Data Set Analysis

Asymmetric Language Trend Analysis
Interpretation and Predictions for 2009/2010
By clif high (halfpasthuman.com)
Copyright 2009/2010 (all rights reserved)

Disclaimer of Methods

The predictions herein are produced using our radical linguistics method that has been in development and production since 1997. The data sets employed are a result of the data gathering begun in October of 2008.

Conventions employed in this interpretation.

Within this document, words or phrases that are enclosed within square brackets [example] are extracted from the data presented in its more raw form. Words, not delineated in other ways, and that surround such bracketed words or phrases are used to place the marked word/phrase in context. This is to say that there is a deliberate attempt to present the information in as coherent an essay format as is possible, given the complexity of the subject matter, and the process involved.

Disclaimer of the Extremes

The process employed to produce the ALTA reports seeks out emotional associations with words in common use on the internet. As a result of the nature of emotions, it is easier to find and identify such words that are associated with extremes of emotions. Thus there is an in-built artifact of our production which will always tend toward the most extreme ends of the emotional range. Further, it is easier to identify words associated with negative emotions than with positive emotional states, therefore, again, there is an in-built artifact within our processing which tends to focus on the more extremely negative range of words.

Disclaimer of status of knowing

This document presents forecasts of trends and predictions based on radical linguistics that are derived from a process of invention. This invention process is on-going, and self-transformative. This invention process is inherently flawed at so many levels that its discussion of the discrete problems is beyond the scope of this presentation. The reader is cautioned against the in-built process in humans to 'believe' the written word. The information presented herein is at best a very poor process of mapping the collective consensus reality and some small amount of the changes that it manifests. To restate this premise: it is our understanding here, that each viewing of the future, changes the future. Usually these changes manifest in unanticipated ways. Likely this is due to universe favoring 'surprise' as a method of keeping consciousness awake and slightly jittery.

[To repeat this in other words:](#)

Do not assume we know what we are doing in the presentation of this material.

Always discount the information presented as it has an in-built error toward the most extreme connotations available in language and trend interpretation. In yet more words, the information presented uses words that presume the worst-case for future manifestation of the collective consensus.

[ALTA Disclaimer](#)

The text of the last of our subscriber 'runs' is included in this presentation. The following disclaimer applies to all the text of this document, with special emphasis applied to the text of the ALTA reports.

Note that this report is offered for entertainment only. Any resemblance between the events portrayed in this report and any developing reality is purely coincidental and in no matter represents foreknowledge on the part of the authors of this report.

Note that the results presented herein are derived from humans expressing themselves on the internet. As such, emotional values and the words used to express these emotions are being sampled and interpreted here, not the future. Any resemblance between this report and future developments is entire in the mind of the perceiver and does not exist in reality. The Authors cannot be held liable for accuracy, or lack thereof, in this report. Authors cannot be held liable for human interpretation of this report nor any action any human takes as a result of this report. Any human foolish enough to alter their behavior based on this entertainment only analysis demonstrate themselves incapable of rational appreciation of reality, and the Authors are explicitly held harmless and blameless for any and all such mental aberrations on the part of the reader.

Terra – Dynamic Differentials

The Terra entity suggests that the rate of changes experienced in the planetary ecosystem will increase very rapidly over the Fall of 2009 such that by Winter (2009/2010) the effects of the [unknown energies from space] (see SpaceGoatFarts entity) will be able to be described as [clearly visible]. The [visibility] described includes the [un – deny- ability (of sudden catastrophic climate change)] that accompanies the larger [paradigm shifts] which will roll through the global populace over the course of Summer 2009, and early Fall.

As the Terra entity gains values for [disruption], and [disturbances] both here on [earth], and within the greater [solar system], including the [sun], over Summer, the accretion patterns are pointing to a rapid increase in [clearly visible], or [reported in the global mediastream], and [destructive (to infrastructure)] events that are clustering around the descriptor of [heating incidents]. The data sets are pointing to a Fall in which [solar heating incidents] add to the [collection] of problems besetting the [social infrastructure] in the [developed world]. These [solar heating incidents] will include something that will be [visible] as the [‘ten second burst’] in the global mediastream.

There are also language sets which are clustering under the context of [biological heating] which are apparently applied to both [oceanic] systems, **and** [atmospheric] systems. The aspect/attributes dominating the [oceanic systems] include references to [new volcanoes], as well as the [eruption/manifestation] of a new [field/crop] of [deep ocean vents]. This latter is associated with the [pacific ocean], and contains supporting sets of aspect/attributes which describe both [climate], and [economic] impacts of these [new ocean vents]. Some of the supporting language suggests that the [vents] will cause [disruptions] in [local] and [deep ocean systems (flows?)] that in turn impact [humans] with [sickened/ill ocean currents]. An alternative interpretation of these aspect/attribute sets **could** be that the [oceanic currents], once [disturbed] by the [manifestation] of [new deep ocean vents], then [bring disease/sickening] to the [inhabited shores]. Again, this language is mostly dominated by geographic references to the [pacific ocean]. The supporting sets also include repeated references to [sulfur], and [metals] as [agents/catalysts] which produce the [local effects] within the [oceanic ecosystems].

As the newly processed data is added to modelspace, it becomes clear that a part of the [shifting (into new) paradigm] which had been forecast to sweep through the planetary populace over the course of 2009 will bring about a very [new/novel] form of [consciousness] relative to [water] in a very general sense, but specifically to [oceans]. The [new focus] or [novel appreciation] of the [oceans] will be firmly anchored (pun intended) to a rising [realization] within the [planetary populace] that [no life lives without healthy oceans]. Further there are indications that [oceanic events] of rather [spectacular presentation] will manifest from Summer of 2009 through the next few years, and with each occurrence again a [populace reaction (of oceanic) focus].

There are still building sets within the data for [new lands rising (from ocean bottom)]. We note that the language around the recent underwater volcanic explosion near Tonga which created 'new land' did not rise to the level of the linguistics forecast and so there is still a large amount of unfulfilled linguistics that are expected to appear over the remainder of 2009 and 2010 around the core idea of [new lands (appearing)]. Again, the linguistics for this will focus collective consciousness back onto all things [oceanic].

The sheer number of forecast [earthquakes], both sub marine, and terrestrial, make the isolation of any of the more [destructive] occurrences difficult, as well as misleading. The data sets indicate a very active period within the [stability] of the [planet]. The forecasts are for yet another large increase in large [earthquakes] over 2009 and 2010. These are forecast to rise to the level of a [continuous (more or less) background] level of [visibility] within the global mediastream. Coincident to the rise in [earthquakes] of a [destructive] level will be a rise in [visible] incidents of [unknown] or [strange/peculiar] phenomena of all kinds. These include but are not limited to [temporary magnetic anomalies], [electric effects erupting] from previously well behaved parts of the planet. Other forecasts are for [perceived growling/snarling] emanating from the [earth], as well as [very odd atmospheric occurrences], that may include [hard clouds], and [clouds (which move)] in [apparent opposition] to winds. Sub sets of these [wind opposing clouds] are more geographically focused on the [southern hemisphere], especially [Antarctica] than elsewhere.

Other [oceanic] issues are forecast to directly affect the [human food supplies] over 2009 at a rising level of [visibility] within the global mediastream, but then the data accretion patterns suggest that 2010 will

bring a [shocking] level of [oceanic food chain collapse] which directly affects the [health] and [protein/food] for over [1/one billion] humans in that year.

Examples of the [strange oceanic developments] include the [radical alteration] of the [species balance] in the [benthic] and [inter tidal zones] . The indications are for whole [‘fisheries’] to [disappear/vanish] over the [harvest season(s)] of [fall/winter 2009], such that by early 2010 a larger number of the [populace] will have become aware of the [oceanic life systems sudden change].

Further problems for [humans] deriving from [ocean systems changes] will also directly affect [food production] on land. The influences of [cross ocean atmosphere flow changes] are forecast to [complete alter/totally change] the [habitual (until now) agriculture system]. The level of this change is reinforced at several layers of the supporting sets and always refers to a [global/planet wide] impact. The idea coming across from these detail layers is that the agricultural patterns of the world in 2010 will not be those of last century, and further that the patterns later in 2013 and beyond will not be those seen in 2010. So the [state of flux] descriptor set for [places (where food can be grown)] does change significantly over these next 5/five years.

The Terra entity continues to grow supporting sets for [diaspora] which are cross linked over to the GlobalPop and Populace/USofA entities. The Terra entity is indicating that the planet will provide reasons for the [diaspora] in the form of [yet more floods], and [storm systems (hurricanes/cyclones)], as well as [volcanoes] and [non-eruptive lava flows], and [new rifts (in the) land/ground]. So many such incidents are within the detail layers of the data sets that to focus on any single incident removes attention from the sheer mass of the [continental changes] that manifest over 2009, and 2010. At risk of changing the focus, there is a single incident worth reporting in that it appears to [rattle/shake up] the ThePowersThatBe (TPTB) and their reasoning about [safe places]. We expect this incident in early 2010.

