [space aliens] meme, and, as of this writing, are still awaiting further developments to emerge from the [climate-gate whistleblowers]. Now that the [climate] sub set has emerged as the focal point of this event, we are able to go back to our data sets that produced the original forecast and to examine those sets in the [climate] linguistic structure that we had previously ignored. {ed note: who would have thought that ‘climate’ whistle blowers could create such an emotional response?...well, now we know.}. The data sets that were ‘hiding’ under the [climate] set within the detail layers of the forecast data sets are indicating that **MUCH** more information will be spewing forth shortly as [officialdom responds] and inadvertently [shoots off their toes]. {ed note: [shoots off their toes] = ‘removing the support for your legs’ = big crash = large scale failure with painful consequences including bodily harm}.

## Terra: Crust, Filling, Baking, Freezing, Thawing, Drying, Changing, Gnawing

Magnetic reversal? Pole flip? Crust shift? Well, yes, we have had data in a set for [pole reversal/crust shift] since 2003 as a defined set, but we have had many of the supporting aspect/attributes in the data under the [sun] set since the very first runs in 1997. The [sun disease] sub set has existed in modelspace since 1997. As of early 2009, the [sun disease] sub set growth has **NOT** included any of the ‘far long term value sets’. These are data types, which is to say, aspect/attribute sets which have links to words within the lexicon whose “impact” or “duration” values that exceed 19/nineteen months out into the future. Thus we are still gaining accrual of new lexical supports for the [sun disease], however even though the rate of growth has increased by over 12/twelve percent over 2009, these new sets only include the shorter term and immediacy data types.

As a pointer to, at least, internal, referential integrity, the TPTB (The Powers That Be) entity which is the proxy for all things ‘elite’ and ‘rulers’, and ‘self-appointed/anointed bossy types’, **also** has a very substantial, and growing, [pole shift/earth changes] sub set that parallels the growth of the [pole shift] sub set within the Terra entities. As the TPTB entity is entirely derived from language extracted from public writings by these elitists, the [pole shift/earth changes] sub set with TPTB has **also** recently \*only had growth in data sets of the immediacy and shorter term value types. This pacing of the 2/two sub sets in the separate entities is not based on similar language sets. An analysis has shown that even though the archetype is the same, the divergence between the lexical groups is slightly over 47 per cent. This is a very high level of divergence. Further analysis is presented in the TPTB discussion below. Basically the idea to grasp is that separate lexicons from divergent groups (elite(s)/minions versus general populace) are both growing large sets toward the [pole shift] in 2012 sub set.

Further note that we have, and continue to screen lexical groups related to common entertainment or popular culture. Our descriptor sets for the [pole shift] now include a lot of language captured about the 2012 movie, and we are using those sets as filters for the main body of modelspace. Make sense?

We deliberately filter out discussions in which the movie is referenced, though we note that the discussion exists, its subject, and put those into the statistical underpinning of the lexicon array.

Over the processing in all of 2009, the [pole flip] data sets have grown, albeit slowly. The primary sub sets showing the growth in both the Terra entity, sub set [pole flip/magnetic reversal], and the SpaceGoatFarts entity, sub set [unknown energies from space], sub set [sun], is headed by the aspect of [climate]. In both entities the growth patterns are similar, but somewhat divergent, though nonetheless centering around the idea of the [bones] of the [climate] will [manifest change] this year (2009) and next. These areas are tied into the [transformation] and [paradigm shift] sets affecting the populace both globally and within the USofA. The idea coming across is that both the [populace] and the [propagandistic press (also known as mainstream media)], will both have to [change their minds (paradigm)] about the [weather], and the [climate]. The immediacy of the [winter weather] being [odd] is indicated to naturally [draw attention], but apparently not enough to obscure the [fundamental changes] within the larger [climate patterns].

The [changes] to the [climate] described within the Terra entity sets include [large areas] that will be subjected to [millennial record breaking snows], and [freezing] conditions so [exceptional] as to [affect/damage] the [underground utilities]. There are even indications of [natural gas lines] getting [too cold] for [effective operations]. However, all of the data points to [patchy] or [irregular] patterns of manifestation. The [extreme weather patterns] are indicated to be [regional] in the sense of [bounded by parallels of latitude/longitude]. The detail sets include descriptors for [clustered (around latitude)], and [entrained (by longitude boundaries)]. The 'reason' for the [climatic entraining (to geophysical features)] is found within the data sets for [hyperdimensional geometry], and [sacred geometry], and [hyperdimensional (quantum) physics]. These [extremes (of climate both cold/hot and wet/dry)] sets have very high [visibility] sums that indicate much [teevee (and mainstream) blather]. These sets also are likely being influenced by the growing impact of the [climategate scandal].

Leaving the more immediate effects of [earth changes] for the longer term problems, the supporting data sets of the Terra entity have a rising supporting set that is [transformation]. This use is as a local descriptor and not as a meta data layer. This [transformation] lexical set is cross linked to

the SpaceGoatFarts entity and is supported by [process] at the primary level. The [process] sub set is the fastest rising and largest sub set within the Terra entity at any level. Much of this sub set is emotionally driven by impact and duration values that are near the top of our scale of measurements. The idea here is that the [process] of [transformation] of the [planet] as it has/had been known has started, and has moved along to the point where the data sums indicate a multiple generation impact on humans. The sums go to the level of a [hundred] or more [generations] of impact on humanity. Our numeric value for 'generation' is 21 years, thus we are looking at sums reaching 2100 years in length.

The data sets have accrued, since 2001, in a pattern that has a very sharp, distinct gap that extends from March of 2012 through May of 2013. This gap is not total, in that there are some data sets that accrete within that period, however the rate drops to something less than 1/one per cent of what we laughingly call 'normal' here at HPH. This gap is likely significant and just may represent the near total inability for humans to communicate globally past some point in 2012. At the extreme level of events, this could be caused by a [CME, magnetic pole flip, and crust slip/flip] resulting in mass die off, on the other, much more mild end, the data loss gap could be explained by a CME alone that is strong enough to take out the electronic infrastructure of modern life, thus crippling the communications planet wide.

Within our longer term sets that have association with [2012 earth changes] has been the set for [new lands rising]. This set has been in residence in the Terra entity since early in 2002, and still continues to grow. Over the course of the last 2/two years several instances of [new lands rising] within the [pacific basin] have indeed occurred. Placed into perspective, there have been more instances of [new lands rising] in the last few years than in all of the previous 2000 (two thousand) years. Also it is possible to note the position of these [new lands] and to see that a pattern is developing that just may fulfill the forecast for a [pacific plate breaking] that has been held in our data for several years now. The [cracking/breaking of the Pacific tectonic plate] is probably going to be a huge temporal marker for those humans already aware of the precarious nature of the times, but the data is also forecasting that TPTB will be [propagandizing] the hell out of it such that it will not make the [timely impact] on the [populace] that is so needed. Much, if not all of TPTB [propaganda] about the [pacific plate break] will emanate from the USofA media empire.

On both sides of the Pacific basin, that is to say in Asia, specifically China, and in the USofA, the data sets that accrue for the Terra entity around the 29<sup>th</sup> of December, and the **context** change that occurs at that point {ed note: to the populace of the USofA}, also are indicating that the [diaspora] or [dispersing of the peoples] will once again be [prevalent] and [visible] within the [main stream (propaganda) media]. While the [propaganda] is indicated to be [flowing thick], and even [overwhelmingly], and to be directed to the discredited [humans as cause for global warming], the data also indicates that the [extreme cold] and [disrupted/disjointed winds] will be [thrown back (into the) face] of the [propagandists] by the [popular reactions]. Nonetheless, the [diaspora] sub set is indicating that [hundreds of thousands (of humans)] will be [on the road (or relocating)] due to [extreme(s) of climate] that will [descend (from the jet stream)] in very late December and continue through into January.

This episode is but 1/one of 3/three [storm] occurrences through [winter 2009/2010] that will trigger [diaspora] at levels that are significant for both [populations involved] as well as [visibility] levels.

Along with the continued [economic crises globally] that will persist and grow through Summer of 2010, the Terra entity is indicating that a [cycle break] or [climate pattern disruption] will also be [felt] over these next 7/seven months at [globally visible] levels. The [climate dysfunction] is a supporting linguistic structure, via cross links over to the populace entities, and the Markets entity, to the [economic collapse/crises]. The direct [impact] of the [climate disruption], on the [transshipment of goods] and even [information] becomes greater as the year progresses. This is to say that it will be the cumulative effects of the [continuing climate crisis] which add to the [misery/suffering] of Summer of 2010, though each of the many [instances] of the [manifestation of bizarre weather activity] are indicated to [cost (wealth)] at the time of their manifestation, however the [total impact] over time is showing as being [magnified] by a [self-supporting feedback loop]. Please see Markets entity for further discussion of this supporting linguistic structure relative to the 'wealth' of the world.

The data sets continue to point to [new lands] that will [emerge] over both 2010 and 2011. The aware observer will be able to note the [placement (relative to current latitude/longitude grid)] of the [new lands] such that inferences of future [earth plate alterations] may be made.

There are continuing [global coastal phenomena] building sets. The [phenomena] are forecast to include [rising waters] such that a [group] of [low lying lands] will be impacted to the point of [alteration of habitat (for humans and animals)] will occur. Some of the geographic references clustering within the supporting sets indicate that areas in southeast Asia, southern and eastern Africa, northern Europe, eastern China, and Russia, and eastern and southern USofA, and eastern south America will be affected. Given the total populace levels involved, the most significant effects are forecast for places like Bangladesh, and Thailand, and India, however if the [economic] impact of [disruptions to established habitat] is considered, the highest level of [economic costs] will be encountered in SE USofA (including Florida), and northern EU including Britain and Germany.

The data set interpretation in the Terra entity is necessarily focused on the [earth changes] linguistic sub set as these dominate the whole of the entity from the bottom detail layers up to and through the top level archetypes. The [earth changes] sub sets continue to be, in the aggregate, the largest area of growth in all of modelspace. This is true within the Terra entity alone, that is to say, that if all of modelspace is taken as a single entity, then **just** the area of the [earth changes] in the smaller sub set that we call the Terra entity, is the largest area of growth in modelspace. When the total area of modelspace is considered, the [earth changes] linguistic sub sets in all of the entities, are the largest growing area by greater than 5/five times any other aggregate set, and 2/two time greater than all other sets combined. Stated another way, modelspace is forecasting that the subject of [earth changes] will come to dominate **all** other human concerns over these next 2/two years. Also note that a very large percentage of the [concerns] will be focused on the [dwindling food crops globally] as the [extremes (of weather/climate)] make themselves manifest.

## Markets: Failure of Sorcery, Rot and Fester, Road to Zimbabwe, Proffered Promises, Le Scheme Grand

The dominating aspect/attribute sets for the Markets entity is headed by [decay] as the primary descriptor. This [decay] set is supported at the secondary level by [visibility] and that set in its turn is supported by [shock] and [reeling]. These sets come into the Markets entity as modelspace is progressed into January of 2010. As may be expected, the [decay] descriptor set is filled with many supporting sets which reference the [dollar death].

The language of the [decay] sub set is strikingly different from previous [dollar death] supporting sets, in that this set is pointing not to the [dollar death] itself, but rather to [what follows]. The [decay] set is specifically focused on the [decay (of the) planetary markets] that will [follow on] or [accompany] the [dollar death]. The [decay] is indicated to become [glaringly visible] over January and February with a significant point of [internal disruption] being reached before the vernal equinox in March.

The supporting sets for the [decay] of the [planetary markets] include language suggesting huge impacts on the [social order] in [China], as well as a [shift] to [internal (isolated) markets structure] for [India] and several of the [south east Asia countries]. The [decay] language within Markets is also replicated across several layers of the Populace/USofA entity including the [federal government] and [entitlement programs]. {See Populace/USofA entity for that discussion.}

The [lockdown] language sets are still growing. As of this point in the processing in late November 2009, these sets are pointing toward a very [visible] impact on the [planetary populace] as the [financial system] goes into [lockdown] crisis that will apparently ‘peak’ sometime before the March equinox.

Both the [hyperinflation], and the [destructive deflation] sub sets continue to grow as modelspace and the Markets entity is progressed through the first half of 2010. The growth is very substantial right up to about the end of July, then the [degradation] supporting set from which most of the grow emerged, settles down to a plateau that persists until late in November, 2010. After that point, the [usofa dollar] and the [misbegotten federal reserve system] will lose [influence] in the [real world] at a [shockingly fast] rate. Noting that most of the [damage] to the [federal reserve central bank and warfare system] occurs after [mid summer’s night], the aware observer will maintain the distance of perspective on the unfolding of [financial events] over the first half of 2010, after all, events in the [financial] and [central banking] areas will only get more [chaotic] and [dysfunctional] as the year matures.

The movement of both TPTB and the Markets entity within modelspace over the first half of 2010 indicate that **all** the efforts of the [obama admin], and all of the [congress creatures] will come to absolutely [no results] in their attempt to [resuscitate the dead dollar] **and** all of the [power systems] that

depended on the [usofa dollar]. This will include much of the Markets entity core descriptors for [infrastructure]. This is to say that the data sets imply a [paced degradation] of the [markets infrastructure] along with the [dollar death].

Please note that this does NOT preclude such abstractions as [indices] from reaching all time highs in [dollar denomination] in 2010. It is just that it will not be meaningful. Stated another way, there would be no surprise here at HPH to see the [DOW index of stocks] reach to [20,000 (twenty thousand) dollars], though it will not be meaningful since [inflation] at that point would be approaching [200/two hundred percent annually]. However the [officialdom minions] will never allow an actual [inflation] accounting, and much of the [inflation] will be hidden in the form of [dollar devaluation] and [dollar repudiation]. At least this will put [smiles] on the faces of the [propagandists/shills] at such as CNBC and other [mainstream press minions]. Of course, by the time the DOW reaches to 20,000 {ed note: if it goes that way}, the [dollar prices] for [gold] and [silver] will also be at all time highs with the relationship between the DOW and [gold] going to nearly 3/three to 1. This last has been held within our data for at least the last 2/two years, and does seem to indicate that DOW at 20,000 USD = 1 oz Gold at 60,000 USD. And yes, these [US dollars] would be off on the road to a [Zimbabwe] style of [currency management].