As the [un-deny-ability] factor regarding [weather] takes hold in the [greater populace], the data sets accruing to the Terra entity suggest that [further/more extreme] sets of [climate conditions] will begin to manifest. Almost as though humans have to be ‘prepared’ for the changes by a staggered, and staggering emergence, the next phase of [planetary] and [solar system] changes are indicated to shift a very large percentage of the

[global human populace] into [shocked awareness] of the [fragility] of their [planetary support systems] {ed note: specifically focused on [food supplies]}, as well as the [increasing rapidity of planetary state change].

As modelspace is progressed through the remainder of 2009 and then 2010, the Terra entity takes on distinct new shapes from data clusters that accrue under [coastal alteration], as well as the [coastal plains] sub set of the [diaspora] sub set within the GlobalPop entity (via cross links). These data sets grow along with other [coastal habitat] sub sets throughout all of 2010, and as far as the longer term data sets will project into 2011. The [coastal habitation] sub set has several supporting groups for [disruption (of coastal habitation)] which include [earthquakes], and [volcanoes (altering marine current flows)]. Both of these aspect/attribute sets grow significantly through 2010, and sometime after the Summer solstice of that year, both sets merge into [sustained damage] sub set within the Terra entity. Further, the [coastal alteration] sub set, as it grows in 2009, includes supporting sets for [north america] and [japan], and [china] to all experience [violent cyclones/hurricanes] that will [alter coast lines] and are shown to [affect shipping (routes)] for decades.

In addition to the [coastal alteration] sub set, there are other supporting sets for [alteration of habitability (of the) coastal regions] of the planet that include [rising ocean levels], and, more curiously, [rising ocean temperatures]. This last is supported in part by the references to [volcanoes (under oceans)] which will [raise water temperatures], but further this set includes [atmospheric impacts] either on, or more likely from, the [rising ocean temperatures]. The most immediate of the effects on [human coastal habitation], will be the [radical alteration] of the [planetary winds]. These are forecast to bring [life/land scrubbing rains] to some areas that are currently [deserts]. Over the last of 2010, and into 2011, the [coastal habitation] sub set within Terra and the GlobalPop entities becomes heavily cross linked to the SpaceGoatFarts entity where it terminates in [alien wars].

As the Terra entity is progressed along with modelspace through the latter half of 2010, and into 2011, the [dynamics] of the [equatorial differential] will begin to rise to [visibility] within the global mediastream. The emergence of the [differential displacement] as a [terrestrial issue] gains emotional impact supporting aspect/attributes sets that include [shocking], and [electrified], and [solar punch/strike], and [colloid disperse (disease)]. This last aspect/attribute set is important judging by the sums in both impact

and duration fields. Further it contains supporting sets for [vast areas (of diffusion impact)], and [indigestible sediments], as well as [rain of the dead (creatures)]. The whole of this (and related linguistic structures] is describing a situation in which an area, perhaps as large as the continent of Australia, of ocean floor will [burp up/expel upward] a [sedimentation layer]. This effect will then cause a vast [ocean cloud] to [obscure the growth (of the ocean food chain)] such that the [visible] language about the 'incident' will include references to [billions (of humans) at risk]. The [risk] sub set includes, but is not limited to, [starvation], and [disease].

Markets/Economics: Wave Dynamics

NOTE : This report is prepared from the data gathered over 2008, and 2009 up to June. The temporal scope for this report extends from Fall (September 21) 2009, through to onset of Winter, (December 21) 2010. The primary effective sets are the shorter term values which project out to March of 2010.

The Markets entity has new data accretion patterns which suggest that the [bankruptcy wave] for the [lower] and [middle] tier [corporations] will begin to [swell to visibility] in Fall of 2009. This [bankruptcy wave] first shows its [visibility] in late Summer, following the [28/twenty-eight days (also a lunar/solar rotational month)], [break-down] of the [derivatives systems].

As the modelspace is progressed through late Summer {editors note: labeled the 'summer of hell' due to the multiplicity of [outbreaks] and [eruptions] of both human abstractions and earth activities} into Fall, the Markets entity takes on the primary modifying aspect of [severe] or [extreme].

The primary supporting aspect/attribute set for the Markets entity of [severe/extreme] is itself modified by [bad], [confirmation (of) severity], [loss of (THE) currency], [finality (of) mortality (of usofa dollar (as global reserve currency))], [lethal (to dollar), [global (disruption of) 2/3rds (two-thirds) of the currency system]. **Note :** the progression of the [death of the dollar/currencies] meme continues for the next year (through November of 2010).

The primary supporting aspect/attribute set for the context of [currencies/paper debt instruments] is [conflict], and this aspect/attribute set is extensively cross linked over to ThePowersThatBe (TPTB) entity where

the terminating lexical structures are headed by the context of [war (for profit/gain/power)]. It must be noted repeatedly that the TPTB entity termination points including [war (for profit...)] are all now showing at least some supporting sets for [fear] on the part of TPTB that [control] of the [global populace/omni humanity] is, or soon will be, [lost]. There are deeper supporting sets within the newly processed language for the [conflict] context within the Markets entity that include [war], and [terrorism], **both** of which are themselves extensively supported by [government (involvement)] as well as [engineered/created/designed]. Again, many of these supporting sets cross link back over to TPTB entity.

The imagery contained within the detailed aspect/attribute layers paints a very [bleak] time of [competition/conflict/lawsuits] and [war] set against the background of [currency collapse]. Also it needs to be noted that the [loss (of) THE currency] context is also directly linked into the supporting chain for the [wars] sub set growth beginning in Fall of 2009 and carrying through into very late 2011. Apparently while it will take barely a year {ed note: from November 5-8th 2009 through November 2, 2010} for the [currency systems] to [collapse/implode], the after effects of [created (political) chaos through war] will continue for some number of years.

The [loss of the currency/paper debt systems] globally will be [propelled] by [panic], but also by [press (hype)] over the course of the Fall and Winter 2009, and will lead directly to [initial attacks] in or near the [vernal (spring) equinox] of March 21, 2010. It is then that the linguistics show rapid [escalation], and the [manifestations] of [bizarre behavior] within the [markets] reaching [extremes] of [emotional swings]. The idea coming through the data sets goes to the idea of [panic] induced [market gyrations] that will be [globally affective] *just as the other [social] and [political] and [climate] chaos also are reaching their [initial (peak) plateau] of [emotional building tension]. In other words, the Transformation (of the global human world) in 2009, will actually reach its [peak of impact] slightly before the March 21 equinox in 2010.

The [peak of reactions] which are associated with the [transformation] meta data layers will themselves be [transformed] by the [active process] into the next layer of global social metamorphosis that will dominate the human world through the rest of 2010 and into the first half of 2011.

The [death of the dollar] linguistics show that a full [year] will be [eaten/consumed] by the process of the [rejection (by all) of the dollar (as reserve currency)]. This process of the [dying of the dollar] is set to begin in a [visible] sense within the mainstream media, as well as being a [serious burden] on the [middle class] and [lower/poverty class] of the [populace] starting in November of 2009. The totality of the process will run until late in 2011, however, the most [brutal] period, as defined by the data, will be the near-year from November 5, 2009 through to November 3, 2010.

According to the data accretion patterns, it will be during this year that the [hyperinflation] hits the [populace/usofa] as well as the rest of the [dollar dependent] world, which can be conceived as the extent of the [core] of the [anglo american empire].

Please Note: The Markets entity, **and** the Populace/USofA entity, and the GlobalPop entity are all in tight agreement within the growth of the supporting aspect/attribute sets. It is merely a matter of perspective and convenience that the larger picture of the [hyperinflation] interpretation is being presented here in the Markets entity.

As the [derivatives failures/lockup/seizure] language gains the support of [failure (of crops)] over the course of [summer 2009], and that in turn act as the trigger for the [implosion] and ultimate [lockup] of the [foods] and [interest rates] based derivatives, it is the [political] and [military] crises of [fall 2009], that will act as the trigger for the first, and perhaps most [shocking (to the middle class/unaware sheeple)], of the [dollar death]. The [sudden], and [shocking] and [global] [loss of confidence (in the american empire)] will initiate an equally [sudden] and [shocking] series of [sales], or [dumping] of [all forms (of dollar denominated) debt], and indeed, the data suggests [american] and [british] [debt] of all forms.

It is likely that the Populace/USofA entity data sets which indicate that the [political elite] of the country are [scrambling] and [desperate] in [fall 2009] are going to be very prescient, especially as they further relate to the [death of the dollar]. These data sets show that the [political elite (minions of TPTB)] and the [titular rulers] of the USofA go into [scramble mode] after some form of [international crisis] breaks out on October 26th. This [crisis] will [compel] the [political classes] of the [usofa] into a [complete panic]. The [panic] language is extensively cross linked over to the TPTB entity where many of the terminating lexical sets are within the [fear] sub group.

While the [dollar death], in a very real sense, has been underway over the last 8/eight years with rapid acceleration of the process starting in 2007, the [middle classes] of the [planetary populace], and the [populace/usofa] have yet to [feel] the [process] at a [personal level]. They will be able to both [personally appreciate (become aware of daily personal impacts)] of the [dollar death] as the [confidence loss] of the [planetary populace] in the [american dollar] is indicated to be [extremely visible] starting this [fall 2009]. The [visibility] rise is not the [beginning of the process], but rather more of a [culmination] of the [silent] and [invisible] aspects of the [disease of corruption] that is [killing the dollar/confidence] as a more or less natural side effect of the [collapse of the american empire]. The data is quite clear that the [shocking] and [sudden] language **will** apply, albeit only to the [middle classes] and [unaware citizens]. However, the data is also very clear that the [loss of confidence] will [sweep around the planet] in less than [3/three days].

The [crisis of confidence] will coincide with [global political turmoil] of such levels as to provide a [fertile field] for [thoughts] and [language of war]. The process of the [dollar death] will be very seriously [threatening] to [regimes] around the planet, including the [regime (of the faux) 2/two party system] in the [usofa]. EVEN in the Markets entity, the [death of the dollar] is also becoming rapidly synonymous with the [death (for the faux) 2/two party system] in [american politics]. It also, apparently will coincide with the death of a number of [prominent political class members]. So many are indicated to [perish] as to have the [press] pushed to [speculate] about the ['coincidence'] of the wave of [political passings].

As the [crises of confidence] progresses into [visibility], within the global mediastream, it will also be [parallel] to the [visible] rise in the [death of dollar (or loss of THE currency)] meme that percolates up into the global mediastream. The rise of the [visibility] of the [loss of currency] leads directly to the [hyperinflation], followed by the [destructive deflation], it also produces a situation of [hyperinflation] that specifically is both targeted to [gold/silver/precious metals], AND is to be different from the [hyperinflation] within the [food] and [energy] areas.

Please NOTE: the situation within the [gold/silver] areas of [values] AND [markets/ability to sell], is very very very complex. First a note of caution: IF a human were stupid enough to be placing [bets] on the coming [value (and relationship) shifts] within the [precious metals], AND these [bets]

were to be made in *any of the [paper debt trading markets], AND these [bets] have a [maturation date] that is beyond November 5th of 2009, the data strongly suggests that such people WILL NOT BE PAID on any [winning bets]. Again, to repeat this....if you made a bet about the price (in usofa dollars) of [gold/silver/precious metals] that was to be effective AFTER November 5th of this year, you are unlikely to collect EVEN if you are correct. The data strongly suggests that a [breakdown] in the [dollar] will also [induce/compel] {ed note: maybe due to 'officialdom edict'} a complete [seizure/rigidity] of the ability to [transfer] 'funds' or [wealth] will be [impaired/stopped/resisted].

Please read the note above again. When you break out of the re-read loop, please understand that the data sets that we have ALWAYS err on the side of the extremes in language, and therefore have an in-built bias toward the extreme end of the range of possible mistakes. Our data points to a period, albeit brief, of some months in which both the [intrinsic relationship], and the [price values (in usofa dollars)] will radically change. The [change] described is also itself to progress through a [range] of [alteration]. The details describe a time when the [price value] for [gold] and [silver] are [separated] by manifesting circumstances, and the [intrinsic relationship] between [gold] and [silver] also changes. There are *some numbers worth noting, but also be advised that the numeric values themselves are being affected both by the [hyperinflation] and the [pressures of destructive deflation] which will prevail at the time. The numbers would suggest that the [price] of [silver] (as an instance which holds only briefly) might reach the 800/eight hundred dollars per ounce level. However, this is against a background of 500/five hundred dollars per barrel of oil (or higher), while [food prices] are escalating globally at just nearly the same ratios. SO the [price of silver] is very very relative to the actual economic environment at the time. Further we need to note that the period of the [dollar death/loss of THE currency] is also the transition into the [calorie based economy]. There are other data sets within the supporting structures under the [gold/silver] sub sets, specifically within the [relationship] areas which suggest that the [value relationship] between [gold] and [silver] will [bounce around/be unstable]. This *may manifest as shifts back to an historic mean level of 12/twelve units of silver to 1/one of gold. There are also indications that the [relationship] will [over-extend] for a brief period.

We need to note that during the [hyperinflation] period when the [usofa dollar value of silver] soars, we also loose any meaningful [value appraisal]

of the [usofa dollar price] for [gold]. Other precious metals in the [platinum group] also drop any association with [usofa dollars]. Reasons for this are purely speculative, but may involve the [disappearance (of) gold] from the USofA, and thus what remains is so small in amount....well, again, just speculation.

The following period {ed note: lasting decades perhaps} of [destructive deflation (in the USofA)] still shows [silver] and [gold/other precious metals] as [worthwhile storehouses of wealth], but increasingly as modelspace transits through 2011, the [values] showing up as being almost [ubiquitous] among humans in [trading] will be [calories]. Hmmm. So what is the calorie value of an ounce of silver? Guess we have to wait to see.

TPTB – Emotional Dynamics

A curious warning comes through the linguistics for the [minions] of TPTB. Although perhaps predictable, given the overall view of the developing chaos ahead, this [warning] language is relatively specific for these [minions] in that it says, via the accretion patterns of the newly arrived aspect/attribute sets, that [IF (a minion) serves a prince/elitist bloodline freak], then the [minion] needs to be aware that [conspicuous (or high) office] granted by TPTB has the potential, over late 2009, and through to mid 2011, of becoming a [death warrant]. The [conspicuous appointments] of [new officials] will, according to the data sets being processed now, will take on the [peculiar (aspect)] of [perception] by the populace, of a [joke]. This [cosmic joke] is a bit of [dark view humor] about the [shortness of life expectations] of these [newly appointed (conspicuous) officials].

The data accumulation patterns (where it clumps) as opposed to the accretion patterns (speed of how it clumps) suggest that the [fear] emotional sub set has crossed a threshold level within several layers of TPTB at the [minion organization level] and is starting to [dominate decisions]. This is a very key occurrence as it now provides a background to explain the current, and future decisions made by the TPTB over 2009, and 2010, and why they will be [visibly] tinged with [desperation]. It also will explain the [onrush], or [overwhelming wave (of fear language triggers)] that is indicated to [engulf/subsume] the [populace] of the planet. Though primarily focused on the [anglo-american empire], there are indications that the [fear language trigger wave] will also spread out through the [monotheism controlled] parts of the planet. This [fear wave] is indicated to be a [projection] upon the

[planetary collective consensus] by TPTB, and further it is in direct response to their own [internal (collective) emotional state]. This last is a linguistic structure that includes supporting sets of [desperation] (bespoke), and [weeping fear] (pending, mid to late 2010), and [knee shaking/anticipation] (current).

A significant portion of the [fear] levels rise within the TPTB entity derives its recent growth from the rise of the [chaos] supporting sets within the populace entities as a sub set that itself is supported by cross links from the [loss of THE currency/dollar death] sub set. Other [social contract disruption/dissolution] sub sets within the Populace/USofA entity are providing the second largest supporting emotional levels for the growth of the bespoke [fear] sub set within TPTB.

Curiously, a small, but still measurable sub set from the [new electrics] is also providing a large(ish) boost to the [fear] sub set. This appears to develop from the longer range data sets such that the [fear] levels within the TPTB are now rising in anticipation of the [potentials] coming from the [visibility] of the [fundamental discoveries] which are indicated to start 'showing' in late November, 2009.

The [fear wave] sub set is described as a [propaganda projection] that has some very specific [goals] which the data sets indicate will *not be achieved. The forecast [failure] of the [propaganda projection campaign] is not due to lack of effort, but rather to being [overtaken/overwhelmed] by the [shifting] of the [populace] into a [new collective consensus (paradigm)]. The [transformation] meta data layer has indicated for some time the [paradigm shift] would begin in earnest this Summer and proceed to rising [visible] results over Fall and Winter. The supporting sets for the [propaganda push] within TPTB entity are now being [subsumed] by the rising [fear] and [failure] value sets that completely overtake the set in early 2010.