Humans are not the cause of [global climate change], though the [propagandists] will be [shouting otherwise], however, humans are indeed the cause of the [global meltdown] of the [financial infrastructure]. Please note that a good descriptor of the core of the [financial infrastructure] descriptor is the Catherine Austin Fitts description of the “central banking (and) warfare model”. It is the totality of all human activity which allows the [central banks] to exist, and further that which allows the TPTB to [implement war (as a power tool)] that will be [under threat] of [complete disruption/dissolution] over the first half of 2010. Further problems for the [financial infrastructure] will emerge as a [direct impact] of [unexpected levels] of [populace] and [corporation] disruption due to [extreme weather episodes]. Further there are many internal Markets entity descriptors which go to the idea of a [total-is-greater-than-sum of parts] impact from the manifestation of [climate systems breakdown] forecast by the Terra entity for the first 7/seven months of 2010. This [continuing climate alteration] becomes, to the aware observer, a very good temporal marker for [planetary climate systems transition period], and the data sets within the Markets

entity are accruing around the idea that [some participants (in the broader markets)] **will** be aware of this [fundamental \*(or core solar system)] change, and that the [aware observer of markets activities] **will** be able to discern the [shift among the players] over these next 7/seven months. This [shift of markets participants] is apparently a very big deal given the [visibility] levels (relatively low until about July, 2010) versus the sum of the [impact] and [duration] value sets which are at extremely high levels. The [cause] of the [shift of markets participants] is a separate linguistic structure from the [degradation] and [dollar death] sub sets, and **may** be indicative of a [withdrawal] of the TPTB from the [minor distraction (of the) markets] as a result of the [larger problems manifesting].

The accretion patterns for the Markets entity over the course of the next 2/two solar calendar years {ed note: 2010 and 2011} are dominated by cross links over to the TPTB entity where the termination points are within a linguistic structure that we are labeling [le scheme grand]. The patterns begin to be dominated by building cross links from TPTB indicating a [clamping of control systems] from about January 11<sup>th</sup>, 2010, and continue to grow through to about mid May. Thereafter the [le scheme grand] begins to run into [crumbling] issues, but note that prior to that, [huge/giant/magnificently grand] attempts will be made on the part of the [degrading anglosphere] to [exercise complete control]. The data sets within the Markets entity are providing a picture of a [forced movement (of digital assets)] into a [new control paradigm] on a [planetary level] which will be [offered] in the [guise] of [successful re-creation of the planetary currency system] with attendant [promises] of [prosperity for all]....as long as the [central bank of the world] is [willingly accepted] by the [victims] of the [nation state central bank system].

The data suggests that [corporate globalism], or [planetary corporate fascism] will be [offered] to the [peoples] of the planet over this next year with the largest emotional push for the [global central banking system (and conversion of **all** currencies to digital 'wealth')] will be in the [third month] following the [inception of the next, bigger phase] of [economic ruin] for the [nation states] of the world. The [dollar death] is part of the [le scheme grand], and the data indicates that the [dollar repudiation] of the first quarter of 2010 will push the [agenda] for the [scheme] forward in the [anglosphere]. The [scheme] depends on [riots] and [shortages] and [markets control (of edible commodities)] to succeed. There are indications that TPTB and their [political minions/stooges] will seem to succeed over the first half

of 2010, but will face [differing manifestations] from July 7<sup>th</sup> onward. Noting that the [riots] are a [required component], the aware observer will not be surprised to read many reports from [those in attendance] of [agents provocateurs] and [blatant incitements] to [mass misbehavior]. Further, the [agents provocateurs] will be in a [dance] with [military/law enforcement] that will provide the [required suppressive response] from the [minor fascist stooges].

All of these considerations are necessary for a mindful examination of the [markets] behavior over these next few months. The [gold into tungsten scandal/debacle] is now showing as the [propellant] for the [rapid and shocking ascension] of both the [dollar denominated value] of [silver] and the [gold to silver value ratio]. The [reduction via corruption] of the [known above ground gold supply] by the [tungsten cladding crime] has yet to have **any** of its forecast level of repercussions. The Markets entity forecasts [political debasement] at a [humiliating level] for the [nation state officialdom representatives], as well as [war threats], and the [deliberate hastening] of the [dollar death].

Further muddying the mix of data accretion patterns within the Markets entity are indications that the [dollar death] problems will be [taken on the chin] by the [woefully unprepared USofA administration] beginning in January. However, as may be expected from the [political class], only [lies] and [distortions] will be [offered] as [explanations] for the [upcoming dollar (and financial institution)] crises escalation. They (TPTB and their minions) who control the [markets] will not be admitting that it is [base metal corruption] in its purest form that will be the [trigger] for the [massive repudiation] of the [usofa dollars] from foreign states. There are some levels of aspect/attribute sets accruing in support of a **brief**, but successful as long as it lasts, [seizure] of [gold assets] that are [held/stored or accounted for (physically)] in the [possession] of **any** [representative banking/financial organization]. Also there are indications that [laws] will be again passed against the [private ownership] of **either** [gold] or [silver], but given the [chaos] that will prevail at the time of the [law signing], it will mostly be [ignored] in the [collective move into social chaos]. As a side note, both the Markets entity and the TPTB entity have labels for this upcoming period of [social chaos] within the [anglosphere] and these labels are going to the idea of [civil warfare]. It would appear that the [owners] of the [debt of nations (central banks)] will attempt to foist both [external global war] as well as

[internal social war (civil war)] as prompts for the [le scheme grand] that will promise the [end to war (all problems)] and [prosperity for all].

While the data sets are showing the growth within the [hyperinflation] sub set unabated, there are supporting sets within the [markets mechanisms (currency control systems)] which is itself a sub set of the [federal reserve crime cabal], that go to the idea of [withdrawal] of [support]. These areas are further supported by aspect/attributes describing a [systemic rot] of the [financial system] over the first few months of 2010. This [systemic rot] is showing as [pervasive] and becoming [exposed] as the [criminal federal reserve banksters] will 'attempt' to [stabilize] the [currency flows]. They are indicated to be [reacting in shock] and further to take [actions] that will [reveal the gaping holes] in the [control systems]. Once this [secrets revealed] phase of [currency control] begins to manifest (in late Winter 2010, most probably after February 11<sup>th</sup>), the data sets are all gathering under the descriptor of [breach (in the dam)]. This area is in the direct support chain for the [usofa dollar] and is pointing to the [pulling of the trigger] event(s) which will create the [dollar death] conditions that will be **so** [shocking] to the [populace].

Even within the Markets entity, the [shocking] aspect/attribute set is so well supported that it would suggest that the [propagandist press (main stream media)] will repeatedly use the word [shock] to describe both the [impact to the system] as well as the [impact to humans] of the [economic conditions (of early 2010)]. Other areas within the Markets entity show that [men (within the markets structure/operations)] will also be [frightened (by the shock] of the [dollar death impacts]. There are further areas in which the aspect/attribute for [shock] is also plentiful, and these include [currency trading], and [repudiation (of the dollar through the system)]. Both of these are very important sub sets with huge levels of cross links within the Markets entity. The [repudiation of the dollar] is also supported very graphically by sets going to [shit (returned)], and [revenge (of the burned)], and [hidden effects (of composting the shit)]. Within these reports **any** and **all** references to body parts or processes are taken very seriously as these are primal archetypes that in past work have always been very significant for developing events. Also note that we have had the [repudiation (of the dollar)] and the [shipping (back home) the dollar] in our data sets since 2002, and as such the long term impacts cannot be easily overstated.

## TPTB (The Powers That Be): Shorts, Sordidus Sub Ubi, Nervus Vagus, Spasm, Volvere Occipitum, Masque de la crainte

Shortages are coming. Globally, the [shortage] sub set is growing rapidly within both the Markets entity as well as the TPTB entity. Within the TPTB entity the [shortage] sub set growth is the more spectacular in language intensity, though the Markets entity has the larger sums under [shortage] for both impact and duration.

The [shortage] language shows that it is both a [tool] of TPTB, and is also associated with [fear]. The [tool] aspect/attributes also itself contains supporting sets that contain the [fear] aspect/attribute. This is telling as it points to the other supporting sets of [danger], and [dangerous situation], and [irrational response]. These sets are found in support of the [tool] supporting set of [shortage], and also are primary supports to [fear] as well. The idea coming across from these supporting layers is that ‘even as a tool’, the [shortages] period will be [dangerous]. The [danger] to the TPTB is described as being of [irrational violence] in [response] to [hunger/starvation]. There are several layers {ed note: 23 in number} in support of [danger] that cross tie to the [hunger/starvation] sub set. These sets include detail layers of [mobs] and [irrational group behavior]. The [danger] of the [shortages] comes from a period several months after the initial [shortages] appearances. By the time indicators, the earliest that these linguistics may appear is very late Spring, but more likely in early Summer. The details suggest that [mobs], that will act out of [irrational group (self reinforcing) behavior] will [attack] members of the TPTB in [angry response] to [prevailing hunger].

The pictures coming from the details of the [shortages] period indicate that **unlike** previous [depressions], the [pressures] this time are showing that the [social order] will [crumble] in a [rapid] manner once a [threshold] of [mass suffering] is [breached]. The issue seems to be large scale [failure] of the [distribution system] results in [shortages] of [food] across [wide regions] of the USofA and other countries. In the USofA the dependency on the Just-In-Time distribution system results in a very rapid state of [deprivation] and [hunger] in less than a week. In many of the supporting sets to both the [shortages (as) tool] and [shortages (as) fear focus], the data at the detail level describe [masses (mobs)] of [hungry/starving] people who are [foraging] and [hunting] [outside (of their) environs]. The idea coming across is as a [mass invasion] of [small wilderness(es)] and [suburbs] across

a large part of the [USofA]. While it seems to be mostly affective of the [continental USofA], there are lots of references to [alaska] and other [remote properties] of the [USofA]. The [foraging mobs] problem is described as a [danger] to the TPTB as they apparently [expect] or [assume] that the [central government] of the USofA will be [largely ineffectual] in addressing either the [hunger] and [shortages], or the [riots].

There are several supporting sets within the [fear] sub set of TPTB that derive from the [hungry mobs foraging] detail layer. The is [anticipatory fear] held by the [minions] and [lower level] members of TPTB that the [mobs] will [soon] be [foraging] in their [home areas].

There has been a distinct shift of the [fear] sub set within the TPTB. It has always held both the [fears felt by the TPTB] and the [fears that TPTB used (against the rest of us)], however it now is splitting into 2/two distinct sub sets, both headed by the descriptor of [fear], but now with separate focus toward differing views of the [self (the 'self view' of the actual TPTB)]. In the larger of the 2/two sets is the [fear] set which is focused on the view of TPTB as they 'see their own (fears)'. The other, smaller set, is focused on the [use of fears (against) the populace]. In the case of the former, there are areas of growth under a number of new sets within the supporting chain. These [internal viewed fears] are found to be clustered very loosely around the idea of a [mass awakening] at an archetype level. There could be many other interpretations, but the general feel of the detail layers seems to be forming up under the idea that the TPTB, especially as expressed by their political minions, are [afraid] of a [rapid] and [wide spread awakening within the populace]. There are many sub sets in support of the [awakening] set including [spiritual], [economic], [military], and [science] and others, but all are in their turn pointing back to the TPTB view that any form of [awakening] is a [danger] to them. However, the single largest set under the [internal fears (of the) TPTB] is entirely centered on [earth changes]. The primary support for this set is (not unexpectedly) split between [cataclysm] and [2012]. Again though, it must be noted that within the [fear of cataclysmic earth changes in 2012] set, the internal [fear] archetype is also heavily weighted toward a [fear of the populace (catching on/getting hip to it/awakening to the idea)]. Universe has placed a somewhat ironic note into the whole of the proceedings up to and through the 2012 [feared cataclysm], in that the TPTB **are indeed driven** by a [contractual need (or requirement)] to [openly proclaim (their actions/knowledge)].

Our data sets for TPTB have continued to grow supporting and detail layers under the descriptor of [pole shift/earth changes/2012]. The data for the TPTB entity has held this set since the creation of the entity in early 2002. From that time the growth of this sub set has been steady, albeit at a low level. The growth rates increased {ed note: along with the 2012/pole shift set in Terra entity} over 2004 – 2006 with the various sudden, and devastating tsunami and storms. Since early 2009, the Terra entity [pole shift] sub set has NOT gained any of its new support from longer term data sets. This was initially not true of the [pole shift/earth changes/2012] sub set with TPTB entity, though that has changed over this last processing. Now the growth of that sub set within this entity also consists of only shorter term value sets.

The aspect/attribute sets accruing to the [pole shift/earth changes/2012] sub set here in the TPTB entity has 1/one of 2/two primary support levels of [control (through fear)], with [fear] as the secondary support layer. Within these sub sets and down through the detail layers, the aspect/attributes which dominate are focused on [controlling (the) population(s)]. There are aspect/attribute sets of a huge diversity, but they are clumping in general supporting sets that ultimately line up under [control (systems)]. These data sets include aspects/attributes for various of the ‘popular story lines’ that are out-and-about in the wild (internet) such as [population reduction], and [deep underground bases], and [pandemic disease], and [war], and [starvation/shortages].

Again, as noted above, the larger of the 2/two primary [fear] archetype supports is under the [2012 cataclysm scenario] descriptor. There are large numbers of interesting detail level aspect/attribute sets that are clustering around the [pole shift/crustal shift] sub set. It must be noted that almost all of these sets cross link back over to the Terra entity where they are terminating in similar sets for [cataclysmic earth changes]. A very interesting timing clue has arisen which shows that the TPTB are fearful of much more than 2012, with a large portion of the [cataclysm] and [aftermath (nova ordo seclorum /new order of the ages)] extend, via lexicon array links, out into mid 2018.

The data sets are accruing within the TPTB in a curious way which seemingly provides substance to some forecasts made within the ALTA reports of a number of years back. The TPTB data set now has the [religion] archetype ‘expiring’ before 2014. Stated another way, our previous forecast of a [death of religion] wave from back as far as 2003 are now gaining support within TPTB entity under an internal supporting set for the

[cataclysm feared in 2012]. These sets are suggesting that among things like [electrical grid], and [astrology (as we knew it)], the [monotheistic religions] are **not** expected to [survive 2012] and the events of the 5/five years following. It needs to be clarified that the descriptor set for the [monotheistic religions] is focused on the [organizations, and their controlling dogma (which allow for self identification with the religion)], and not any specific tenets or rituals.