In the last year or so of data processing, modelspace has been building support under a linguistic structure that points to ThePowersThatBe (TPTB) [losing (an arm of their) control mechanisms]. Initially, due to various clues in the detail layer aspect/attribute sets, the interpretation had been for the [press/mediastream] to be the [arm of control that gets lost] over the course of the second half of 2009. The newly accreting aspect/attribute sets under this [loss of (arm of) control] descriptor set to put that earlier interpretation into doubt. While there are still plenty of supporting aspect/attribute sets

which are accruing to the [press/media] sub set under the [loss of control] descriptor, these are now emotionally out 'weighed' by the sums from the [currency/paper debt system] sub set. The data sets accruing under [currency/paper debt] system have taken a 10/ten fold increase in both volume of supporting sets, as well as within the sums of the emotional quantifiers for the set as a whole. This has significantly altered the projection for just where the [loss of control] will originate. The data sets are still accruing in a manner which places the [originating point/incident] for the [loss of control (arm over populace)] in the Summer of 2009, initially showing in mid August. As of this point in the processing, the supporting sets with the largest emotional sums under both the 'impact', and the 'duration' field elements is the [loss of paper currency/paper debts/global trading markets]. This area of the accretion patterns indicates that as the [paper currency system] collapses {ed note: initially visible from the death of the derivatives mega monster over Summer, with 'peak' activity (in the background) from July 15th through August 18th}, there is a very [large/huge] and [global/planetary] wave of [secrets revealed]. The [wave of revealed secrets] is described as being so [large] and so [pervasive (globally)] that TPTB will find that [few (to none) places (on planet)] will [offer sanctuary], and further, that the [secrets revealed] will, in essence, [form death warrants] for many of the [ruling classes] as well as their [political/military minions].

Please NOTE: due to the ambiguity of the structure of language it is possible that it may still be the [press/media] as an [arm of control of the populace] which gets [lost] to the TPTB, even if it is the [economic breakdown (of the derivatives mega monster)] which leads to the liberation of the [press/media]. Just the way that language operates.

Please NOTE: it becomes difficult to discuss certain details of situations without providing information that may induce a self-fulfilling forecast. Therefore language substitutions are made in very sensitive areas of the forecast which (hopefully) will become meaningful only after the manifesting circumstances of the forecast. The idea is to provide just enough information to make the temporal marker valuable for the reader, without providing points upon which the 'future' could be altered by the forecast itself. Make sense? If not, please wait for the language to mature with time and emergent reality, after which perhaps an 'aha!' moment will occur.

As the data sets accumulate in support of the [death of the dollar/paper currency trading system], there is a corresponding rise in both the [visibility] as well as the emotional sums of the [fear] sub set within the TPTB entity. This entity is forecasting a number of rather dark and [dire] days ahead for the [global elite]. The longer term data sets project out to about mid 2011, albeit with an increasing loss of granularity of supporting aspect/attribute sets, and through that entire time the TPTB entity continues to [grow/develop/amass] supporting structures that will, in 2011, culminate in the formation of the [planetary pogrom (death hunt)] against what is now thought of as TPTB, and their [bloodline minions]. The data sets are pointing to a very [bloody revolution/killing spree] over 2011 and beyond as the [populace] is focused on [seeking (centuries of) revenge]. In the early days of the [planetary revolution], and long long months before the [tide] {ed note: pay attention...key word here...tidal actions} has been ascertained to [turn against] the bloodline freaks and their [control minions], a planetary 'hero' is described within the data sets as rising to [visibility]. The data is such that the first [visible] hints of this new [planetary personality] are being forecast for very late Fall 2009, or very early Winter (2009/2010). This personality is forecast to become very [personally important] to [billions] {ed note: yes, billions} of humans. The descriptor that may safely be applied now is [poet to dogs], or [canine lyricist]. {ed note: all this **should** make sense in the near term future, say December 2009}. The rising [visibility] at a [planet covering/blanketing] level of this personality will be a very very significant temporal marker for the [activation] of the [planetary populace paradigm shift].

The [dog poet personality] is described within the TPTB entity {ed note: with extensive cross links over to the SpaceGoatFarts entity, sub set [practical engineering/science]} as being a [particular/exceptional/noteworthy presence]. The TPTB entity provides very significant levels of support for the [dog poet] to ['howl out incantations'] that will [insinuate] into the [planetary consciousness] such that [the powers that be] and their [minions] are described as [shitting acids] onto [burning thighs]. Note that we ALWAYS take body part or bodily process references very seriously in the interpretations as they are such deep archetypes as to have proven their value in past interpretation work.

Very extensive cross links from the TPTB entity, and the [fear] sub set {ed note: at the 'bespoke' level} are indicating that the TPTB and their [minions] will be [hard pressed/set upon] by the manifestation of a [feminine

self-organizing collective (SOC)] which will be based around [inter-generation communications]. The language presented here is necessarily vague as the interpretation is spread across a wide variety of language substrates within modelspace. The idea coming across is being labeled the [aquarian collective/consciousness tribe (ACT)]. This global movement will seemingly [bloom overnight]. Further the accretion patterns are indicating that the [failure (of the dollar as global reserve currency)] and the subsequent [flood of secrets revealed] will act as both [catalyst] and [fertilizer] to what can arguably be labeled as the [First Planetary SOC].

The appearance of the [aquarian collective/consciousness tribe (ACT)] is indicated to cause [huge/giant] levels of [reactions (of hate/revulsion)] within TPTB which will be [projected] into the [global mediastream] by the [religious minions] and other [patriarchy/absolutists]. Ironically, the data sets are indicating that the [vitriol/hatred] and [anger] shown by the [dictators (of) religion (aka...the popes, imams, radical clerics)] will end up [promoting] the [ACT SOC] into something for which we have only inadequate descriptors. The idea of a [planetary council (of the feminine)] fails to provide an adequate 'flavor' of the emerging supporting sets, and may also seem to indicate a [central authority]. This last is strictly NOT part of the [ACT SOC] as it (within the GlobalPop entity) has [decentralized/loose (self organizing) collective] at its core. Also it is worth noting that the very nature of the [ACT SOC] as a [non-formal] and [loosely organized collective] is what the TPTB entity seems to find so [frustrating] and [fear] inducing. This, and the [efficient] and [uncontrolled (freely)] shared [knowledge base] that accumulates within the [ACT SOC].

GlobalPop – Dynamic Knitting (SOCs)

The data sets accumulating under the Markets entity are very extensively cross linked over to the GlobalPop where the termination point is mainly in the linguistic structure of [loss of THE currency (paper/electronic debt based financial system)]. Within this section, there are a couple of guidance images arising from the detail layers aspect/attribute sets. The images are pointing to an attitude of [detachment] and [personal (local) focus]. The data sets suggest that during the chaos of the [global currencies confidence crash] of Fall, the appropriate [attitude] will be defined as [being consciously changed] such that [calmness (in the midst of gathering chaos)] will be [discovered/found] in [persisting (in local good) works]. This layer of

supporting details focusing the attention back to [local gardens], is reinforcing of the other data sets within the GlobalPop entity as well as the Markets entity that go to the [collapse of currencies], and subsequent [shrinkage/deflation] of the [global economy]. There are further reinforcing data sets for a predictable [collapse] of [global shipping], as well as disturbing aspect/attribute set accretion in support of [international tensions], and [manifesting conflicts].

A deep supporting layer within the [transformation] meta data layer within the GlobalPop entity is headed by the context of [accomplished fact (of) manifest change], which can also be interpreted as [visible and large scale change], or further, a [change], within the populace, that is [so large] as to be [visible (to) all]. This [planetary populace] change is directly supported by [perception] and [world view]. The supporting aspect/attributes include references to the [new speak/new language] that had first appeared in our work in late 2005. This [new speak] sub set is now gaining detail level support from the immediacy and shorter term data sets. As such the 'time line' for the appearance of the [visible change of perception] of the [planetary populace] is likely less than 19/nineteen months.

The GlobalPop entity provides new aspect/attributes in support of the SOC's (self organizing collectives) sub set which first appeared in our data sets over 6/six years ago. These new sets are reinforcing of the [success] descriptor set, and provide new aspects/attributes at a primary level which go to the idea of [success 'against the odds']. Again the data provides extensive cross links from the [SOC's success] sub set over to both the Press entity, and the Markets entity. The data accretion patterns suggest that a [wave] of [success stories] will be created around the [SOC's] and released later in Summer and into Fall as the economic conditions worsen. Again the irony of the TPTB and their [press slaves/lackeys] using [alternative SOC's] as an indicator of 'green shoots of recovery' is not lost on us here at HPH. The [wave] of [SOC success stories] should be able to be used as a temporal marker for the next phase of the [global currencies meltdown] and the [extreme rise] in [visibility] of the pending onset of the [greatest depression].

The GlobalPop entity is in agreement with the Markets entity that the [global depression of unimaginable magnitude] has yet to actually begin, and that a very good temporal marker for the actual [first act] of the [greatest depression] will be the conjunction of the [currency crash] and the [international crises] of Fall of 2009.