Along with the [religion(s) don't transit (past 2012)] sets, a late arrival of a groups of aspect/attributes have clustered around the idea of a [coup de'tat] that will [bedevil] the [ThePowersThatBe] over the course of 2010 and all through 2011 and beyond. This linguistic structure includes a distinct [metaphysical] twist to it all. The [coup de'tat] descriptor set includes aspect/attributes that go to the idea of a [SOC (self organizing collective) of Colonels (and Commanders – Naval reference)] who are all [currently working/assigned] to the [black ops world (ufo science)] will [bind] the TPTB to an [agenda] **not** [desired] or [foreseen] by TPTB. The [Colonels/Commanders Coup] is initially a very low [visibility] event, though indicated to have at least enough [visibility] to bring it to the attention of the [aware observer]. This [DarkSideOfTheMoon Coup], within the TPTB entity, will gain [visibility] over late 2010 with a [burst] of [knowledge] in mid 2011. The [DarkSideOfTheMoon Coup] **will** bring out a couple of very engaging [personalities] over the course of Summer of 2010, though the [mass media] will NOT know about the 'back story'. The [Commander (and) Colonel personalities] will [emerge] within the [main stream (propaganda) media], though the accretion patterns show that the [propagandists] will not know how to [cope with/spin] the [information] as well as the [actions] of these [individuals]. The data seems to suggest that the [media] will [catch a glimpse] of some [behavior] that will [betray] a very [small part] of the [power (represented)] by these [individuals]. This [betraying glance] will be of great importance later, at many levels, including [personally] to some of the [press participants]. The aware observer will be able to make this mid Summer 2010 connection between the [momentary (and disquieting) appearance] of the [Colonel and Commander] and events that will emerge with [force] in late 2010 and early 2011. Please see SpaceGoatFarts entity for further discussion.

Also directly connected to the SpaceGoatFarts entity, but discussed here, are the sub sets that go to the [secret societies] and their [agenda]. Not only with the [coup d'colonels'] interrupt their [plots and plans], but other [impacts] or

[strikes against] the [control system agenda] of the [secret societies] are indicated to come from personalities that can best be described as [frequency masters (of the gnosiine)]. These [frequency masters] are described by the data as [awake individuals] who are [skilled] in [ancient arts] {ed note: curiously also able to be described as ‘future arts’}. These [gnosiine] who [are masters (of the) symbols (and) frequencies (of universe)] are forecast to be [emerging] into [problem status] for the TPTB and the [secret societies’ agenda] over 2010 and 2012. The aware observer should be able to catch the first hints of rising [visibility] around the [problems (created by)] the [gnosiine frequency masters] from July 7<sup>th</sup> onward through 2010. Much of the data sets that describe the [gnosiine] are within the SpaceGoatFarts entity, however the real manifestations will emerging around [all things related to TPTB through their secret societies structure]. The data sets are painting a picture of [agents] of the [secret societies] who will be [misguided] and will be [messing with the wrong people, at precisely the wrong point in time]. It needs to be noted that the [gnosiine] descriptor set within the SpaceGoatFarts entity contains very completely supported aspect/attribute sets for [karios (the appropriate feel of time = the opportune moment)]. It would seem that a sub set of [gnosiine behavior] is built around being able to [feel time] and to [react (in karios)] with what will be described (from the outside) as being [exquisite (sense of) timing]. The [sense of] supporting set of the descriptors within the SpaceGoatFarts entity not only links back to the TPTB at every supporting sub set, but many of the cross link terminations are within the [un-imaginable] and [frustrated (by inability to understand)]. These sets refer to the [nature of sense (and sensation)] within [pulsating energetic reality of the holonomy] that will be [not able to be grasped], or [beyond the ken (ability to understand)] of both the TPTB and their [minions]. Unfortunately for the TPTB (and especially the minion classes), their [masters (the macrobes)] **do** understand the nature of [gnosiine harmonization (with) karios]. This juxtaposition of [minion ignorance] and [master’s understanding] will itself contribute further to the [manifesting problems] into which the [agenda] and [agents] will [crash]. The data accretion patterns suggest that [punishment] for the [offending stupidity (of the various minions)] will be [placed upon (the) TPTB] {ed note: which seems to have been the point all along.}, so these next 2/two years will have **many** instances of members of TPTB [encountering karmic response]. The patterns of the accruing aspect/attribute sets indicate that the [visibility] of these [karmic displays] will be rising from the vernal equinox (2010) onward. The data actually has cross linked data sets over to the GlobalPop where the termination sets are [wtf? (what the fuck?)] indicating a feeling of [collective

puzzlement] over the [startling] number and nature of [karmic displays] afflicting the TPTB.

Under the [karmic displays] sub set there are smaller sets that describe such manifestations as may be observed coming from the TPTB over these next 2/two years. These [manifestations] include [displays (among celebrities)] and [political minion classes], and even within the [papacy/organization (of sorcerers)] that will bring [eye hiding], and [partial face obscuring] to new forms of [public masking (of the eyes/face)]. Further [displays] will be able to be observed within [sudden changes] in [global fashions], **especially** for [children], and [mid level 'management']. There will also be [displays] from [celebrities] at all levels globally, that will be [suddenly sullen], or [reactively violent]. The descriptor sets include very high support for [emotional (reaction) displays] and [inappropriate (paranoid) reactions]. The data sets are indicating that the [compliant propaganda press] will mostly **not** comment on these rather [bizarre displays], and in some instances, when [pushed] will even [defend (the) excessive response] in [public]. These [displays] are indicated to be [centered] in bespoke [fears (about personal) survival] that will be [surfacing] from the [palpable fear (stink)] emanating from TPTB and down to the [minion classes] where the [displays] will be captured on [video].

## Populace/USofA: Pigs Fly, Fish Fry, Dollar Dies, Sheep Cry

Ed Note: The Populace/USofA section is very large due to levels of indicators for major changes never before encountered in our work.

The accretion patterns are painting a picture of the transition of the [populace/usofa] emotionally into the [active] phase of [transformation]. As the aspect/attribute sets would have it, [small things] are [falling away (from mass attention)] as the [great things (are manifesting/developing)].

The data sets have maintained a view of these current times as being [monumental] when viewed from [future generations]. In our view, those [future generations] will build [monuments] to the [epic] nature of the times in which we, the 'fortunate', will live.

The data sets, including the immediacy data processing, are providing a linguistic description of a [transformation] of [life (as we knew it)] across the last month of 2009 and the first 10/ten months of 2010. The first bulge in

the data processing shows across January and February of 2010, though its beginning is clearly in late December. Perhaps by the 15<sup>th</sup> or so, the changes within the language will be making their way into the [propagandists press (aka mainstream media)]. The accretion patterns of the aspect/attribute sets for January and February of 2010 are led in duration and impact sums by the set headed by [usofa dollar], HOWEVER please note that the supporting sets for this aspect/attribute set are NOT focused on the 'dollar' at its abstract level as a 'paper currency' or even as 'international exchange', rather this data set is supported at the primary level of [food], and the secondary level by [resources/utilities]. In both of these sets the main set of the [usofa dollar] is replicated in supporting role, and its support in turn is based on [international trade].

As the data processing results were accruing to the various sets in modelspace, it becomes quite clear that the [food] sub set is acting as a proxy for all things necessary and vital to life. These [victus vitus] sub sets are also heavily cross tied to, and dominated by [shortages]. These cross links grow to reach their largest levels of growth in late November 2010.

The [shortages] sub set growth begins in late January, and within the [food] sub set. The data set growth shows that a [crash] in the [real debt] which is [backed/backing] the [dollar] will have a [rapid], and [sudden] impact in the form of a [shock] to [food supplies] as well as [food prices]. The accretion patterns suggest that the first impacts will be felt in the [north east] of the USofA. These impacts are indicated to be in the form of [shortages] of [fruits] and [vegetables], and [other food items] that are [seasonal] or [imported (fresh)].

A large sub set of the supporting groups for [shortages] within the [dollar] sub set of the Populace/USofA contain some form of reference to [government coagulation]. The [coagulation] sub set can also be referenced under its other primary descriptor of [implosion (monetary)]. The imagery coming across from the detail sets are filled with [open visibility] of the [coagulation] of the [central bank (and government)] rising to the level of [common discussion]. A number of sub sets contain support for the [dollar death] trend line being [crushed] by [debt repudiation], and this will lead to [failure] of many of the [entitlement programs] of the [federal government]. These [coagulation] sub sets are running parallel in growth to the [shortages], and the [food (and energy/resources) crisis] sub sets.

The inter entity cross linking around the [dollar death], and the [transformation] sub sets is very complex. Both are directly supporting the [revolution] sub set within the entity, but both are also nearly identical in size and scope (into the future) within the entity. In the case of the [dollar death] as support for the [transformation] sub set, the primary termination points from the internal cross links include [(imported) food(s) crisis], and [government/officialdom lackeys (and propagandists)] both of which have a very high [visibility] sum beginning in late January and continuing for some months thereafter. The idea coming across is of a [barrage] or [planned campaign] of [officialdom propaganda] designed to [dominate (common discussion)] during the development of the [national dollar crises] of late Winter, specifically January and February. The data suggests that the [paid shills] of the [propagandist media outlets] will be going into overdrive as they are [ordered] to [counter] the [revolutionary language wave] that will manifest over Winter of 2009/2010 as the [dollar death] places a [large/increasing burden] on the [middle class] of the [populace]. The Press entity cross links terminating in this area of the Populace/USofA entity confirm a [propaganda landslide] intended to [bury (the opportunity for) thought] about **any** other subject(s) including the [struggle to survive]. The data sets indicate that it will be the rapidly spreading [cresting wave] of [open discussion] of the [personal poverty wave] and [personal reaction (to the) dollar death] that will [prompt] the [propagandists] into [emergency reaction mode].

Nearly simultaneous with the [propagandists] going into hyperdrive, there are aspect/attributes accruing to the Populace/USofA with Press entity cross links that go to the idea of the [great ?????? shortage of 2010]. The idea coming up from the detail layer is of a [commodity] with [national importance] that will be severely impacted up the [dollar death], however this area is not describing energy or food (per se), but rather some item that will have high [visibility] within the [national] and [international] press (mainstream media), and also have very high [personal emotional impact] values, but that is not really a [necessity (of life)]. While the details are elusive, they would point to something like a 'national coffee shortage' that would both generate [lots of press] as well as [lots of personal anxiety]. While not showing up as 'coffee', this example does provide for the [addictive] language sets that are at a tertiary level of support for the [nationally impacting commodity shortage]. For Igor this would be a [national pie supplies shortage] to have the same level of emotional impact as coffee withdrawal. Whatever the [commodity shortage] is that so gains

both [national], and [personal emotional impact], the language around this will be very important as a temporal marker for the rest of 2010 and well into 2011. The forecast trends within this linguistic set point to both the [type of commodity] as well as the [speed (with which)] the [shortage takes hold] as being key pointers to how the rest of 2010 will fare here in the USofA. This [shortage of key (though not life necessary) commodity] is the precursor temporal marker to the breakdown of the global Just-In-Time commodities and distribution system. A side effect of this will produce new opportunities later in 2010 as the Populace/USofA entity is indicating that new classes of work will develop around turning existing empty spaces, (mostly retail), into [new warehousing/storage facilities]. Not that there will be much demand, but apparently behind the scenes the [officialdom/government/military] will be working to build a [national warehouse infrastructure].

Returning to the theme of the [propagandists in overdrive], the Populace/USofA entity is indicating that a very large [shock] of [mental impact] for the [fundamentalists] and those of the [populace] afflicted with [radical religious \*(hard mental constructs defended even at the denial of reality)]. This [shock] of [impact], is part of a sub set headed by [sudden (awakening) or (awareness)], and the supporting layers are packed with aspect/attribute sets describing a [wave] of [occult symbolism] and [hypnotic mind control (via mass broadcast images)]. The data seems to suggest that some part of the pending [propaganda campaign] will produce a series of [blatant], and [public] use of [(formerly hidden/obscured) Illuminati] symbolism such that large parts of the [religiously afflicted middle (and lower) classes] will [suddenly 'get it'] or [view through the illusion (of public discourse)] that their [respected religious leaders] {ed note: including the 'officers' of the [vatican] at all levels} will be [revealed], by their own actions, as part of a [historical] and [global] plot by the [illuminati/TPTB]. The sad part of the supporting data sets are that many of the [newly awakened religiously afflicted] are indicate to NOT be able to [rebuild] a [healthy] or even [functioning] mental model of the universe. The data suggests that there will be a few [suicides] both [willing] and [not] as a result of this [recognition of betrayal] by their [preachers/priests/popes]. The larger social impact will arise from the [discontinuity], and [distrust], and [disconnection (with reality)] that will be [worn] or [carried externally] by those who suffer from this [shock (of) revelation]. The data sets are pointing toward several, very [public] and very [visible] instances of [self-destroying], or [self-imploding] of [national religious organizations]. The

data points to the bespoke [betrayal] of the [faithful] and [formerly deluded participant members] of the [religious corporations (by being run by Illuminati principles)] as being the [ignition] of the [conflagration] and [emotional confrontation] that will become so [visible] as 2010 progresses. The data suggests that it will be the [felt] or [personally owned] sense of [betrayal] that will lead to a large social impact as these [religious corporations] go into [meltdown] and [dissolution].

The data sets in support of the [betrayal] of the [religiously afflicted] by their [religious corporations] are cross linked extensively over to the Markets entity and TPTB entity at so many levels that there is not enough time to detail the various termination points. Suffice it to say that it will be the [dollar death] that will [pull the veil off] of the [religious corporations] as they become [fiscally and financially unstable] over the first few months of 2010. This [financial impact] from the [dissolving dollar] will precipitate much in the way of [emotional tensions] within these [corporations] as [perfidy] and [theft] and [manipulation] come to be [visible] with the [masking effect] of the [dollars] being taken away by the [sudden poverty] induced in the USofA due to the [dollar death].

The whole of the [national religious corporations implosion/immolation] sub set is in direct support under the [shortages] linguistic set, and indicates that the [national shortages] language (as it manifests) can be used as a temporal marker for the pending [religious organization meltdown].

The [implosion] of the [national religious corporations] is part of a very large collection of related sets within the Populace/USofA entity that are all extensively cross linked back over to the Markets entity and the TPTB entity where the point of termination is the [decay (of the) dollar corpse (or failed infrastructure)]. Other sets within the Populace/USofA entity that are also part of this collection include [federal government coagulation/contraction], as well as [entitlement programs collapse], and [military coup de'tat].

The [contraction of the federal government] and the [social (safety net) entitlement programs] is indicated to act as the [precipitating catalyst] for the [revolution] meme moving into the **next** active phase. The data suggests that the [social security system] will [collapse] {ed note: very rapidly once visibly begun} and this will [trigger] not only the [immolation (of the) religious organizations (due to their dependence on sucking money from

pensioners)], but also the [shift] of the **majority** of the [populace of the USofA] into [poverty].

As modelspace begins its movement into 2010, the sub set of the [usofa military] {ed note: all branches, all forces, but **not** including civilian sub contractors, or ‘civilian’ intelligence agencies} grows very rapidly in emotional sums for both impact, and duration {ed note: our 2/two key values}. The data sets that are pointing toward a [crisis] that will [sit upon] or [beset] the [USofA military] over the first half of 2010 in which the [traditional aloof posture] will be [publicly tested] or [exposed (to) question]. These data sets include sub sets in the supporting aspect/attribute accretion patterns that include [illusionary posture (or isolation) exposed], [cabalistic control revealed]. These areas of support are themselves supported by sets indicating that [complex (symptoms)] of [relationship (between military, populace, government, controllers) change]. There is some potential for mischief here as the data sets include both [internal policing], as well as [coup de’tat]. There are new sets that are growing in support of [conflict] at a great many levels emerging between, and [among] the [usofa military], and the [officialdom], and the [populace/usofa]. As may be expected the totality of these sets are in support of, or dominated by, the [revolution] meta data level.

The data accretion patterns are suggesting that the first half of 2010, in so far as the [usofa military] is concerned will create an emotional tone that will be able to be described as [black world meets dread world]. Along with **ALL** of the other supporting sets of [military usofa], the [black world (now exposed) meets dread world] supporting linguistic sets take a huge and significant turn (perhaps a peak?) in early July 2010. This rapid shift in the growing of the accretion patterns under [military, usofa] is **apparently** in harmony with a larger wave in the larger [populace/usofa] in which the [revolutionary] meta data layer dominates from July 7<sup>th</sup> of 2010 through to nearly the end of 2011.

The [dread world] sub set is extensively cross linked to the SpaceGoatFarts entity where many of the termination points are in the broader descriptors for the context of the [woo-woo world]. These include such as [alchemy], and [space aliens], and [denied/hidden ancient history], and hundreds of other areas within the context of the [alternative view of reality]. This is NOT intended to read like the “Men Who Stared At Goats” script, however many of the detail sets do have a combination of [dark/dread] and [quirky] to them that suggests a time for the [usofa military] in which the much more

than [toes] will be dipped into the pond of the [universal sur(e) real]. The [surreal] language sub set is indicating that much of it will be [repeatedly on the lips] of those within the [upper tier] of the [usofa military] as the [dread world] intrudes into their [sure and certain (view of) reality], but there are only small levels of [visibility] sums for this set until late in 2010, so the general [populace] will likely not be aware of the [curiously twisted surreal context shift] that will affect their [military (and its) rulers] until well along into the process. That said, there are enough [visibility] sums in key areas that it would appear that the [alternative channels/press] within the planet will be in a position to [accurately report] the language that is being forecast within the [dark world meets dread world] sub set. So the aware observer should be able to pick up clues to the emerging situation as 2010 moves from Spring into Summer. Much of the detail sets would seem to be implying that the [galactic view] of [reality] that is [held/possessed] in the [dark/shadow/black] side of the [usofa military] will not only be [transformed] over late 2009, and early 2010, but that it will also [spread] or more accurately [seep] into the [general context] of the [usofa military] over this time. Unfortunately for the [black world philosophers or meta perception architects] their [view/perception] of the [system complexities] will be [proven wrong] during this period, thus initiating a [reappraisal] within the [ruling coalitions] that will bring them [starkly] into both [galactic conflict] as well as [face-to-face] with a [desperate need] of [dread assistance]. See SpaceGoatFarts entity for further discussion of related linguistic structures.

As modelspace is progressed through the vernal equinox boundary {ed note: we employ a 13/thirteen month lunar calendar for our work with 4/four easily identified temporal markers being the 2/two equinox, and 2/two solstice events annually}, the data sets for the [shortages] shift significantly in supporting sets toward a new manifestation in an apparent [shortage (of) funding]. This last is also described as a [sudden decrease (in) funds flow]. This set begins to form support in late March and grows through all of Spring and Summer of 2010. At the primary layer of support are descriptors for [municipalities], and [counties/parishes], and [insurance companies]. This last is apparently a very large 'key' to the grow levels of the set over the rest of Spring as the [insurance companies] which will [fail] due to [shortage of funds] are apparently those firms that participate in [retirement systems]. The idea coming across is that the [failure of the retirement systems], specifically including [state, local government, NGO pensions] as well as [guarantee corporations (insurance companies)] will apparently

trigger a series of [government defaults]. These linguistic structures are arriving in support of the [government coagulation (contraction)] descriptor set. In this case, the supporting sets are going to the idea that these [first impacts] will be at the [local] and [municipal] and [county] and [parish] levels. The detail aspect/attribute sets indicate that [layoffs] at the [local government] level will [spiral (rapidly) upward] to the extent that many [municipalities] are indicated to [simply fade away (disband as corporate entities)]. The data sets are accruing in patterns that suggest that the [spring wave (of) municipal failures (coagulation)] will [precipitate] and [aggravate] a [response wave] that will directly [propel (the) state governments] into their wave of [coagulation] and [layoffs].

The data suggests that the actual triggering ‘event’ will be the [reduction (to) near nothing] of the [ability] of [citizens] to [pay taxes]. There are secondary sets going to the idea of a [tax revolt] that will [manifest (from) desperate needs]. This [tax revolt (due to poverty)] is indicated to affect all levels of the [social infrastructure]. The supporting aspect/attributes include [federal entitlement programs], and [state support], and [military infrastructure (national guard)]. Further supporting layers arrive that support the [revolution] meta data layer as a direct result of the [dollar death] that continues to unfold through the last of 2009 and 2010. The levels of [local] and [state] government [layoffs] and [disbanding] will cause huge levels of [social disruptions]. These [disruptions] will add further [fuel] to the [revolution] meta data layer as those linguistics become [active] from Spring through the rest of 2010.

Much of the [social disruption] due to the [impact (on) government] and [retirement systems] is indicated to begin in the South and North east and to [spread west]. There are some indications for a period of [chaotic isolation] of the [remote South West] at about the same time, but this appears to be less [local] and more [federal] in origin. The [spread] of the [collapse of the tax base] at the [local government] level will take months to work its way across the nation, but nearing the end of the [spread (of) local government poverty], a ‘threshold’ will be crossed and the rest of the nation will go the same route in so short a time as to be able to be described as [almost overnight].

The [revolution] meta data layer, being ‘fed’ by the emotional pressures of the [sudden] or [shocking] plunge into [poverty] at so many levels in local social orders, is indicated to rise to dominance by July 7<sup>th</sup> (or so) in 2010. As

the [revolution] meta data layer shifts to dominate the Populace/USofA entity, it puts corresponding pressures on the [revolution] **and** the [transformation] meta data layers within the GlobalPop entity.

In both entities a set of linguistic structures of intricate complexity and extensive cross links begins to appear in late January, and to progress to easily discernable mass by mid February. We are labeling these sets the [government robbers] sets. These linguistic structures are seemingly pointing to a [plan] {ed note: not necessarily its success, merely its existence} to [confiscate] the [gold] and other [precious metals] held by the [citizens] and [corporations] of the [anglosphere]. This [plan] will apparently come to [visibility] in the [alternative press] as the first of its [stealth provisions] are [‘debated’] by several [legislative bodies]. The idea coming up from the detail layers is that the TPTB’s [political minions (also known as political criminals, congress critters, political parties)] will be [desperate] to [acquire gold] to [pay off international debts]. The [scandals of false gold] from 2009 will [erupt] in very early 2010 and are indicated to put huge pressures on the [political and banking minions (of TPTB)] as [creditors (especially China)] demand [compensation] for their [derivative holdings]. This [desperation] on the part of the [political class] is showing as [pushing] them to [desperate decisions] that will [blow back] into their [crotch] like a flame thrower as the mere [leaking] of the [plan to confiscate precious metals] will precipitate both [riots] and [markets collapse].

Again the [riots] sub set is gaining large areas of support from aspect/attributes which include [secret societies], and [corporate (black projects) secrets]. In both of these supporting sets, the detail layers seem to indicate that [riots] in [near proximate] to the [facilities] of the [secret societies] and [secret corporate projects] will [spill over] such that [damage] will be done to these [facilities] that will in turn [provoke] several [instances] of [exposure] of [secrets]. These [secrets] are described as being such that [posting/publication] will be a [very large eye-opener (shock)] to the [unaware populace]. The [secrets] are also indicated to cause a [violent (unhinged) response] from TPTB. Further, and just as an aside, it **appears** as though 2010 will bring about a [looting] of the [‘death society’ (skull and bones cult here in the USofA)] in the course of several [riots]. Further there are also indications that after the first instance of [rioting bringing about looting] of the [‘death society’ facilities], the resulting [information] spread may provide the impetus for [organized thefts] and [gang(s) thieving (from the) death society vaults]. Please note that the [riots] sub set exists across all

of 2010 and well into 2011, so our timing clues for the [attack (on) THE vault] are not very precise.

Along with the sets for the [attack(s)] on the [academic secret societies] the data sets show that the [populace/USofA] will be [experiencing] the [breakdown] of their [social infrastructure] on many different fronts simultaneously. This will include the [implosion] of the [university system] as well as the [implosion] of many if not most [local school systems] as the whole of the [economic destruction] brought about by the [death of the dollar] manifests. The [university system] is indicated to be [burnt through (at both) ends] in the [financial systems] that support it. This is to say that both the [costs structures] and the [income streams] will be impacted in the extreme by the [dollar death]. The [hyperinflation] resulting from the [dollar death] and the [corruption exposures (at the Fed and in officialdom far and wide)] will further [crush] the [endowment system] **just** as [riots] across the nation bring back [memories] and [temporal echoes] of the [student movements] of the 1960's. The various supporting data sets indicate that [students] and [displaced (layoff/fired) faculty] will [occupy] and even [become residents of] the [building assets] of the [decaying university system]. As a side note, the former Moron-in-chief Bush(ies) and their [evil lucifer worshiping cousins] will be quite saddened (momentarily) to witness the fate of their beloved [tomb building] as it is [overrun] then [consumed] in the [revolution] meta data layer influenced [campus riots] in late 2010. As a side note, the [university system] will also be [thrown out] in the [public mind] over 2010 as the [new electrics] makes its way through public consciousness, and brings along with it, the notion that [universities] have been [producing false education] for [decades]. Indeed, there are going to be [direct] and [focused] (on the false science pumped out by academia) [attacks] on specific courses and subjects within the continuing [revolutionary campus riots].

The developing manifestations around the 'value' of the [USofA dollar] are forecast to reach a near term 'peak' prior to the vernal equinox in March, 2010. After that time, the data sets are indicating that a [context change] has occurred such that the problems facing society then, relative to the [dollar] are not those that we now face. In other words, it is as though a certain amount of 'realism' enters the picture in Spring of 2010 as [officialdom] will no longer be able to be [positive] about **anything** [economic], even in their [lies]. This will be due to the [beating] that the [economic (banking) infrastructure] will endure this Winter (2009/2010). Further the [shortages]

meme surfaces in the forecast manifestation over late February and beyond throughout 2010 and 2011 here in the USofA. Note that both Canada and Mexico are less impacted by the [shortages] in a **direct** manner, than the [populace/usofa].

The accretion patterns within the Populace/USofA entity bring a conjunction of growth in both the [attacks (on) academia], and the [revolutionary student movement]. The sub set for the [revolution (on university) campus] grows over Spring of 2010 and then just before Summer, the aspect/attribute sets shift en masse into support for a [revolutionary populist political movement/party]. The [contention] sub set grows very rapidly as the [student unrest] begins to [spread] throughout the [populace] in general. The [contention] sub set has the [battles] between the [elite] and the [populace] increasing from Summer of 2010 through the rest of the year, and through all of 2011. The [contention] is not a trivial sub set, and points to very large scale [social movements] that will exceed previous such social phenomena of the past. There are supporting sub sets for the [drunken response] by TPTB to the [rising revolution movement] within the [populace]. The word [drunken] has been chosen from a large set of descriptors as being particularly appropriate due to the [response] of TPTB and their [political (and financial) minions] seeming to be [under the influence (of alcohol)]. The other descriptors within this set include [irrational], and [insane], and [fearful pissing], and [soiling (self) clothing]. Please note that we pay very special attention to any language that brings out human body part descriptors or body process descriptors as these are very primal archetypes. These body archetypes are also found within the many other sub sets that point toward [disruption (of the former) relationship (between) elites and populace]. The [drunken response] sub set is also supported by other descriptors that include [incompetent], and [ineffective], and others going to the idea that the [coherence] of the [minions] of TPTB will be [lost], under the [assault] from [many areas], and that [bad decisions] will be the result.