The majority of the new supporting sub sets for the [new electrics] within the GlobalPop entity are accruing to the [early], and [initial], and [fundamental discovery] sub sets. These newly accreting supporting value sets are showing temporally beginning in late November, 2009. These new supporting sets double (or more) the emotional value sums for the [new electrics] sub set. The data suggests that several [inventors] {ed note: all but 2/two are NOT affiliated with any organization} will be making very [visible] [headlines] from late November 2009 through all of 2010 under the linguistic descriptor of [enthusiasm]. Further the [new electrics] sub set within the GlobalPop entity is showing as [dominating] the [omni humanity renaissance] out to the far end of the range of our longer term data which is to say out through 2030. These initial years from the [visible emergence (of fundamental discoveries) in new electrics] in November 2009 though June of 2014 grows in fits and starts that bring the emotional sums to [planetary visibility] in a very brief 4/four years. This sub set gains very large amounts of emotional building tension values in a large group of accreting values that start showing up in very late 2010, and seriously boost the [visible] impacts of the [fundamentals (of the) new electrics] as the data sets suggest that the [initial] or [first] of the [new electrics devices] will be [available/introduced] in late 2011. The data suggests that public [anticipation] will play a part in this first ‘flower’ of the [omnihumanity renaissance].

The descriptor sets that accrue from November 25th 2009 through to very early December 2010 include [success], and [staggering (wealth) (for the SOC)] involved {ed note: at least 1/one of the early inventors of the new electrics is ‘housed’ and ‘supported’ within a [SOC (self organizing collective)] likely of European origin}. The language includes [united (effort)] and [many branches/twigs (of discovery)], and [boats/crews (of 2/two)]. This last is closely associated with [research], and [experiments] which will [gain visibility] through [public demonstrations] which go [planetary]. The [public demonstrations] are to be [out-and-about] or [within public spaces]. This last set of aspect/attributes of [public space] also has within it supporting sets at the detail levels that suggest that the [inventors (group of 2/two)] will be [harassed] and [threatened with incarceration] for their [use/abuse] of the [public space]. {ed note: the ‘group of 2/two’ is archetype language for ‘small group’, or ‘binary’. Both are appropriate interpretations, though the actual words within the descriptor are ‘group of 2/two’}.

Further data sets in support of the [new electrics] as the *absolute beginning of the [omni humanity renaissance] include [talent (arising as needed)] and the [initial (state) or absolute beginning]. Further the [wealth] sub set within the data shows NO support for language such as ‘concentration’, and rather has repeated and deeply supported descriptors such as [dispersion], and [spawning/initiating/quickenning creation (spread)]. Other language along the same vein includes detail layers for [spread/dispersion] of the [new electrics] at the [kitchen table/familial eating area] level. The over all primary support includes [success], and variants of [successful] across all the detail levels.

Further descriptors at the detail layer are dominated by [duality], and include repeated references to [opposing (duality in opposition)], and [counter rotating], and other language such as [folding fields], and [operators], and [developers]. These last 2/two are supported by language including [masses], and [common efforts], and [united efforts], and [dispersed efforts]. Many of the supporting links within the detail layers of the [new electrics] sub set within the GlobalPop are internally terminating in [successful (dispersion)] and [uniquely successful unified cooperation].

As modelspace is progressed through the Fall of 2009 and into the more [visible] and [impacting] parts of the [dollar death cycle], the a series of [events] or [reports (of phenomena)] are forecast to appear which will lead (over some months) to the emergence of the first of what can be labeled as [planet wide self organizing tribes/collectives (SOCs)]. The initial appearance of this [new form of human interaction] is being forecast to be [formed (around or by) feminine energies] and with a [practical focus] on [food] and [family health]. This [SOC] is forecast to become [functionally self aware] in late Fall or early Winter 2009/2010. The [self aware state] is important as that will be the first time that the [participants] in the [SOC] will realize that they had [actually] and [physically] [altered/changed] the [course (projected/feared)] of [humanity]. As this [feminine global SOC] manifests {ed note: from TPTB viewpoint this SOC rises [shockingly fast]}, it will come under [fierce opposition] from TPTB and their various [minion classes]. The very first [attackers (of the aquarian SOC)] will be the [dictator/pope/papa of the catholics] {ed note: as proxy controller for the [organized religion] arm of TPTB}}, but very soon thereafter the [chorus of condemnation] will include [fundamentalist patriarchists of all stripes including islamists, judaists, mormons, baptists, et al]. A not so subtle irony will be the [outrage] of the [patriarchists] (over the ‘usurping’ of their power) actually acting to [promote] further expansion of the [aquarian SOC].

Without revealing much, the interpretation can note that it is the [hyper efficient communications] which will both [elevate/enhance] the SOC, and induce such [fear] in TPTB.

Populace/USofA – Destruction Dynamics

As the slowly maturing process of the [death of the dollar] accelerates over [summer 2009], reaching toward the appearance of the [hyperinflation] language of [fall 2009] and beyond, the data suggests that many [leaks] or [discrete] parts of the [american purchasing experience] will begin to [project hyperinflation] in many not-so-subtle ways. Quite large amount of the [hyperinflation] language settles in around [energy], and within that area, into [oil], [coal], [electricity] in that order of accretion. These areas are indicated to have huge, even [nation shattering] or [cohesion destroying] impacts on the [american populace] and specifically the [social contract] between [populace] and [government/political elite ruling class] over the year and a half from November 2009 through to mid 2011. The ‘beginning’ of the worst of the manifesting economic circumstances merely ‘starts’ in Fall of 2009. The data sets indicate that there is a very [brutal] year plus coming, and that [relief] or [rescue] does NOT exist as a possibility.

The [hyperinflation] linguistic set forms the central structure for what morphs into the [calorie economy] of the next decade. As the [hyperinflation] takes very serious ‘root’ into the [financial system], the whole of the [social contract] within the [populace/usofa] is put under intense pressures. These [pressures (of extremes)] are indicated to [completely alter] the [understanding] and [existence] of the [social order] here in the USofA. The [death of the dollar] at the [extremely visible] levels forecast for the coming year show as primary support for [transformation] across a broad spectrum of the [social consciousness] with specific areas of focus on [political revolution] that leads to the [replacement] of the [political class] en masse, as well as the areas of [government] and [populace] interactions. The [shattering] of the [social order] will lead to the rise of [local social consciousness] at levels which themselves forecast the [destruction] of the [globalist corporate heirarchy].

The [hyperinflation] sub set conjunction with [social order] sub set produces specific areas of interest focusing on [food (and medicine/drugs) production], as well as [destruction (of the) health care ‘industry’] has it has been building this last century, and the [transportation ‘industry’]. Note that

this last area is indicating that [everything] becomes [unwound] as various layers of the [transportation system] crumble under the impacts of [hyperinflation] and [severe restrictions (on) energy supplies].

The data sets are forecasting that a very [personally affective] component of the [dollar death] and subsequent [hyperinflation rush] will be the [collapse/implosion] of the [education system]. Striking first at the [university] and [college] level, the damage from [hyperinflation] will rapidly spread down the [hierarchy] to the local school districts and systems nationally. This effect is seen to produce the curious form of [diaspora] of [tens of millions] of [young people] relocating [back home]. Again, this whole area participates in the [destruction of social contract] as the [hyperinflation] works its way through the various systems supporting that [social contract].

Of course, as the taoists observe, every movement contains, within itself, the seeds of its own demise, and the [hyperinflation] is no different. Even as the [hyperinflation] is a raging fire within the various [dollar/energy dependent] components of the [social order], a simultaneous, and counter wave will be forming and manifesting in the form of [destructive deflation].

The [destructive deflation] is indicated to manifest as a form of [leprosy] in the [consumer society] as various components of it are simply [abandoned/fall off from acute/extreme disease] during the period of the [loss of THE currency/death of the dollar]. Various [service 'industries'] are indicated to [fail] in [spectacular] and [rapid] fashion. Noting that some sectors of the economy will [crash] directly due to the [hyperinflation] which will impact the ability to obtain [cheap energy] and [cheap goods], more are shown to [fail] as the [populace] goes through the [process of reorientation] necessary for the [transformation] into the [calorie based economy] that will emerge over these next few short years. The [trauma] of the [hyperinflation] will be small compared to the [destructive deflation] that follows. The majority of the business sector failures will manifest over 2010, and 2011. This [breaking wave] will be the largest ever seen of [massive social change] and will dwarf to insignificance such previous episodes as the American, French and Russian revolutions. All of the wars of the past will not compare in impact to the level of [social changes] being forecast for these next very few, very short, and very intense years.

The [paradigm shift] forecast for this [summer] and manifestly underway at this time, will not be [mature] for decades, but the data accretion patterns indicate that the [visible] impact begins over these next 2/two years, and further that [instances] or [seeds] of the [omnihumanity renaissance] should be [visible] in the midst of the [chaos] that will fill the global mediastream this [fall, 2009], and will appear in greater numbers, albeit only to those aware enough to see, in 2010.

As the rather horrid and [transformative] events of 2009 fade into the memory of early 2010, the data sets are forecasting that the Populace/USofA entity will be reminded of even earlier years in history as the very first part of the year will begin with [negative] as the dominate aspect for all things [financial] and [fiscal]. As 2010 progresses, the dominance will gradually shift from [negative] over to [really really confused]. Yet another descriptor set for [really really confused] would be [flooded (by problems) to the point that rational thought recedes]. The longer range data values are clearly indicating that 2010 will begin in [negative state], including [currency flow], and will then end in [rampaging/dominating confusion]. Then, in 2011, things get [real strange], but more on that later.

The [war] sub set still continues to grow support for [new wars] or at the very least, an incident of [being at the brink] or [grand international crisis] such that Obama and large groups of the [political minion class] are described as [out and about] in the world beginning on November 5th or so. The nature of the [crisis] **could** be [war], or the [imminent threat (of large scale) war] such that {ed note: similar to the Cuban missile crisis of 1962} the [attention (of the) whole world] is focused on the [principal players] and the [drama] of these [first days of November]. Without regarding the [active] nature of the [war] language, the data sets are quite clear that the [economic collapse (of the) USofA military begins also in early November] such that by mid 2010, the [safety and return] of [USofA soldiers/armed services personnel] are something of a [national concern].

The [negative state] will be so prevalent in 2010, that the linguistics for [null, negative, zero, reversal, retrograde, and many others] will be dominating the [public discourse] at all levels. The data sets anticipate a very [swamped in negative/depressing language] period that will last all of 2010. Note that a clear minded decision to limit personal exposure to this coming [negative tsunami] will benefit.

The data sets from previous ALTA reports pointed to mid to late 2010 for the first of the [national strip-mall mining projects] to rise to [visibility]. These will be projects, undertaken at local levels but so pervasive as to form a national movement, to [reclaim] the [resources] in the many [thousands] of by-then [abandoned strip malls]. These will be but a single, and small part of the remnants that result from the coming [bankruptcy] and [business failure] wave resulting from the [dollar death]. The good news is that the [strip malls (and other commercial and residential abandoned/empty properties)] will prove to be a surprisingly large [repository] of [resources], as well as being a very good [school] for developing [extremely good recycling skills]. There are other effects noted in the data of this [re-forming (of the sub-urban landscape) movement] which go to [community] and [village] building that are indicated to have extremely long term impacts on the order of multiple generations.

Underlying the [negative] first half of 2010 within the Populace/USofA entity is the notion of [great/initial difficulties]. This sub set continues to grow over 2010 and is the primary support for the [confusion] that will dominate in the latter half of the year. This sub set of [great/initial difficulty] is supported at the primary level by [response (to the) loss of the dollar]. The sub sets at the detail levels sketch a crude drawing of much [thrashing around] and [experimenting] as the [populace] as a whole, and as [individuals] try to find [new systems (that will) work]. The period of late 2009 commencing with the [fall of the global reserve dollar] through all of 2010, and well into 2011 will be *THE most [trying/testing] part of the [economic meltdown experience].

A number of SOC's will make it into the [press/media] within the USofA over these next 2/two years and be proffered as [new models]. Again it is worth noting that these [examples] of [communities succeeding] will contain the [duality] of a not-so-hidden fundamental paradox at least as far as the media is concerned in that these SOC's will owe their very [success] to the [rejection] of the [corporate controlled paradigm]. However given the very dire descriptors for the [paper debt/dollar based economy], it will be seen that the [press] really have no other options when [ordered] by their [owners] to [pimp positive news].

While the accretion patterns show a very large increase in emotional tension values with the [hyperinflation] period, it is the [destructive deflation] that brings the sums of the emotional tension values to new heights. The

[destructive deflation] sub set is heavily cross linked internally in the Populace/USofA entity over to the [breakdown of the social contract] sub set. After the [angst], and [anguish] of the [hyperinflation] impacts, the [destructive deflation] brings [visible] instances of [rage], and [fear] at a [national level], and is indicated to [spark] a series of [national movements]. While not technically [strikes] since so many will *not be employed, these [national shutdowns] cause such levels of [havoc] within the TPTB and the [political minion classes] in the [USofA] that [homeland security] intervenes in [protests] at the [behest] of the [congress/politician classes]. The data suggests that this [response] movement by the [government/officialdom] will [significantly escalate] the [populist movement] and actually [hastens] the [revolution] meme forward toward greater [visibility] within the global mediastream. It is worth noting that several [foreign journalists] are [caught up/trapped] by the [events] within the [populace/usofa] and are predicted to [run afoul] of the [homeland security enforcers] such that they will have to be [rescued] by the [protestors/revolutionaries]. This will make for great headlines within the global mediastream, and will bring a sharp focus of [shame] to some groups within [officialdom].

During the [destructive deflation] part of the [dollar death], the data sets accrue in patterns that suggest the tip of an emerging theme. Specifically, there are data sets indicating that [mobs/tribes] of [starving] and [destitute] Americans will [riot], and in the course of [rioting for food], several [mobs/tribes] are described as [looting churches]. These [looting instances] will first concentrate on [food], but after a particularly [violent], and [highly visible] incident in which a [minor catholic church] is [ransacked] and [hordes] of [cash/wealth/coins] are discovered, something of a [scavenger hunt] mentality will take over leading to the [deliberate sacking] of [several major catholic churches] and at least 1/one [catholic college/university]. The 'trend' is described as [spreading] to other [denominations] such that further instances of [looting/sacking] of [churches] will lead to a [national day of mourning] after a [pitched battle] between [priests/lay people] and [starving mobs] leaves [many dead] and [hundreds wounded/hurt/maimed]. It is at this point that the data sets point to [several/many] instances of [pedophile priests] being [hung/executed]. The data seems to place these [revenge attacks/murders] as 'also ran' within the larger stream of [anti-cleric/anti-church looting].

As the [hyperinflation] language is overtaken by the [destructive deflation] language, and perhaps before the [church looting] frenzy overtakes the

[populace], the data sets are pointing to a situation described as [rise (of) green genes]. These [green genes] are the euphemistically labeled [product] of a [laboratory] that are forecast as [escaping (from the) laboratory] out into the 'wild'. This incident will not (apparently) be national, but is indicated to affect a [large region] of the [country]. The [green genes (poisoning)] incident is also indicated to present the first [internal security crisis] for the [post bushies officialdom]. It will be a case of a [heavy corporate presence] which will be [visibly] very [guilty] of both [callous disregard] and [incompetence]. In this [incident] the [green genes] escape, and several [hundreds of thousands] of people are placed at risk. The [escalation] of the [green genes] incident leads directly to [organized mob actions] against the many [forms/faces] of this [corporation], and the [owners of the corporation] then [pressure officialdom] to take actions. The quandary that is created is indicated to participate in the [wholesale/compete (rejection) of incumbents] in the 'election' of 2010. Not that it will matter. The [killings] on both sides of the [green genes] fiasco are presented by the data as a [distraction] from the larger [social contract collapse] and the rise of the [active phase] of the [revolution] meme here in the USofA. The data shows that the 2010 elections are the [most hyped], and [least effective] of all such contests ever in the USofA. The [elections] are also described as [fading (into) insignificance] before the [ballots] are even [put away]. The data also points to the many [personal, and physical attacks] on [politicians] who are [foolish enough] to [campaign in front of crowds] as being the [impetus] for the [protection of political candidates laws] that will be very rapidly created and used against the [populace]. This area of the Populace/USofA entity provides reinforcement for a linguistic set that has been building since 2004 in which the [political elite/ruling classes] of the country are described as [barricading themselves] in [armed enclaves] and [protected environments]. The data also indicates that the movement by the [political class] for [self isolation (from the populace)] is warranted, and also essentially doomed to [failure]. At least one spectacular incident is described in the data (likely for 2011) in which the [mobs] are described as [chanting] while they [burn alive] the [politicians (and their companions)] who are [trapped] within the ['secure' enclave]. This incident marks the beginning of [lethal aggression] against the [populace] and the beginning of the [bloody revolution] here in the USofA.

[SpaceGoatFarts – Encounter Energies Power...](#)

As the SpaceGoatFarts entity is our repository for all things [officially denied] and/or [unknown], it naturally grows very fast due to the increasing amount of [officially denied] reality. The SpaceGoatFarts entity is also growing in a manner that is seemingly in step with changes within the Terra entity at several levels of main sub sets. These include the [2012/earth changes], and [catastrophic climate changes] sub sets among others. In the case of the SpaceGoatFarts entity, its areas of growth contributing to both of these Terra entity sub sets includes the [unknown energies from space] sub set. This primary supporting set of the SpaceGoatFarts entity is also at the very center of the gradual emergence of the [alien wars] meme over 2010 and into [visibility] in 2011. Bearing in mind that the [visibility] emergence of the [alien wars] sub set within the [unknown energies from space] sub set will be a process, and so we expect that 2010 will have its share of [secrets revealed] that will further the rise of [alien wars] to levels of general [visibility] within the global mediastream.