The accretion patterns within the Populace/USofA entity over all of 2010 show a shift into [chaos], or [unexpected circumstances]. The inception of this pattern begins with an expected context change late in December, perhaps near the 29<sup>th</sup>. The accretion patterns thereafter are unlike those of any, or all, of the previous state of modelspace. The context change will likely take many months to settle into the general consciousness of the public, **if** ever. The [social (political and financial) chaos] of 2010/2011 is indicated to be dissimilar to other periods of instability within the USofA in

that every aspect of life will become involved in the [chaotic process] over these next 2/two years (2010/2011). The individual 'ripples' within the larger linguistic patterns are describing a [buffeting] or [rocking] of the [populace] that will seemingly leave no person out of the [chaos experience] as these years progress. The data sets are suggesting that the [individual perception] of the [unraveling/unwinding (of the rigid infrastructure/mind control)] will be as though [released (from) mental institution]. Both the individual data sets, as well as the accretion patterns are painting a coming time of [unraveling] of the many and diverse social arrangements that in total compose the [social infrastructure]. The data sets indicate that all [facets] will be [tested], and many will be [failing to deliver]. The stresses that these [failures (of the social infrastructure)] produce will in turn pressure [yet more failures] as the [officialdom] will also be [reeling] from the [shocks (of the onrush of the new)]. Apparently [officialdom] in all its various guises will also be [acting (as smart as) extremely drunken sailors] which will further [magnify] the perception of [chaotic times].

The [disruptions] of the [social infrastructure] over 2010 and 2011 within the continental USofA include:

1. Political franchises both at national and local levels
2. Medical systems
3. Financial systems
4. Local government
5. Retirement systems
6. National electrical grid
7. National energy supplies
8. National military agenda (and effectiveness)
9. Just-in-Time consumerism
10. "law enforcement"
11. Food (and energy) production
12. International communications
13. Space based activities
14. University (and lower level) education systems
15. Transportation (local, regional, national, and international)
16. Climate systems (affecting all of the above)

With the exception of number 16 above, all of the other cited areas are indicated to be [collapsing] or [imploding] under the [pressures (of corruption] and [twisted (hidden) agenda's (lies made into public policy)]. This huge load of 'bad karma' that has accumulated within almost all of the

[systems] that support modern life here in the USofA will be expressing itself over 2010 and 2011. The [collapse/death] of the [dollar (based) financial system] will continue and grow into 2010. The [dollar death] is already impacting all other components of the [social infrastructure] and this will continue to grow {ed note: exponentially after July 6<sup>th</sup>, 2010 right up to the trailing off period of late November 2010} with large jumps in [visibility] even within the [propaganda press (teevee and mainstream media)].

The data sets are painting a picture of the next 2/two years that will have all but the most determined deniers within the sheeple acknowledging the [changed nature of the planet/world]. Hmmm....it also seems that a lot of “I told you so!” will be thrown around as the sheeple herd awakens. See further discussion in the SpaceGoatFarts entity.

The whole of the Populace/USofA entity is showing that a [titanic/great/huge battle] is currently underway, and that the [dark forces/TPTB/evil-control-buttheads] will be [pressing (their attacks)] very extensively over the next 2/two years. These [attacks] are indicated to be the [absolute (last) gasp] of the [power structure] as it both [feels (that it is losing control)], and [observes (its loss of control)] occurring. The data sets within the Populace/USofA is pointing toward 2010 (mostly from July onward) through 2012 as the [last great battle] between the [small (rishi/gnosines)] {ed note: words meaning “those who are aware/know”} and the larger mass of the [ThePowersThatBe, and their millions of minions]. The [battlefield] is described within the data sets as being the [social body] of the [human collective]. The [attacks], and [battles] linguistic sets are painting pictures of a number of [areas/agendas] that will be the [hosts] of these [battles (for control) of reality]. Please note that this use of the [reality] word is deliberate, but does not include the concept of [conscious co-creation]. The idea coming across is that the TPTB are actually [fearing] the [current event trends] as [information] has/is coming out which relate to the idea that [consciousness expansion] will be the [hard stop] that puts the [TPTB and their minions] into both [rage] and [fear] of the [developing/emerging trends] of [enlightenment].

It appears as though an [example] for the [masses (of the social body of humanity)] will be arising from a smaller sub set {ed note: less than 8/eight percent of the populace} which is indicated to [shatter] the [public consensus consciousness]. This [consciousness expansion episode] is forecast to so

[freak out (with fear)] the TPTB, that a [series] of [actions] will be undertaken that will actually force [TPTB /and their minions] into other actions after July 8<sup>th</sup> 2010, that will be [diminishing] to their [position]. In other words the data is forecasting a situation in which TPTB will run smack into the [expanded consciousness (of some of the gnosines)] and they will then [escalate (the situation)] {ed note: they will not be able to help themselves, even knowing that their actions will most likely cause more problems for their programs, they will be forced by their very nature to continue digging their own graves} beyond their ability to either [control] or even [understand] the manifesting circumstances emerging.

As an example, the data suggests that the TPTB will use their [media stooges/propagandists] to actually try to [ridicule] and perhaps even [outlaw/make illegal] activities such as [yoga], or [meditation]. The data even goes to the idea that TPTB will try to set up [war commissions] to review and then [license] various styles of [martial arts] and other [body /consciousness movement techniques]. This will be accompanied by forms of control that will be buried in [complexity] of [laws] and [disinformation], but will boil down to an attempt at [forced (mental) medication] through [foods] and [waters (fluorides, et al)]. As a side note, the data indicates that some of the [poseurs (within the woo-woo community)] will become [exposed] via their [support] for these new [mental control via chemicals]. A key identifier of the [poseurs (within the woo-jo)] will be their [inability] to [discuss (certain subjects such as zionism)].

These [battle within the public social consensus] linguistics indicate that the [powers systems] themselves will be at very high levels of [visibility] as these [systems (go into) crumble mode]. The idea coming up from the detail layers is that [many millions] of [humans] will be [exiting] the [power systems] over these next 2/two years, and their [exits] will [create (a) crumbling] of the [power systems]. Further the data suggests that each of the [exits] is part of a [on-going feedback loop] that will [increase the rate of crumble]. The whole of the process is indicated to consume the next 2/two years as the [revolution] and [transformation] meta data layers go into their active phases. As the [center (of the) planetary control systems], the [anglosphere] is also indicated to be the [center (of the) contention]. These [wars] over [control] between the TPTB and the [gnosines] {ed note: misnomer as the gnosine do not want control, but rather to break the control cycles entirely, including [war]} are described as [monumental] and [pervasive (across society)], and [disruptive (to the social order)]. This last

will be a [propaganda point] used by TPTB to appeal to those humans who [fear] the [loss of stability]. There are further indications for [battles/contentions] at [levels/arenas] which are [below the visibility threshold] for some months, but that some time in late Summer 2010, the [visibility] sum jumps suddenly as a [group (of) manifesting circumstances] will bring the [battles (between) sorcerers and magi (magicians/gnosines)] into [sharp focus], at least for those who have the base level of knowledge that allows the perception. Note that these [battles for control] will be manifesting against a larger background of various and diverse [battles] within the [control structures] themselves in the forms of [wars (planned by TPTB)] and [vaccine contention], among dozens of other [areas/arenas (of) contention].

The [areas of contention] that will be forming the background of the [chaos] in all parts of the [anglosphere] from late Winter 2009/2010 (perhaps mid February?) will stem first from the [dollar death (markets and currencies collapse pretty much globally)], followed by the [military (and militarized law enforcement)] response to the [global financial panic riots]. These are a larger sub set which includes the sets of the [shortages] and [starvation] [riots].

Part of the [riots/contention/social disruption] sub set seems to forecast a [shift] of [power levels] within the various [governmental officialdom] and their sub contractors, including [private corporate 'security' firms] that will [bring forward] a [cadre] of [petty officials (of all kinds)] who will be [nominally] placed [in charge] of what used to be known as the [criminal justice system]. This [shift in minor fascist power personnel] is indicated to bring about a slew of [unintended consequences] that will include [direct attacks] against the [power structure] by what will be called [foreign gangs]. These [foreign gangs] will be the [rough edge] of the [revolution/rebellion] sub set, and may indeed include [gang members (even gang structures)] in the [attacks], but the data also indicates that the largest [violent attacks] come from [military personnel].

However nasty the [agents (of the elites)] will be in their [provocation (of the riots)], the [real resistance] will be coming from a [non-violent revolutionary SOC (self organizing collective)] that will be emerging over early 2010. Some of the strategies and tactics forecast to be employed by these R-SOC's are quite brilliant, and well worth discussing, however no need to bring up details at this point, merely suffice it to say, that the R-

SOC's will [cripple] the [control systems] using the [control systems] against themselves. As noted, abso-fucking-lutely brilliant. Not either/or, but both/and shall suffice.

The [thuggies] {ed note: see GlobalPop for further discussion} will be joined by [American Cloggers]....think the derivation of the word [sabotage] and bobs-your-uncle, and there we go. The [American Cloggers] are indicated to self-form over Winter, and to start to [manifest] in late Spring and across Summer through the more tense times of Fall of 2010 when it will **seem** as though [everything is held in the balance awaiting the landing of Mot's feather]. The [American Cloggers] SOC's will bring a [disruption] to the [control system] and [political power system] as it exists today. This [disruption] will progress along from about mid June through 2011. The [response] from the TPTB and their [stooges/minions] will be [predictable], and will be [used] in a further [stage] of [resistance] to the [behavior pattern changes] that TPTB are trying to promulgate.

## GlobalPop: Singing Dogs, Working Thugs, Holes UnDug, Priests Plot, Knitting SOC's

The [european zone] (in its broadest sense) has a rising data set for [disparate] or [separation] of the [local currencies] and the [USofA dollar]. These [currency changes] are part of accretion patterns for early 2010 through the vernal equinox. The data seems to be pointing toward a [forced] or [propelled] separation of [currencies] over only a very [few months] {ed note: perhaps only 3/three months}. The [separation] data sets are supported by [piggy back] or [inter linked (sitting upon another's shoulders)] that itself is supported by [risk]. The [risk] sub set is **seemingly** pointing toward the [inability to move], or as is also described in the set, [restrictions on movement]. These sets are in support of [separation], which itself is supporting [dangerous (conditions/time)] at the next level up. The idea from the chain of support is a description where the [sinking] of the [USofA dollar] and by extension, the [economy] of the USofA, poses a [risk] of [being trapped] in the [quicksand vortex] that will be [created] as the [dollar sinks]. The [quicksand vortex] is also described as [sucking forces], or alternatively [rip tide currents]. The data sets at the detail level are describing a [risk period] in which [local currencies (including euro)] will be

[in danger (of trading) paralysis] as the [dollar death] proceeds across the Winter of 2009/2010.

Part of the [paralysis] potential for the [euzone and currencies] comes from linguistic sets around [india and china]. The idea coming across is that the [euzone] will face [social pressures] due to an [inability (to face/cope)] with the [power shift] that will occur as the [wealth center] shifts from the [western world] over to a nexus of [china] and [india]. The data sets are pointing toward a period of very rapid [power shifts] due to [currency fluctuations], and the [failure] of several [international trading systems]. This last is supported by yet more references to [scandal(s)] that will involve [central practices].

Areas within the [euzone currency risk of paralysis] sub set are cross linked over to the Populace/USofA entity where they are terminating in sets that include descriptors for [melting down] and [assay/audit]. In both of these sets the internal cross links are over to the [federal reserve cabal] sub set. There are further cross links back from the [federal reserve cabal] back over to the [europe] sub set of GlobalPop that indicate that [scandals] of [crimes] including [treason] will be [spreading] into the [minion classes] within [europe] as direct result of the [active phase] of the [american popular revolution] of 2010. The spread of the [scandals] of [greed] and [crime] are indicated to [bring pressures] on at least [3/three] very [prominent] countries governments such that [imminent failure] is seen as the [likely outcome] as the [scandals] break. {ed note: look to which countries get the most international press within Europe over late February through March}.

The data sets are accruing in patterns that suggest the [unemployment crisis] that is indicated to precipitate [active revolution] in the [populace of the USofA] will spread to Europe as Spring unfolds. The [dollar crisis] of Winter 2009/2010 seems to blossom into a [social welfare crisis] in Europe with the Spring flowers. Much of the data at the detail level points to a flowering of [conspiracy facts] as well as [social discontent]. The data points suggest that a wave of [conspiracy books] about the [federal reserve cabal] both globally and within the USofA will hit the European book market in Spring, curiously coincident with problems rocking all the [central banks] of the planet. These [books] are indicated to play a large part in 2/two separate social movements during a period of unrest stretching across 2010 and into 2011. These 2/two social movements will include the ['awakening movement'] and the [survivalist (2012)] movement. In both cases, the data is

pointing to something of a very significant social change that we can relate to these books, though only as temporal markers, rather than actual causal agents. Nonetheless, the coming social change wave we are labeling the [chapati challenge (to TPTB)], seems to spring forward simultaneous to the spread of the [conspiracy facts] books appearances within modelspace.

Suffice it to say that various forms of [challenge] to the [central bank and warfare] model for planetary governance will appear globally in 2010 with the [visibility] of these [challenges] to the [central authorities] rising post vernal equinox in March 2010.

Aspect/attribute sets in support of the [challenge] to the [central bank model (of world governance)] are indicated to produce a [number (many)] instances of highly [visible] (within the mainstream media) [attacks] on the [central bank system] via [murders/assassinations] over 2010. Some of these will seem to be **not** related to the [central bank system], that is to say that the [deaths/assassinations] of [doctors], and [archeologists] {ed note: look for some very elevated profile archeology ‘council’ controllers (humans) to be killed/eliminated} and [scientists], and [military officers (very high ranking)] and [religious (radical clerics) organization controllers] will ramp up in a way that will be both [notable] and [discussed], but not, in the main, [understood] as to the connection to the [central bank system]. In spite of the public [disconnect] between the series of [bombings], and [other assassinations], there will nonetheless be enough of the [global populace] who will [understand the connections] to [cause] a [response] that is [specifically focused] to [discredit] the [statements/rumors/stories] that will be widely [circulated]. The data set accretion patterns are suggesting that the [propaganda campaign] will create its own [backlash/ridicule response]. Note that the data suggests a ‘side effect’ of the [assassinations], especially of the [controllers (of) archeology treasures] will cause a [very rapid] (for this area of endeavor) [change] in the [workings] of [planetary archeology explorations]. The data seems to be suggesting that [“discoveries”] will be rolling out so rapidly later in 2010 as to cause a [daily reassessment] of [‘known’ human (and other) history] here on [earth] and [elsewhere]. This last via very extensive cross links to the [humans ex terra] sub set within the SpaceGoatFarts entity.