The [alien wars] sub set is also heavily supported by, and intertwined with [earth impacts (of unknown energies from space)] that will themselves also rise to higher levels of [visibility] over the remainder of 2009, and all of 2010. The conjunction of sub sets from the SpaceGoatFarts entity and the Terra entity are forecasting a [transformation] of the [planetary climate system] over these next [11/eleven years] that should be considered to be [unstable/unreliable/inconsistent] during that time. The [climate transformation] period is indicated to include [tectonic plate movements/alterations] of some [significant (civilization changing)] size. The [alien wars] sub set elements are internally cross linked to these area of the [unknown energies from space affecting planetary climate states] indicating that the [state of planetary climate] will somehow play a key role in either the [emergence] of the [alien wars] theme, or the actual conduct of the [alien war].

The [alien wars] theme rises to general [visibility] within the global mediastream over the course of nearly 13/thirteen months. During this time, many of the sub sets under [ufo] shift over in support of the [alien wars] descriptor. The emotional 'weight' of the [ufo] sub set should not be minimized, in part due to the huge amount of energy (emotional and currency) put into ridiculing the whole subject by the government, and [officialdom]. As an effect, desired or not, the [duality] meta data layer dissolves at the same time as the shifting of the [ufo] linguistic structure over to support for the [alien wars]. The [duality] meta data layer has existed

modelspace for over 4/four years. Its dissolution is both surprising and unexpected. It is also very temporally close to the actual beginning of the shift of [ufo] emotional weight. At that point, the SpaceGoatFarts gains a significant off-centered look that persists out as far as we can project into 2011.

The off-weighted SpaceGoatFarts entity begins gaining emotional weight from late Fall 2009 through 2011. An early part of the bulge of newly accreting value sets shows up under the descriptor of [proximate (emergence)]. This is a sub set that in early 2010 forms internal cross links to the [alien wars], specifically the sub set of [exchange/meeting]. There are supporting sub sets within this area which are going to [lunar/moon], and [systems (habitation)], [biological (shift)]. There are further sub sets tying the [russian], and [japanese] geographic references within the SpaceGoatFarts entity

Within the [proximate (emergence)] sub set, and specifically appearing in very early 2010 are descriptors for [2/two (or more)] personalities to become [visible] relative to the [contact (with space aliens/other consciousness)] meme. These [2/two (or more)] new personalities are intimately connected with the [exchange], and at least in the case of the first to appear, based in the [populace/usofa]. This person is described in such a manner as to reflect back to the earlier descriptor set for a [whistleblower (disgruntled former employee)] who comes forward with [definitive proof] of [contact], and [presence (of other consciousness)]. The data sets from the currently accreting sets indicate that this personality will [rise] to very [significant levels] of [global visibility], and is further reaches a level of what can only be described as [planetary presence]. There are distinct and curious references to the [space alien/other consciousness] and [technology], as well as [documented/demonstrable proof]. The process of the [elevation] of the [knowledge of contact] is indicated to take nearly 2/two years and so it also moves through the [alien wars] period of 2011.

The second of the forecast appearance of the [2/two or more personalities of exposure] is actually describing a [second/secondary wave] of [former (dark) secret space workers/employees]. The descriptor sets include several referring to a [desperate (attempt)] by TPTB to [muddy the waters] with [fake/faux information]. This [wave of deceit] is shown to cause a few problems but in the main seems to be a [spent force] by early Fall of 2010,

just as both the “impact values sum” and the “duration of impact sum” rise to never before achieved levels in the [contact] sub set.

The above referenced [new personalities] to appear within the [contact] meme sub set are NOT the [2/two (thieves/liberators)] described in previous ALTA reports. These groups do share a set of cross links, and the data sets indicate that the emergence of the first of the [new whistleblower wave] will ‘take the pressure’ off the [2/two liberators of space alien technology] in that TPTB and their minions will be [made busy (through fear/desperation) elsewhere]. Further the data sets are still pointing to a rise in [visibility] of the [technology (stolen/liberated)] and some hints as to the persons involved over late Summer 2009, with another small bubble of [visibility] in very late November, and early December. The [2/two liberators/traveler/fugitives-from-TPTB] will make a very large [visible] contribution to events in 2010. As will their [participation] in an unwitting and tangential fashion to a [trial (of political) special interests] taking place in the second half of the year.

There are also cross links from the SpaceGoatFarts entity over to the Populace/USofA and to the GlobalPop entity, sub set [russia/siberia], in which the [unsettled/floating youth] of the [northern coastal regions] are indicated to play a significant role in both the [contact] meme itself, as well as the resulting [formation of a planetary collective consensus (about the contact meme)]. There are indications that a [couple (from siberia or far northern russia)] will emerge as [planetary leaders] of the [contact acceptance paradigm]. This [couple] is described as [youth/young], [highly educated], [erudite], and [lucky]. Noting that universe provides both the stage and players in any set of coincidences, so how ‘random’ can they be, the data sets continue on to describe a [vertical tribe/SOC] which will be [initiated] by the [siberian couple] around a [contact event]. The data further suggests that the [event] is of far less lasting importance than the [collective consensus movement] which springs from it. Details provide that a [sure and certain] temporal indicator of some importance will be just how [vehemently] the [couple] will [reject] the [offers (of assimilation) of their movement/perspective] by TPTB. Specifically there are references to a [rejection of the pope], and [attacks *(on the couple) by the ‘black’ pope]. Though these last are apparently made in [secret] there will be [betrayers] within the [black orders] who will [leak out] the [internal memorandums] that will make the [black robed order] appear to be [issuing edicts/warrants of death]. The [northern aspect couple] described in the data will be the [instigators] of a [rapidly spreading] and [embracing] global [youth

movement]. At least [3/three] separate [attempts] at [sublimation/assimilation] are forecast to be [rebuffed/rejected/twated]. After that, and within the background of the [alien wars] in 2011, the data sets will show that TPTB will [screech] and [shriek] as they are [overtaken] by the [events] which will [pile up], and then [cascade down] from this [youth movement]. There are some hints within the SpaceGoatFarts entity that the [female] part of this [couple from the north] will participate within the [aquarian planetary SOC] later, but that she will be primarily involved in the [expansion] of the [power(ed) movement] of the [planetary youth SOC].

The SpaceGoatFarts entity has a very large collection of cross linked data structures which are terminating in the [fear] sub set of TPTB entity, and which are being [driven] by the very large [epic/monumental] level memes/themes of these times. Such [drivers] include the [dollar death], and subsequent impacts on the [breakdown of the social contract], and the [destruction of the university (mainstream academia controlled) education system]. Both of these have sub sets within their respective [secrets revealed] supporting layers that indicate that the [destruction (of western academic hierarchy)] is viewed by the TPTB as being a [stepping stone] toward the [destruction (of their) power base].

The data sets accruing to the SpaceGoatFarts entity in support of the [destruction (of peer reviewed, controlled academia)] will be [propelled] by the [propaganda/press] component of TPTB as they (the press) are desperate to find [positive stories] at the [orders (of their) owners/masters]. Many of the [positive stories] of the next 8/eight months will feature [self organizing collectives], some of which are [active] in the [populist/revolutionary inventors movement/SOC], and some of these are indicated to produce [spectacular results]. The broader vision of modelspace is showing that things become so [chaotic] with the [dollar destruction], and the [new waves (of consciousness)] flowing around the planet that various parts of the [entrenched power structure] start to actually work at [cross/counter purposes]. The data sets within SpaceGoatFarts are describing an incident in a string of such [duality/dichotomy] revealing situations, in which the [press/propagandists] will actually be [airing/running/showing] a [success story] which features a member of the [strange things with magnets SOC] when the [fear enforcement] part of TPTB arrive to [crush the invention].

The SpaceGoatFarts entity gains aspect/attribute sets in support of the [destruction (of controlled peer reviewed science/academia)] over all of

2009 through 2011, however a very large bulge of supporting sets arrive in a stream that is forecast to [last/persist for 10/ten years], and that begins in mid 2010 *just as the [dollar death meme] collides with the [political elite implosion], and the [university (system of consumer education)] reaches bankruptcy. Again it is worth noting that it is the confluence of a number of very significant archetypes which produce the totality of the effects on the [controlled science (of the western world)].

Omni Humanity – ...Renaissance Dynamo's

Several years ago (circa late 2005), the data sets began to present clusters of linguistic structures which seemed to be forming a new entity within modelspace. This entity was labeled as FuturePop during the first few years of its slow formation. The new descriptor for the entity is more appropriately titled OmniHumanity, and has moved into place over this last year and a half. The new OmniHumanity entity is almost totally composed of an odd dichotomy of very immediate values, and extremely long range values. The long range value set is a range with a base unit of a [human generation]. Much of the longer term sets have a far distant 'impact' point as well, meaning that the linguistics are not expected to appear for years {ed note: really starting in very late 2013}. For various reasons the descriptor OmniHumanity was chosen, though the primary impetus rose from the inclusive nature of the word such that humans of all kinds, and everywhere (not necessarily earth bound) are represented by the sub set.