The GlobalPop entity, when moved along with modelspace through early 2010, has [war] as a major, growing, and rising descriptor set. The [war] sub

set is supported at the primary level by [planetary/global]. This [war] is indicated to not only be [planetary \*(global, or world war)], but is also acting as a primary supporting layer (in toto) for the descriptor set headed by [thugs]. Deriving from the hindu descriptor of [thuggie (those who resist oppression)], and altered through cultural linguistic substitution by the monarchists ruling the British people to symbolize ‘all who oppose (wrongly) the social order (to be imposed) by the monarchists/illuminatists, the [thugs] sub set within the GlobalPop entity is indicated to become a very significant factor for [life (within the) crumbling civilization] over these next few years.

In the developing [thugs] set, the primary (or creation support in this instance) set, is, as noted, [planetary war]. The secondary supporting set is being defined by its primary support level of [rise of] or [emergence into creation/manifestation]. The idea deriving from the secondary set is that [acts of compassion] will be [criminalized] by TPTB during the [riots] and [protests] phase of the [reaction (to forced global war)]. As these [riots] sweep across the social human body of the planet (all countries), TPTB will [activate laws] and [plans/plots] that will [militarize law enforcement] and [make compassion/helping a crime]. While the [war] and its [immediate impact (on the social order)] will be the [act] that actually [propels (the manifestation of a planetary) thuggie SOC (self organizing collective)]. The data sets indicate that the [thugs] will be [identified] with those aspects of universe [most hated/most despised/most feared] by TPTB, which is to say, [emotion], [water], and the [universal feminine archetype].

As modelspace is progressed past July of 2010, the [planetary thuggie SOC creation occurrence] begins to gain support from the [shift in fortunes] within the Populace/USofA entity as the [revolution] meta data layer takes over that entity. Prior to July, the [thugs] sub set derives support from the [chaos] sub set that will be dominating global ‘politics’, especially within the [propagandist main stream media].

Over the course of the first half of 2010, as TPTB prepare to implement [planetary war], the data is pointing to the [emergence] or [manifestation (into) reality], of a [conjunction (of) forces] that will [seem to be unconnected events]. The data sets are describing a broad social theme of the [planetary populace being goaded/manipulated into global war] while at the same time, [under (the main) current] there will be [emergence instances] of a larger social pattern that seems to be [resistance (to TPTB)] driven. A sub

set of that set cross links back internally to terminate in [compassion (acts of)]. These data sets are then filled with detail sets indicating an [active], although [not-as-might-be-expected], form of [global resistance] to the TPTB and their [planetary war] will manifest in such ways that the aware observer will be able to 'track the progress' of this forecast. Further discussion of this manifestation does not aid. Needless to say the TPTB will **not** be pleased when it finally does occur to them (at the time of manifestation) that the [thugs] are [plants grown from their (TPTB) seeds].

It needs to be remembered that 2010 will bring [crushing poverty] to most of the [populace] of the planet as the [usofa dollar] and the [economic structure] of the [usofa] goes into [failure]. The combination of the [propaganda], and the [false flag attacks (likely in Israel?)], and the [shocking crushing poverty] will be used as [manipulative tools] by TPTB to [incite global war].

It needs also to be noted that TPTB entity is forecasting that TPTB will make a large [propaganda push] to [convert or subvert] the [revolution emotional wave] in both the [global populace], and the [populace usofa] over early 2010, and to [coerce or force] it into their [war] movement.

The [war] descriptor set is a rising aspect/attribute set that rises from the detail supporting layers of the [ill winds] sub set, and is also extensively cross linked to the [israeli mistake] sub set. That the [war] descriptor set rises through the supporting layers of the [ill winds] sub set is not only disturbing, but is also bringing along many of the other supporting sets of the [ill winds] which are forecast to [travel around the planet 9/nine times]. The growth continues for the [ill winds] as well as for the [9/nine times] supporting sub set. These growing sets are graining most of their new supporting aspect/attributes from the immediacy and shorter term value sets. This tendency of the data accretion patterns to these data types seems to infer that the 'time to action' is short, and there are some extrapolations of these patterns that would seem to indicate the [israeli attacks] are within mere months. Timing clues taken from modelspace are frequently off. In many cases, by only a few days. However, it would seem that the larger the emotional potentials involved, the larger are the range of error possibility within the timing as the data accrues within modelspace. Stated another way, the larger the emotional wave through society, the greater the potential that we will be off on the timing. That is to say, it takes a while for the emotional wave to actually manifest as it makes its way through the social body.

Without regard to timing, the data sets for the [israeli mistake] are still gaining new supporting sets within the secondary and tertiary, and detail layers, with many of these new sets being from the longer term data sets. Of these new supporting sets, a disproportionately large amount ( $> 56\%$ ) are within a cohort of long term duration sums. These data types are of duration sums that imply a [region changing war] will result from the [israeli mistake]. This [region changing war] is a direct supporting sub set of the [war] sub set within the GlobalPop entity, as well as being extensively cross linked over to the [war] sub set in the TPTB entity. There are also extensive internally cross links to several of the supporting sets for the [planetary war] sub set. The sophistication of the cross links reminds the view of complex weaving. The implication of the data patterns is that 'forces' or techniques being employed by more than a single group. The [israeli mistake] sub set gains considerable linguistic 'mass' over the last month of 2009, and the first 2/two months of 2010. After that, the [israeli mistake] sub set seems to fade into the direct supporting set within the much larger [planetary war] sub set. This is not to say that the [war] will 'start' in early 2010. Indeed, there is much to suggest that the [planetary war] actually began several years ago, and is merely about to move [rapidly] through the [propaganda build-up], and then into the [active] phase. The cross links from the GlobalPop entity over to the TPTB entity suggest that the [planetary war plot] will be [accelerated] due to the [perceived (by TPTB) onrush] of the [revolution] meta emotional wave becoming [active].

If modelspace is viewed as it moves through 2010 in a rapid fashion, where all the detail layers are lost in the blur of events, the impression is that 2010 will bring a period of contention to the planet as a whole. This contention is to be expressed at many different levels. The TPTB entity shows that the 'evil they' of the TPTB will attempt to push the 'contention' into their previously created 'path of least resistance' which will be [global war]. A good analogy is that TPTB are training the populace to favor warfare. They put vast amounts of their energy, time and money into creating images in the collective mass brain such that when the time comes, they think that they will be able to provide just a little nudge and the populace will 'fall' into the previously ingrained neural pathways, and 'naturally' respond to their commands to 'go kill or die'. The TPTB entity shows that the 'evil **they**' are clearly aware of the coming period of chaos from which they hope to extract [contention] to dominate the next few years.

Modelspace also makes it clear that TPTB are aware of the rising [resistance] to their plans, and even their mere [presence (existence)]. Unlike previous periods of conflict in previous centuries, there is now a spreading ['awareness'] wave through the [populace globally] that they perceive as actually [threatening] their [hegemony] over the planet, as well as any future plans. Thus the seeming [haste] and [carelessness] being exhibited in the [imposition (of plots of TPTB)] on the [global populace].

The GlobalPop entity, when viewed from the largest perspective against the rapid movement of modelspace through 2010, is also clearly indicating that the [actual war] will be expressed not as TPTB would have it, but rather as a [contention] between the [planetary populace] and TPTB. The movement of the entity within modelspace shows a rising [contention/collision] with TPTB entity from late January onward that rises to the level of near sublimation of TPTB entity by late in November 2010. This is not to say that the TPTB entity (nor the groups for which it is standing proxy) will be gone after 2010, but rather that a fundamental change occurs over 2010 to the [populace] of the planet to create conditions that have never before existed here on earth. These conditions will include a [knock down] to [TPTB (and their political/financial systems and political minions/stooges)] of such a [force] that TPTB entity and the GlobalPop entity are forecasting a [never to return to previous levels of influence] for TPTB **just** from the events that will take place under the [revolution] and [transformation] meta data layers influence from July 2010 through to the end of that year.

This is not to say that the [war] that TPTB wish to impose on the GlobalPop will not occur. Rather the data suggests that the [war] is brought forward by the [israeli mistake/attack], and the resulting [planetary protests] get [totally out of (the) control (of the) political minions and their law enforcement tools]. The escape of the [protest movement] into the 'wild' so to speak, that is to say, its 'leaving the control systems' of the TPTB is indicated within the GlobalPop entity as the [spark] that will begin the [ignition chaos] for which TPTB is [not prepared]. The extensive cross links from the TPTB entity over to the GlobalPop entity are indicating that TPTB are [not prepared] for the [spiraling of events] as they [will (are?)] to be [caught off guard] since they, apparently, are having to [rush] their [plot] into [action]. The idea is that somehow [events], and even worse, [feared coming circumstances] are [pressuring the TPTB] in ways that cannot be understood from the outside of that group. These [pressures (from manifesting fears)]

are such that the data is indicating that TPTB are having to [rush forward] by [many years] their [plans/plot] for humanity.

The data sets are still building in support of [riots] from [starvation] later in 2010 or early 2011 will bring down the [vatican], and most of its [spies] and [political infrastructure]. The GlobalPop entity now has supporting layers for the [vatican riots (and) looting] being supported by precursor events that are forming in support of both [revolution] and [transformation] within the GlobalPop entity. The data suggests that in early 2010 a series of [leaks] or [revealed secrets] will come out that will bring the [focus] of the [waking populace] onto the [evils of operatives] who will be [identified zionists (within the) papacy]. Further, the data sets are also pointing to [more than rumors, less than official admission] to occur in which [new information] about the ['devil worshipers' coup de'tat] of the [sorcerers palace] in the last century will [surface]. Not that the [information] per se will be a particularly large [visible] impact on the social order, but rather that a small group of persons will become [acquainted] with this [proof of corruption (of the 'faith')] and that nearly 7/seven months later, the [group of those who know (the information)] will provide [exposure] that will [strip (the priests/pope) naked in public]. This [naked in public] is a powerful archetype involving both [shame] and [body image]. Further, this linguistic structure has very high values for duration, impact, and visibility. It also has an alternative descriptor set from the primary level of support that can be interpreted as [laying bare (exposing) hidden sins (against humanity)]. A really curious part of large amounts of these new supporting sets for the [riotous looting (of the) vatican (place of sorcerers)], is that many of these sub sets are heavily cross linked over to the SpaceGoatFarts entity where the termination points **could** be interpreted as modifiers for [exposing the hidden sins (of the popes/priests) against humanity **in servitude to alien masters**]. Yet other interpretations could even go toward [exposing the sins (of selling humanity into slavery to alien masters) by the popes].

As modelspace is moved through the first half of 2010, a group of [events of exposure] or [revealing of secrets (long held)] is forecast by the [transformation] meta data layer. These [exposure incidents] will occur without any obvious link within their manifesting, yet within the data accretion patterns these [individual exposures] and [leaks of long held secrets] will all [aggregate] into a [significant mass] by late July. Over the course of these first 7/seven months of 2010, the [exposures] will be in conjunction with the [erosion of effectiveness] of [TPTB and their minions].

The combination of these 2/two large trends is showing as creating a virtuous feedback loop in which the [power (of the minions/TPTB)] drops which allows for more [exposure of crimes/plots] that in turn will further [erode confidence (in reality and control systems)] that will further [reduce power (of the minions/TPTB)]. In many of the details for these linguistic structures, the [TPTB] and their [political minions] and [press propagandists], are indicated to be [sent fleeing] the [public anger]. Further problems will be caused by [deliberate acts of ridicule (public exposure of crimes)]. This last is showing as such a problem (via cross links to the Populace/USofA entity) within the United States as to cause [laws] to be proposed making it a [crime] to [ridicule politicians (disrespect agents/slaves of TPTB)]. This will be an excellent temporal marker for the subsequent escalation of the [revolution] and [transformation] meta data layers within the GlobalPop, as well as the [outbreak (of active revolution)] within the USofA.

A curiosity of modelspace is that both the GlobalPop entity, as well as the Populace/USofA entity, while in the very midst of the heaviest accretion of negative language centered on [social infrastructure collapse], also have the heaviest level of accretion of positive supporting values for the [SOC's (self organizing collectives)], and their [impact] on the [re-formation] of the [social order]. These sets in both the GlobalPop entity and the Populace/USofA entity also go to direct support for [transformation] meta data layer, and both contain primary support of [social re-creation/re-formation]. The [SOC's] data, as modelspace is progressed through all of 2010 and the first half of 2011, actually propels the larger entity in new directions toward a bespoke [host/plethora] of [alternatives (for reaching) success]. These [alternative paths/approaches] to the [functioning (of the) greater society] are indicated to [build from below] all the while the [power structures] are [crumbling (from the) top down]. While there are indications for [many hundreds of thousands] of [killings (of bankers/politico's/propagandists)] in the active phase of the [revolution] meta data layer over 2010 and into 2011, there are also descriptors going to the [reformation (of the social order)] as [saving] many [millions] of humans from [deaths (imposed by the) bankers/politico's/propagandists]. Hmmm...ok, so banksters (et al) hang/burn and are garroted in a big messy [expression (of revenge) orgy], but millions thereafter are relieved of the [suffering] and [deaths] that had been (are) [planned for them] by the [self-proclaimed 'masters' of the world]. Ok, so far so good....

An interesting part of the [SOC's] sub set is going to the idea that a [central european SOC], in conjunction with a [SOC] from Africa {ed note: southern africa}, will provide for the [video capture] of the [executions (of the bankers/politico's/propagandists) across the planet] as a [proof of reality] and [support (for the) truth movement]. The data suggests that [satellite uplink stations] that will be [liberated (by the populace)] during this active phase of the [planet wide revolution] will [transmit] these [truth video's] to the [planet]. The [daily exposure] of the [executions] and [show trials] of the [bankers/politico's/propagandists stooges (of the illuminati/self-proclaimed masters of the world)] is indicated to have huge [impacts] on the whole [process] and [direction] of the [planetary revolution]. It is now safe to say that the [canine lyricist/dog poet] will be very intimately involved in the [amnesty movement (for the bankers/politico's/propagandists pending execution globally)]. This individual will be among the very first of the [new personalities] at the [planetary stage] level as a result of the [revolution] meta data layer going into the active phase. The data sets indicate that it will be the [refreshing (of the collective human soul)] by the [dog poet's Sirius Song] and an [offer to be made (to the peoples of the planet)] that will actually propel the change in the [revenge plans] against the [captured (and condemned) bankers/politico's/propagandists] such that [millions (of these bankers/politico's/propagandists minions)] will **not** be [killed]. The accretion patterns of these various aspect/attribute sets bring in the [re-education camps] that have been forecast within these reports for the last 4/four years.

There are indications that [re-education camps] are to be created across the planet in many places, but a curious conjunction brings the 'heart' of the [re-education 'industry'] to the American Southwest. Though [international] in scope, the [best (in self-re-education)] will clearly be the more [bewitched/befuddled/confused American populace]. The geographic references suggest that the [surviving facilities] from the by-then [defunct gambling 'industry'] in Las Vegas, and other cities of the American Southwest, will be [re-purposed] into [re-education facilities]. This new [endeavor] is indicated to bring a certain [measure (of) prosperity] after the [collapse] of the [gambling 'industry'] along with the [death of currencies \*(triggered by the repudiation/collapse/death of the USofA dollar)]. Again noting that there are distinct [woo-woo world] supporting sub sets within these linguistic structures, the [re-education efforts] are also indicated to be something of a [boom time] for the [woo-woo personalities] that will be emerging as [global leaders] across 2010 and into 2011.

Ed note: words such as [international] will rapidly lose their current context as we move forward into the [planetary revolution]. The dissolution of the idea of the [nation state] has already begun and it will be hastened by the upcoming [planetary revolutionary social movement]. It will not be as planned by TPTB however, where a pan-planetary control system, or [one world government] will take over. Rather a fracturing of the [identification] of [individuals] with the [nation state] will [fade] as the newly [forming collective consensus] replaces the constructs of the current paradigm.

Within both the Terra entity and both the GlobalPop and Populace/USofA entities, the [ill winds] sets continue to build support. The data sets have shifted into dominance of shorter term data types, likely indicating that the events involved in this forecast are emerging over these next 3/three months. This would fit with the previous forecast of the [winter olympics] as being a [special focus] for the [dissemination of disease(s)]. Further the data sets are indicating that the [ill winds] set will gain significant [visibility] after the vernal equinox on March 21, 2010. The [visibility] is associated with [deaths] and [disease] as well as [attacks], and [toxic (to breathe) winds]. There are some small amounts of new supporting sets that have shown up under the [war] sub set linked over to TPTB and the [israeli mistake], but the largest amount of growth is now under the [disease] archetype. This archetype has several key areas of its structure that accrue over January through late March of 2010 with a peak of growth in mid to late February.

### [SpaceGoatFarts: MIB at Dread U, Woo-Woo Floats, Shadows Play, Moving Day](#)

The SpaceGoatFarts entity has 2/two large data sets that are interconnected, and are pointing toward [flooding] as being a key annoyance for humans in 2010. The accretion of the [flood] language is across all of 2010 with 2/two specific peaks, one in late Winter into early Spring, and the other later in the year later in Summer. Some of the Summer [flooding] is indicated to persist through early Fall (across the autumnal equinox boundary). There are also several specific points for [flooding] and [trouble] that are within the early part of December, 2010 that will persist through Winter into 2011. The [flooding] referenced is directly held as a supporting set for [energies (known) from space]. These [flooding] sets are shown as being 'end states'

of the [energies from space] that will [cause] or [induce] several levels of [flooding].

There are several aspect/attributes in support of the [flooding] aspect/attribute set that are referring to [wind driven] and [meetings (of the) winds] in [unusual places] that will [induce/precipitate] the [flood conditions]. Many of the supporting sets under the [flooding] set within the SpaceGoatFarts entity are cross linked over to the Terra entity where they are also terminating in support of [flooding] as a [dangerous (set of) conditions]. The various sets in support of the [flooding] sets in both entities include [loss], and [damage], and [dislocation], and various other descriptors under the set of [destruction].

The sets in support of the [flooding] within the SpaceGoatFarts entity include sets that are headed by [fish] and show that the whole of the [planetary fishing activity], in both [commercial] and [personal] will be impacted. The details describe [fish (in buildings) under flood], and also [fishing (beds)] and [spawning habitat] that will be [destroyed] by the [side effects (of) flooding].

Other supporting sets for [flooding] also include [solar radiation], as well as curious sets that are seemingly contradictory such as [exposure (of) lost cities]. The idea being that somehow the [flood conditions] will produce instances where [lost cities] will be [exposed] (somehow?). There are cross links over to the GlobalPop entity where some terminations include sets for [hiding (from) radiation] (likely in caves?) will produce a [startling discovery] that in its turn will induce something of a [stream] or [river] of [artifacts] being [smuggled out] from the site of the [discovery]. This will apparently be gaining [visibility] over mid to late 2010, though the [discovery] is associated with the [spring flooding] in the accretion process.

A large set of the SpaceGoatFarts entity has shifted to align in support of the [alien wars] descriptor set. As much as it sounds as science fiction, it appears as though the [transformation], and [transition] aspects/attributes and **all** their supporting sets are shifting over to support the idea that the [alien wars] will be [emerging/manifesting] over 2010 and into 2011.

The [alien wars] sub set itself is growing. The growth is at various levels. Some of the more interesting areas of growth include sets going to the idea of the [intelligence 'community' or 'industry'] becoming, or being [coerced]

into a [visible] new [role] that will bring out the [alien wars] a **bit** more into the open within the main stream media.

As modelspace is progressed forward from late December of 2009 through the vernal equinox, March 21, 2010, the [alien wars] sub set gains nearly 20 percent in total size while also gaining over 30 percent in the emotional sums for impact and duration. As modelspace nears the end of the year, the growth in [alien wars] has escalated to over 80 percent larger size than exists in that same sub set with the modelspace in late December 2009. By the end of 2010, the emotional value sums for duration and impact have scaled over 140 percent over the values held in December of 2009. During the progression over 2010, modelspace gains [visibility] sums in this sub set that indicate a level of consciousness penetration that is indicated to [alter] the [world view] of a significant portion of the [mass (unaware)] of the [planetary populace (of humans)].

The longer term data sets within the SpaceGoatFarts entity are gaining considerable support, in the **very long term** (> 2+ years), for a [solar discharge event (perhaps 2/two)] that will be in the CME (coronal mass ejection) category. This is the data set that may be an early indicator of 2012 magnetic pole reversal and then crust shift. As the growth of this set continues apace with the [pole shift/crust shift] sub set, it is worth noting that the growth rates of the linguistic sets in the forecasts are being **matched** by the appearance in reality of the actual language within the main stream press. Stated another way, the language around the [pole shift] that was forecast in the past by the data sets is now showing up within the main stream media, thus providing objective support for the accuracy of past forecasts going back over 10/ten years. This then provides continuing confidence in proportion to the growth of these same sets in current processing. The confidence level for the manifestation of the language is very high as the [visibility] of the subject of [cataclysm in 2012] continues to manifest within the social discourse of the planet. So while it would seem to be obvious to forecast yet more language to appear around the idea of cataclysm in 2012, the actual forecast is much more specifically focusing on the [sun as causal agent] for a [cataclysm in 2012]. The data sets within the SpaceGoatFarts entity, sub set [the sun/our sun], are pointing to both [an event (of a solar nature/affecting the sun)] in the first half of 2010, as well as [secrets revealed (about solar cycles)] to shift the [direction of public discussion (about 2012)] into [science of sun] by late Spring of 2010. These

sets bring in some of the language that may be in the 2012, The Movie, but in the main are forecasting that actual academic scientists will be at the center of the [new information] or [secrets revealed] about the [sun] that will be entering the planetary mindset next year. It will be this [coalescence of ancient secrets and modern science] that is indicated to [ignite] {ed note: pun intended} a whole new level of energy into the [let's survive 2012 movement]. It needs to be remembered that the [sun (undergoing) disease process] is the longest existing data set and predates all of the entities and further refinements of modelspace.

Related to the [sun disease/CME expulsions], it will be the [energized] and [energetic growth] of the [2012 survivalist movement] that will bring about the conditions in which the [black ops world (of the planetary military)] will be [feeling] as though they are [under attack] by the [dread world (woo-woo side of reality)]. The data sets indicate that actual [assaults on Black Ops world facilities and persons] albeit at a real [woo-woo level] will be occurring. These are indicated to [manifest] as [strange reports] with language from/about [secret societies] to be [located within the ranks of the military] being [afflicted with mental aberrations]. These [mental states of lack of psychic equilibrium] are forecast to display themselves in a number of ways, including [revelation riots (on military bases)] as well as [constant claims (of contact with space aliens/higher dimensional lifeforms)].

The data within the [space] sub set gains considerable data across the whole of 2010 that is in direct support of the [secrets revealed] and the [contact] meta data layers. Much of the new data comes in with very high levels of [visibility]. These sets are within the supporting chain for the [new electrics] and include very high levels of [visibility (within the press —either alternative or main stream/propaganda)] for such new data sets. These sets are pointing to a [propellant] that will be [visible] within the [new electrics] that appear within the social order, albeit at a very [low (non sanctioned) level] within the [global populace] in 2010. Our timing clues are pointing toward the [visibility] to rise on this subject just after the March equinox, at least within the [sheeple (controlled populace)].

The [new electrics] sub set is also cross linked internally within the SpaceGoatFarts entity to the [unknown] and [officially denied] sub sets, where there are termination points within [officially denied (space) bases (for the) terran military]. IF the detail layers are viewed in a particular manner, it would be possible to infer that the [visibility] about [extra-

terrestrial bases] would rise due to [photographs] which will be [produced] by a [“drive by shooting”] from some [traveling humans]. This last must be discussed in some further details as this is the MOST unlikely way in which the [visibility] about the [off planet military bases] would emerge. It would be much more likely that the [Gary McKinnon trial] could be the ‘trigger’ that would produce the [visibility] within the internet language. However there are several supporting sets for [pictures] that will be [produced] by [going by] the [bases]. This is within the data. That is to say that within the lower level of the detail sets include [passing by] in direct support of the [pictures of off world bases]. Other supporting sets include [shooting (pictures) while traveling (by/passing by)] the [target bases].

As modelspace is progressed from the late December 2009 context change through all of 2010, and 2011 up to the tipping point late in that year, the SpaceGoatFarts entity shows a shift of many of its supporting sets over into the more ‘main stream’ populace entities. It is clearly a case of the [woo-woo world] that has existed ‘out in the wild’ of the internet since before its release to the public by DARPA/ARPA being brought along into the ‘main stream’ as a result of significant growth in the level of ‘awake’ individuals within the larger, general populace.

{ed note: prior to the 1983 commercialization move by gov’t to ‘allow’ the internet to be used by regular humans, a very sophisticated grass roots movement of electronic ‘bulletin boards’ had existed. Unable to either control or effectively monitor the BBS movement among the populace, the CIA ordered the ‘opening of the internet’ to the populace as a response and in an attempt to ‘tie down the loose cannons’. Hmmmm. Now how’s that working out for them?}

The many, and diverse (understatement if ever there was one) forms of [woo-woo] supporting sets within the SpaceGoatFarts begin to decrease from February 2010 onward as the sub sets migrate over to the GlobalPop entity. This migration effect is also accompanied by sets indicating that many of the [woo-woo personalities] will also be more ‘main stream’ over this upcoming year. The [success] in this transition by the [woo-woo personalities] is part of a [virtuous feed back cycle] within the nature of this progression. As these [personalities] gain more attention, their [messages] will also gain more attention and the number of ancillary propagation opportunities will increase, and this in turn increases the ‘popular demand’ part of the feed back loop. This feedback loop is anticipated by TPTB and

their minions, and the [personalities] need to be prepared for [officialdom response] or [pressures (to keep the lid on)] the [public perception] of the [universe] and the [hidden science/information streams]. Not that the [pressures on the lid] will work, but TPTB and their [stooges] will try nonetheless.

As indicated, there **appears to be** a shift in acceptance of many of the core [ufo/space alien] sub sets of knowledge by a larger percentage of the general planetary populace such that some of the areas currently under the SpaceGoatFarts entity in the categories of the [officially denied] archetype will be transiting over to a more mainstream exposure. This transition is indicated to begin in February and to continue all through 2010 and well into 2011 as a continuing meme as more and more [officially denied] is [let loose into the wild].

It is during this period that the [video's of cousin Alexi] are forecast to surface on the independent media. Cousin Alexi is our label for a 'relative' of Terrestrial humans who has been [incarcerated] for a number of years according to the descriptors. During a [chaotic] period in a former Soviet Bloc country, the jail in which Cousin Alexi resides will be [emptied]. From the data sets, it appears that a [bomb] or other form of [explosion] will [damage] the [facility] such that the population of the [prison] will simply [walk away]. During the subsequent days or weeks, a video will be made that is forecast to include [cousin alexi] within the background, or as a minor point of momentary focus. Unbeknownst to the videographer, the images will contain some form of [proof (of off world origin)] of this [momentary picture (of) cousin alexi)]. There are some indications that the [video] will be surfacing before Fall, 2010, with the events occurring over late Spring and/or in Summer. The data sets continue to build for a [general freak out] on the part of many persons as a result of the [cousin alexi video] being uploaded into the alternative mediastream. The [freak out] is supported by very extensive sets for the [black ops military] and [intelligence agencies]. The data suggests that [reports] of the [freak out] and the [frantic actions] of the [black ops (MIB) types] **will** be surfacing nearly [daily] for a few weeks as the events run their course. There are cross links back over to the [woo-woo world personalities] that suggest a [tie-in (association)] to the [cousin alexi] story late in 2010.

There are other sets within the [officially denied] sub set that are also associated with [ufo's] and/or [space aliens] that are also within the sets that

will be transitioning into the (slightly more) mainstream in 2010. These include many instances of [video captures] to be [viewed] over all of the next 2/two years, though there apparently will be something of flurry of [reports (and video images)] of [ufo's] over late Spring and all of Summer of 2010. This is co-incident with a period of [social (and political) chaos globally]. A part of this forecast [chaos] includes at least 3/three separate incidents of [rioting (or other form of social disruption)] which will impact [secret bases (hidden black ops facilities)]. It may be from these incidents of the [liberation] of [officially denied material] that the clump of [video of extra-terrestrial space devices] will emerge. So these may be from an [old(er) cache of images]. However, at least 1/one of the instances of [liberation] is linked to the forecast [wave] of [ufo sightings] for Summer of 2010.