A conjunction of the entities Markets, Populace/USofA, GlobalPop, Press, and even TPTB forms around a linguistic set headed by the descriptor of [renaissance]. This set formed of the combined supporting sub sets from the various entities has an 'effective' date range from November of 2009 through [4/four generations] or approximately 82/eighty two years. The data accretion patterns seem to indicate that the [seeds] for the [renaissance] will start to become [visible] over late 2009, and then will persist in a low level of growth through the [change/chaos years] of 2010, 2011, and 2012.

The [renaissance] growth rates over these years will be [slow], but the supporting data sets provide for a [deep] and [lasting] impact of these [early years] on the [populace globally]. The [deep impact] on the [social order] is indicated to use the [successes of the self-organizing-collectives (SOCs)] as the [base] for the [emergence] of the [planetary renaissance wave through omnihumanity] in 2013 and beyond. The long term data sets supporting the

[omnihumanity renaissance] take a very large jump up in accrual from about mid Summer of 2013 and don't seem to slow down for [decades].

The accretion patterns that build in support of the [omnihumanity renaissance] and its primary supporting sub set of [new electrics] grow from an initial flurry of small levels of [visibility] that begin to appear in mid to late November 2009. This smattering of [visible] stories within the global mediastream is forecast to [be unnoticed/unknown] to the larger [global populace], yet is still showing with very high levels of long term emotional impact, as well as extremely high levels of 'duration'. These first initial appearances of the [new electrics] and [renaissance] memes will be noticed by enough people to start a [bubbling/frothing] within several large demographics. These [bubbles] of [visibility] are forecast to be at high enough levels to [excite/spark] the [underground/hidden/occulted backyard/garage/kitchen table inventor classes] into a [furious race/exposure of progress] that is forecast to grow globally, both [in spite of (chaotic) global political circumstances], as well as [in defiance (of accepted academia and the TPTB suppression efforts)]. While the total summations across all the fields in the array in the supporting value levels is positive, it must be known that many of the [participants (self selecting electric revolutionaries)] are forecast to find themselves in [direct opposition] {ed note: and getting shit from} TPTB and their [political class minions].

Within the conjunction of sets from the TPTB entity and the Omnihumanity entity which centers around the [renaissance] and the [new electrics] are indicators of all manner of [dirty tricks] and other forms of [intimidation] which will be [attempted] by TPTB minions against the [revolutionary renaissance participants]. Much in the way of [dis-information] and [disputes (over) discovering (independently) classified information] will be very [visibly] played out in the global mediastream, with special emphasis on those sections of the mediastream that are controlled directly by the corporate stooges of TPTB. Much of the [media battles] over the [revolutionary new electrics] are indicated to be [visible] in the [alternative media] including the [populace video streams] {ed note: such as google video, youtube, dailymotion, et al}.

There are indications in the data accretion patterns that the [fundamental discoveries/principles] for the [new electrics] are to be [generally distributed/transmitted] in 2009. The data accretion patterns indicate a [visibility] rise in the subject in November of this year, but likely this is

more of the [appearance of the media (find it)] than the time of the actual discovery of [fundamental principles]. There are indications within the detail layers that several [sources/points] on the planet will be [home residences] to [nexus] of [discovery activity].

The data sets themselves, composed of aspect/attribute sets clustered around key linguistic structures, and the larger patterns of the accretion of these data sets, are providing a picture of the [renaissance of omnihumanity] that sets a very interesting context indeed. Much of the detail layers read as though this [renaissance/liberation (of the mind) paradigm] of omnihumanity takes place against a background that resembles the worst of the French Revolution merged into When Worlds Collide. The [chaos] and [disruption] of [civil life] at a global scale is specifically brought into the picture as various Terra intrusions, and [social disruption] is indicated to [disrupt] and [disturb/perturb] the 'normal' or accepted methods of 'doing business'. Most of the [disruptions] have the [currency collapse/death of the dollar] at their core support levels, and these are at least in part responsible for a [new ethos] which overtakes the whole of the [inventor/discovery meme]. The idea coming across from the data accretion patterns is that as the chaotic conditions of the [dollar death] impact the global populace, a sub culture (now resident on youtube et al) grows in leaps and bounds, driven not by thoughts {ed note: at least not exclusively} of vast wealth, but rather more altruistically focused on ['saving' humanity (from itself)]. The emotional sums for these supporting sub sets indicate that a [new ethos] is emerging now that will come to dominate the rising [inventive mind sub culture]. The data sets are indicating that much of the emotional drive for these individuals will still be [egoistically impelled], however the [new satisfaction] sub set indicates that it will a form of [global ego stroke (for success)] that will drive these individuals to [work (and) post (the results)] so tirelessly. The data sets indicate that this [sub culture form of the self organizing collective] will come to dominate the media of the near term briefly in 2010, and then later to be a [central focus] of planetary attention from 2014 onward. Further the data sets are painting a picture of [collective think] that spurs [staggering leaps] by [demonstrations (of success)] upon which [other minds] will [install/piggy-back] their work in a [self reinforcing cycle of success]. The data sets describing the [discovery sub culture] are rising coincident to {ed note: probably meaningful} the gradual loss of the [duality] meta data layer. Further, large areas of support for the [renaissance] come from both the SpaceGoatFarts entity and the Populace/USofA entity. In both cases it is the breakdown and [release of

long hidden/occulted information] that [propel/create paradigm shift]. Again, we note that 2009 has been seen within our data as the Year of Transformation for some time. Again, we note that 2009 is merely the rise of Transformation to global visibility, not the end of the process.

A significant portion of the [new electrics] sub set of the [omni humanity renaissance] sub set is heavily cross linked over to both the Terra entity, and the [changes in the oceans] sub sets, as well as to the GlobalPop and Populace/USofA entities where the terminations are within the [new awareness/focus (on the) oceans] sub set. Along with the [rise of the ‘magnet people’] as a very vast and totally not organized collective across the internet, the data sets are forecasting the appearance of [new water tribes], also described as [(cold/northern) sea peoples]. These [northern sea tribes] are indicated to be the [pool] from which the more diverse [water/ coastal nomadic peoples] will grow from 2014 onward. The prima facia paradox of a [changing/disturbed oceanic environment] being the [background] for a [renaissance] in [forms of human aquatic life] is easily accommodated within modelspace as it is the very [stark realization] of [oceanic peril] that [prompts/promotes/supports] the global emergence of [new sea peoples].

Conclusion: The Shape Of Things To Come – Volume Zero, Issue Zero:-

We don’t have to be stupid humans. While we do have to be human, and the more so the better, and while we have the in-built primate monkey-mind chattering away, shrieking and wailing at every perceived ‘missed fortune’, we need not be stupid humans.

We can control the monkey-mind on a short leash, and by turning our attention toward that portion of earth beneath our feet, we can begin to work our way toward a positive if not optimistic projection of personal future. Yes, the world of humans is going to go through hell, and if the data is anywhere close to correct, the temperatures at all levels of hell have risen as part of the global warming. However, by focused personal power placed perceptively on our very local environment, like the ground under your feet, it is possible to positively project change from your center outward. In fact, most of those who have experienced actual personal change will confirm that change ONLY happens individually and all other manifestations are merely projections of the very necessary successful personal transformation. Or as Voltaire would have it {in times of planetary chaos}, tend one’s own

garden. Never has the advice been more pertinent, nor more appropriate at so many levels.

Two drenched travelers walking a rain soaked forested road are stopped in their progress by a river already starting to swell with rainwater run off. One, an experienced traveler, says “the problem is getting over to there quickly before ‘it’ gets any worse”. The other, a grounded human (sage/monk) out for the first time in years replies, “perhaps, but the solution is ‘being here, now’”.

The examination of modelspace these last few years has convinced us here at HPH that truly extraordinary times are upon us in which giant waves of historic, even epic levels of change will sweep across the planet twisting, pressuring and contorting the global human social order into something completely new. These giant waves of social and environmental change are so huge that very few humans anywhere on the planet will escape their impact. The epic nature of these giant waves will sweep us all as individuals into the new collective human history. All of what once was, will soon be gone, and what has not yet been envisioned will soon be here. These waves of epic, human race altering, change provide for a future of chaotic opportunity.

As the data sets indicate, the ‘problem’ will not be so much learning how to get ‘across’ these giant waves of change, but rather, how, in the midst of them, to learn to ‘be here, now’.

End Volume Zero, Issue Zero.

<http://webbotdiscussions.forumco.com/policy.asp>

Future issues of The Shape of Things To Come are planned, however our publication will be irregular. It may end up being quarterly, or something close to it. As the reports note in some detail, ‘things’ are in a general state of flux, and we like to harmonize with universe, we here at HPH are also in a general state of flux. Our goals for our flux-time include growth in

direction and reworking the lexicon. Though another issue is planned, there are no schedules contemplated just yet. Stay tuned to the HPH page for postings about future publications. Or read George Ure's UrbanSurvival daily update for advanced notice of publication.

Thank you for purchasing this 'future journal'. Hopefully we are totally wrong in all particulars and humanity will have a bright and untroubled future road to collective enlightenment and good karma.