The Summer [sightings] data sets include supporting aspect/attributes which may be suggesting that a [sophisticated (form of) contact] will [manifest]. This area is filled with supporting layers down to the detail sets that point toward something [beyond] mere [sighting] of a [vessel], or even the [observation (of the creation of) multiple crop circles] {ed note: again, associations here are dominated by south America references}, rather the [sophisticated] sub set seems to be indicating some form of [conversation] that will be [recorded] such that [broadcast (later)] would be possible. This does not have any associations with either channeling, or abductions. This data set has supporting layers that suggest both [audio] and [video] would be [recorded], though there are other sets supporting the idea of [surprising (how it is done)] and [path-way]. This last is heavily emphasized in the data sets by its impact sums, so likely this is a data set that nearly captures a key word component of the experience. Instances of the diversity of the phrase would include [freeways/highways] within the [path-way] descriptor set, but also [jujitsu dojo] (a place where the path is practiced as a 'way'). Thus the phrase is not (yet) particularly meaningful.

Other supporting sets for the [sophisticated contact] include [discourse] which is supported by aspect/attribute sets that could be interpreted as [quite the conversation]. The idea is of a [multiple party conversation] in which [many humans] participate. Further support comes from branching sets within the sub sets for the [many humans] which go to the idea that (what is left/effective of) [officialdom] creates some [problems (for some)] of the [humans involved]. However, the detail sets also include descriptors of several of [the individual humans] involved, who [respond negatively] to the

[minions of officialdom] discovering, to their delight, that the [threats] are [empty] and the [cause (of officialdom)] is too weak to 'hold'].

As a point of interest, there are indications that a [teevee (propaganda) personality] will get a [major dumping (into shit)] as a result of her/his [interaction] with the [conversationalists]. This [incident] will [seal the career] of the [propagandist personality] involved, and **not** in a nice way. This incident is also indicated to have a [chilling effect] on both the TPTB as well as the [propagandist minions] from that point forward. There are cross links back from TPTB to the SpaceGoatFarts entity that also tie over to the GlobalPop entity where they provide support for an [emboldening/quickenning] sub set under the larger [woo-woo world] descriptor set. This discussion is **necessarily** limited so as to reduce the potential to induce self-fulfilling forecast. The details of this incident will remain hidden until after its [visibility].

There are some indicators within the wide range of geographic sets within the SpaceGoatFarts entity that [Greece and Turkey] will be something of a [center] for another form of [contact (with non human intelligence)] scenario. This instance has some interesting sub sets that indicate that the [form(s)] involved, which is to say, the non-human [forms], will be [interacting] with a [smart human] {ed note: lots of associations with grape growing, and trellises (near the house, to be prominently featured in photo's)} who is **also** to become a [pain-in-the-ass (of the TPTB)], though in this instance the [duration] and [impact] sums go to a very large [global] reach of this particular [contact story]. In many ways the language bears some coherence to the sets that line up under the personality of Billy Meir. In this incident however, the language is supporting a [new personality] that will [bedevil (the propagandist press)] following a [contact] episode that is, again, not involving either channeling or abduction, but that also has some form of [memory/recording] that can be [broadcast] later. This episode will present some serious issues for the TPTB and their [minions] that will arise from the [first] of several [assassination attempts (which fail in spectacular ways)]. Some of the detail layers here read as though an "Inspector Clouseau" script. The levels of [incompetence] described are so completely outrageous as to beg the issue of [incompetence] and perhaps suggest [interference].

It needs to be noted that the [contact] sub sets within the SpaceGoatFarts entity are extensively cross linked over to the Populace/USofA entity where

many of the termination points are within the [academic (reductionist science) degradation], and the [university system implosion] sub sets. This likely does not suggest a causal link, rather it would appear that the [academic system implosion] is likely to provide [opportunities] for [information liberation] from the [black ops (side of academia)]. The probabilities of [information liberation (or leakage)] is very high as the [visibility] of [academic whistleblowers] rises significantly over late Spring and through Summer.

The SpaceGoatFarts entity still maintains its growth levels, in spite of some of its sub sets moving over to the more mainstream entities. Large areas of this growth are still within the [officialdom denied] sub sets as apparently the TPTB and their [minions] will continue to [deny] in spite of [evidence] so [plentiful] as to [overwhelm] the [detractors/debunkers]. These [ufo/contact episodes] are supported by aspect/attribute sets that are also found as support for [new electrics], and the [disruption (social chaos/economic meltdown impacts) of the black ops world].

The levels of penetration into the various data sets of the [economic meltdown] forecast for 2010 through rest-of-world cannot be overstated. Every archetype within every entity examined so far has at least some detail sets with [economic (dollar death) collapse] linguistics. Further, all of the entities examined have major archetypes under [transformation] that are specifically focused on the local-to-the-entity impacts of [dollar death]. The SpaceGoatFarts entity is no exception, and in many ways is the defining form of the impact as there have been no sub sets within this entity located without [economic (dollar death) impacts] aspect/attribute sets. It would appear from the accretion patterns that some of the early in 2010 effects will be the previously forecast, and anticipated, [wave of whistleblowers] as various [sections/agency/departments] of the [federal government] and [corporate sub contractors] will [be eliminated] due to [rapid onset] and [devastating problems] arising from the [dollar death]. Some of these [whistleblowers] are associated with [material evidence], what regular humans will call ‘proof’, though it must be noted that ‘proof’ is actually an emotional response within a perceiver. However, the [material evidence] that is forecast to be [associated with the whistleblowers] is curiously cross linked back to both TPTB, and the Populace/USofA entity where [black ops researchers working for officialdom] will be [staggered] to learn of [what has been hidden] from them. Apparently you **can** take compartmentalization too far.

The TPTB entity cross link chains also include a very tight connection between the [DarkSideOfTheMoon Coup] by a very large group of [military officers (at the rank level of Colonel or Commander)] who will be [pressed/pushed] by what can only be described as a universe inspired synchronistic [personal link] with [woo-woo science (or personality)]. Readers of these reports will recall a discussion in previous issues of forecasts of a [collective consciousness (or dream) experience] by [numbers (masses) of humans]. The data is now indicating that a significant number of the persons involved will be within the [black ops (connected/associated)] world(s) {ed note: including 'civilian' sub contractors}. The data sets are pointing toward this [shared consciousness experience] as being [pivotal] within the developing circumstances that will provide the [incubator] for the [DarkSideOfTheMoon Coup]. This [coup de'tat] may really be better described as an [usurping of power] (from the point of view of TPTB), and that is how 'they' will attempt to spin the story later in 2010 as the details emerge, but from the perception of those involved, their individual [actions] will be [felt/perceived (and understood)] to be [righteous] relative to their [shared perception] of [reality]. The SpaceGoatFarts entity has these [DarkSideOfTheMoon Coup] sub sets under the [unknown energies from space] which is a peer to the [officially denied] sub set. The [shared common consciousness experience] component to the [DarkSideOfTheMoon Coup] will provide the TPTB with the [opportunity] to label this an [alien invasion] during the more active phase of the [alien wars] in 2011, but by then their [power base] will be so [diminished] as to make the statements extremely [ironic] given the information on their own [macrobe enslavement] that will be out-and-about by that time.

Please note that while the [shared consciousness] discussion here has some resemblance to the teevee series about a planet wide consciousness experience while 'blacked out', our data sets pre-date the appearance of any information about this series. In addition the [shared experience] described by the data sets has distinct differences in that it is perhaps [tens of thousands], happens while [awake], is [disputed and not believed (except by those who experience it)]. It is further described as [leaving residue]. Other descriptors indicate that the [speaking/voicing] of the [experience of common bonding of consciousness] will be very [low level], and that this [reluctance to voice] will both [aid the progression] of the [coup de'tat] as well as [remove (possibility) of detection (by TPTB)]. Many of the sub sets within the [unknown energies from space] supporting layers are cross linked

over to this [shared (bonded) consciousness experience], and because of the totality of the details involved, it has become known here at HPH as the [human crop circle] experience. In this label, the [individual humans] are likened to the individual stalks of grain which are [blown out] to bend them over into the crop circle glyph shape. In the linguistics describing the actual nature of the [shared/bonded consciousness experience], the data sets are curiously similar to how it must be for an individual grain stalk within the totality of the [crop circle creation experience].

Is this television series yet another encoding (and attempt at manipulation by TPTB through their media outlets? Are they 'pre staging' memes because they suspect they will need the [contextual reference point] later as circumstances manifest? Hmmm. Perhaps, either way, not long to wait.

The SpaceGoatFarts entity not only shares the [devastating effects] from the [economic meltdown] with all the other entities, but also contains many sets going to the [economic] impact on [hidden government] which is indicated to be waaay more [catastrophic] than will be felt by the [official (public) government]. The data sets within the SpaceGoatFarts entity sub set of [officially denied] shows that a [double whammy] will strike the [black ops world] as both [official funding] as well as [stolen] funds are impacted by [restraints imposed (by dollar death)]. Even more [destructive] to the [black ops world (primarily in the USofA)] will be the [collapse] of their [tacit/hidden funding (from commercial enterprises)]. The [corporations] that [fund] much of the [secret world of government(s)] will experience the [economic collapse] much [worse] than anticipated due to some soon-to-be-revealed [manifesting circumstances] within the global [financial system]. The data would seem to be suggesting that the [money managers] of the [black ops/shadow government] have made some very [unwise] 'investments' over these last 2/two years, and will (in January/February) be viewing the [results]. The detail layers indicate that a minor form of shared experience will be evident over January/February as [collective pissing (of the pants)] becomes a [financial cube farm communicable disease].

**Conclusion: Volume Zero, Issue 3:- Combinoric crescendo effect, Love the wave**

Time is not linear. It does not flow as a river. Rather time exists as an attribute to the continuous creation that is reality. What is laughingly defined

as ‘reality’ by the collective consensus of the anglosphere driven by the powers that be is an illusion that is under constant assault by continuous creation. The illusion fostered by the powers that be and their control systems from academia through propaganda, from birth to death, is filled with holes and in imminent danger of fading away like all gossamer.

It is not the time attribute of continuous creation that is the source of the problems for the consensus illusion constructed so painfully by the powers that be over these last centuries, rather it is other attributes of continuous creation such as ‘complexity’ that can be described as the ‘source’ of the problem for the powers that be in their desperate attempts to maintain their flawed illusion of reality.

Noting that real reality is illusion at its core anyway, the abstractions placed over the illusion of reality by the powers that be are coming unraveled not due to lack of ‘sales effort’, but rather due to ‘buyer rejection’. The rejection of the sales effort by buyers is spreading through the abstract illusion that is consensus reality in the anglosphere as a disease spreads through any population. The dis-ease in this case is a meme, or mental virus, and its ability to alter thinking radically is what is causing the holes to appear in the fabrics so carefully created by the powers that be. As each person awakens to the abstraction nature of consensus reality and ‘drops out’, they put another hole in the fabric of the illusion itself. Further, as each leaves, those humans touched by the departing human find themselves responsible for a greater portion of the ‘energetic load’ of maintaining the illusion. The level of the maintenance burden increases on each human node of the illusion with the departure of each human who leaves. The combinatoric nature of the mathematics involved seems not to have been anticipated by the powers that be, or may be of such a core math to continuous creation as to have stumped the efforts of the powers that be to overcome.

It is the combinatoric nature of the holonomy (all life in all universe bound together) of continuous creation that presents to us humans here on earth at this time. As the billions of individuals that compose terran humanity are shoved around by the powers that be with increasing force, the response is exactly like the trillions of air particles that mass up ahead of a jet as it increases its speed. The sharp and penetrating **crack** of the sonic boom as it lets go the massed force (or force of the mass, if you prefer), is exactly like the conditions being faced by the powers that (currently) be over these next 2/two years.

The projections and forecasts for the future (especially from 2010 through 2012) that do not take [pressured mass (of humans/consciousness)] into consideration are missing an essential clue to how continuous creation presents to itself (meaning us motes). Time is not linear, and neither are events expressed over time. There are analogs to amplitude and frequency within manifesting circumstances that lead the researcher to conclude that when humans (and perhaps all life) are involved, waves are also involved. Unlike the tame wave-forms found in science, and as may be illustrated by oscilloscope displays, continuous creation reality has waves that crest, and then break or crash as the tipping points of internal stability are reached. Such waves as are seen out in the wild are good images for the waves of consciousness change as it will flow through the ocean of humanity here on terra. The mass of the response force created as the powers that be attempt to push humans consciousness into their desired wave form will rise a tighter and tighter mass struggling against the gravity of continuous creation until, as in the wild, the point of criticality is breached causing the wave to crest into chaotic complexity of self deconstruction as the mass is released into freedom.

Such will be these next 2/two years for humanity here on earth as the imposition of forced patterns meets the critical mass of complex continuous creation. As the chaos of the breaking wave envelops the world of humans, many will discover the freedom inherent in chaotic environments. In the tumbling froth of 2010 and 2011, much of the pent up pressures that TPTB put into the creation of the abstract layer upon the real illusion of reality, and which supports their shadow or hidden world(s), will be unleashed. As will many of the secrets that are kept hidden by the abstractions laid upon illusion by these masters of deception. As we will all discover shortly, even the masters of deception are not immune to how universe shall move time and tide. As individual molecules in the ocean of humanity, subject to pressures of deception, and universal tidal forces, we all need to learn to love the wave.

Addendum: See you in NapTime (homage to AU aboriginal DreamTime)

There are no planned future issues of this newsletter. The state of the lexicon and our hardware is such that much work needs to be done at a core level for us to proceed. This work is in the planning stage now. Whether we have the

capability (internet available, und so vieter) to produce another issue is up to the manifesting circumstances delivered by universe over this next year. Announcements will be made in advance that another issue is planned IF emerging reality so provides. In the means of time, eat lots of pies, and contemplate the curious connections of continuous creation in your naps.
